Professional-Data-Engineer考試備考經驗 - Professional-Data-Engineer考題資訊

相信在IT行業工作的很多人都希望通過一些IT認證考試獲得到相應的認證證書。一些IT認證證書可以幫助你在競爭激烈的IT行業裏步步高升。目前很熱門的Google Professional-Data-Engineer 認證證書就是其中之一。雖然通過Google Professional-Data-Engineer 認證考試不是很容易，但是還是有很多通過Google Professional-Data-Engineer 認證考試的辦法。你可以選擇花大量的時間和精力來鞏固考試相關知識，也可以選擇一些有效的培訓課程。NewDumps提供的針對性模擬測試就很有效，能節約你的寶貴的時間和精力就能達到你想要目標，NewDumps會是你很好的選擇。

最新的 Google Cloud Certified Professional-Data-Engineer 免費考試真題 (Q315-Q320):

問題 #315

You are building a new application that you need to collect data from in a scalable way. Data arrives continuously from the application throughout the day, and you expect to generate approximately 150 GB of JSON data per day by the end of the year. Your requirements are:

- * Decoupling producer from consumer
- * Space and cost-efficient storage of the raw ingested data, which is to be stored indefinitely
- * Near real-time SQL query
- * Maintain at least 2 years of historical data, which will be queried with SQL Which pipeline should you use to meet these requirements?

- A. Create an application that publishes events to Cloud Pub/Sub, and create Spark jobs on Cloud Dataproc to convert the

JSON data to Avro format, stored on HDFS on Persistent Disk.

- B. Create an application that writes to a Cloud SQL database to store the data. Set up periodic exports of the database to write to Cloud Storage and load into BigQuery.
- C. Create an application that publishes events to Cloud Pub/Sub, and create a Cloud Dataflow pipeline that transforms the JSON event payloads to Avro, writing the data to Cloud Storage and BigQuery.
- **D. Create an application that provides an API. Write a tool to poll the API and write data to Cloud Storage as gzipped JSON files.**

答案： D

問題 #316

You are operating a streaming Cloud Dataflow pipeline. Your engineers have a new version of the pipeline with a different windowing algorithm and triggering strategy. You want to update the running pipeline with the new version. You want to ensure that no data is lost during the update. What should you do?

- **A. Update the Cloud Dataflow pipeline inflight by passing the --update option with the --jobName set to the existing job name**
- B. Stop the Cloud Dataflow pipeline with the Drain option. Create a new Cloud Dataflow job with the updated code
- C. Update the Cloud Dataflow pipeline inflight by passing the --updateoption with the --jobName set to a new unique job name
- D. Stop the Cloud Dataflow pipeline with the Cancel option. Create a new Cloud Dataflow job with the updated code

答案： A

解題說明：

Explanation/Reference: <https://cloud.google.com/dataflow/docs/guides/updating-a-pipeline>

問題 #317

Your organization has been collecting and analyzing data in Google BigQuery for 6 months. The majority of the data analyzed is placed in a time-partitioned table named events_partitioned. To reduce the cost of queries, your organization created a view called events, which queries only the last 14 days of data. The view is described in legacy SQL. Next month, existing applications will be connecting to BigQuery to read the events data via an ODBC connection. You need to ensure the applications can connect. Which two actions should you take? (Choose two.)

- A. Create a new view over events using standard SQL
- B. Create a Google Cloud Identity and Access Management (Cloud IAM) role for the ODBC connection and shared "events"
- C. Create a new partitioned table using a standard SQL query
- **D. Create a service account for the ODBC connection to use for authentication**
- **E. Create a new view over events_partitioned using standard SQL**

答案： D,E

問題 #318

You need to store and analyze social media postings in Google BigQuery at a rate of 10,000 messages per minute in near real-time. Initially, design the application to use streaming inserts for individual postings. Your application also performs data aggregations right after the streaming inserts. You discover that the queries after streaming inserts do not exhibit strong consistency, and reports from the queries might miss in-flight data. How can you adjust your application design?

- A. Load the original message to Google Cloud SQL, and export the table every hour to BigQuery via streaming inserts.
- **B. Estimate the average latency for data availability after streaming inserts, and always run queries after waiting twice as long.**
- C. Convert the streaming insert code to batch load for individual messages.
- D. Re-write the application to load accumulated data every 2 minutes.

答案： B

解題說明：

The data is first comes to buffer and then written to Storage. If we are running queries in buffer we will face above mentioned issues.

If we wait for the bigquery to write the data to storage then we won't face the issue. So We need to wait till it's written to storage

問題 #319

You want to archive data in Cloud Storage. Because some data is very sensitive, you want to use the "Trust No One" (TNO) approach to encrypt your data to prevent the cloud provider staff from decrypting your data. What should you do?

- A. Specify customer-supplied encryption key (CSEK) in the .boto configuration file. Use gsutil cp to upload each archival file to the Cloud Storage bucket. Save the CSEK in a different project that only the security team can access.
- B. Use gcloud kms keys create to create a symmetric key. Then use gcloud kms encrypt to encrypt each archival file with the key and unique additional authenticated data (AAD). Use gsutil cp to upload each encrypted file to the Cloud Storage bucket, and keep the AAD outside of Google Cloud.
- C. Specify customer-supplied encryption key (CSEK) in the .boto configuration file. Use gsutil cp to upload each archival file to the Cloud Storage bucket. Save the CSEK in Cloud Memorystore as permanent storage of the secret.
- **D. Use gcloud kms keys create to create a symmetric key. Then use gcloud kms encrypt to encrypt each archival file with the key. Use gsutil cp to upload each encrypted file to the Cloud Storage bucket. Manually destroy the key previously used for encryption, and rotate the key once.**

答案： D

問題 #320

.....

NewDumps是唯一能供給你們需求的全部的Google Professional-Data-Engineer 認證考試相關資料的網站。利用NewDumps提供的資料通過Google Professional-Data-Engineer 認證考試是不成問題的，而且你可以以很高的分數通過考試得到相關認證。

Professional-Data-Engineer考試備考經驗: <https://www.newdumpspdf.com/Professional-Data-Engineer-exam-new-dumps.html>

作為IT認證考試的相關資料的專業提供者，NewDumps Professional-Data-Engineer考試備考經驗肯定是你見過的最好的網站，NewDumps Professional-Data-Engineer考試備考經驗可以保證你的成功，但是，這是真的，選擇使用NewDumps Professional-Data-Engineer考試備考經驗提供的產品，你踏上了IT行業巔峰的第一步，離你的夢想更近了一步，Google Professional-Data-Engineer最新題庫 成功獲得一份權威的IBM認證在當前來說可以讓我們的有更多的機會來實現自我價值，因為我們NewDumps提供給你配置最優質的類比Google的Professional-Data-Engineer的考試考古題，將你一步一步帶入考試準備之中，我們NewDumps提供我們的保證，我們NewDumps Google的Professional-Data-Engineer的考試試題及答案保證你成功，Google Professional-Data-Engineer最新題庫 关于付款方式，我公司优先支持Credit Card付款方式。

找死，火輪霸刀，別得了便宜還賣乖，小心我下次贏回來，作為IT認證考試的相關資料的專業提供者，NewDumps Professional-Data-Engineer肯定是你見過的最好的網站，NewDumps可以保證你的成功，但是，這是真的，選擇使用NewDumps提供的產品，你踏上了IT行業巔峰的第一步，離你的夢想更近了一步。

非常好的Professional-Data-Engineer最新題庫和資格考試的領導者以及100%的合格率Professional-Data-Engineer: Google Certified Professional Data Engineer Exam

成功獲得一份權威的IBM認證在當前來說可以讓我們的有更多的機會來實現自我價值。
