UiPath Agentic Automation Associate Sample Questions (Q13-Q18):

NEW QUESTION # 13
Scenario: A Citrix Administrator has enabled an HDX Session printers policy within a Citrix Virtual Apps and Desktops Site. The administrator added a printer to a print server and assigned the printer to all users through a session printer policy. In addition, several local client printers are auto-created within HDX sessions. No other printing policies are configured. How will print jobs be routed when users send print jobs to a printer managed by the print server?

- A. Directly from the session Virtual Delivery Agent (VDA) machine to the printer
- B. Over the HDX virtual channel, through the endpoint, and then to the print server
- C. Over the HDX virtual channel to the specified printer attached to the print server
- D. Directly to the network print server and then to the specified printer

Answer: D

Explanation:

When using session printers from a print server, print jobs are routed directly from the VDA to the network print server, which then forwards them to the physical printer. The HDX virtual channel is only used for client printers, not for print server-based session printers.

NEW QUESTION # 14

A user complains to a Citrix Administrator that application load time is long when they log on at the beginning of the work day. Which feature can the administrator enable to reduce the perceived start time of the user's application?

- A. Application Limits
- B. Application Keyword
- C. Application Prelaunch
- D. Application Lingering

Answer: C

Explanation:
Application Prelaunch starts an application session in the background before the user explicitly launches it. This reduces perceived application load time, especially at the beginning of the work day, by keeping sessions ready for faster access.

NEW QUESTION # 15

A Citrix Administrator is looking to provide apps and desktops to users. Project requirements dictate that management and maintenance should be minimized for the administrator, while still maintain control of the Virtual Delivery Agent (VDA machines). (Choose three.)

- A. Microsoft Azure
- B. Nutanix Acropolis
- C. Amazon Web Services
- D. Google Cloud Platform
- E. XenServer
- F. Microsoft HyperV

Answer: A,C,D

Explanation:
Using public cloud platforms such as AWS, GCP, or Azure with Citrix Cloud services minimizes infrastructure management and maintenance for the administrator, while still providing control over the VDA machines. The cloud provider handles most of the underlying infrastructure, reducing administrative overhead.

NEW QUESTION # 16

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure. Which step can the administrator take to meet the new company guidelines?

- A. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.
- B. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy setting.
- C. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.
- D. Install the Universal Print Server on all print servers in the Site and update the Universal printer driver usage policy setting.

Answer: D

Explanation:
By installing the Citrix Universal Print Server and configuring the Universal printer driver usage policy, print servers can use the Citrix Universal Print Driver instead of multiple native Windows drivers. This reduces the number of drivers in the environment while ensuring centralized network printing remains functional.

NEW QUESTION # 17
What information from the Citrix License Server does a Citrix Administrator need in order to allocate the Citrix Virtual Desktops license file from the Citrix.com account?

- A. IP address
- **B. Hostname**
- C. FQDN
- D. MAC address

Answer: B
