## Oracle Cloud EPM Data Integration 2024 Implementation Professional Sample Questions (Q385-Q390):

### NEW QUESTION # 385

What is a common technique for tuning data integration jobs to reduce processing time?

- A. Eliminating unnecessary data transformations
- B. Running jobs during peak usage times
- C. Increasing the number of data transformation steps
- D. Automating user role assignments

**Answer: A**

Explanation:

Eliminating unnecessary data transformations is a common technique for tuning data integration jobs, as it reduces the amount of processing required and speeds up the overall process.

### NEW QUESTION # 386

In Oracle Cloud EPM, what does the status "Failed" indicate for a data integration job?

- A. The integration was successful but with validation warnings
- B. The data was loaded with minor issues
- C. The integration did not complete successfully due to errors
- D. The integration is currently in progress

**Answer: C**

Explanation:

The "Failed" status indicates that the data integration did not complete successfully, often due to errors that need to be addressed.

### NEW QUESTION # 387

What is the primary purpose of configuring the EPM Integration Agent for metadata extraction?

- A. To generate real-time financial reports
- B. To update the period mapping process automatically
- C. To automate user role assignments
- D. To ensure that the structure and attributes of the data are accurately mapped for integration

**Answer: D**

Explanation:

The primary purpose of configuring the EPM Integration Agent for metadata extraction is to ensure that the structure and attributes of the data are accurately mapped for seamless integration with Oracle Cloud EPM.

### NEW QUESTION # 388

What should be the first step when troubleshooting performance issues in a data integration job?

- A. Reconfiguring user roles and permissions
- B. Reviewing the job logs to identify where delays are occurring
- C. Re-running the job without making changes
- D. Disabling real-time financial reporting

**Answer: B**

Explanation:

The first step in troubleshooting performance issues is to review the job logs, which provide detailed information on where delays or errors are occurring in the integration process.

### NEW QUESTION # 389

What does the "Completed with Errors" status signify when running a data integration in Oracle Cloud EPM?

- A. The data was successfully loaded without any problems
- B. The integration failed and needs to be re-run
- C. The integration completed, but issues need to be addressed
- D. The process is pending approval

**Answer: C**

Explanation:

The "Completed with Errors" status indicates that while the integration process was completed, some issues or errors need to be resolved.

### NEW QUESTION # 390

.....
