

# Simulated ZDTA Test Fantastic Questions Pool Only at Pass4sureCert

The screenshot shows a simulated ZDTA test interface. At the top, a header bar displays the text '2025 ALL RIGHTS RESERVED 11:44 AM A+'. Below this, a title bar reads 'ZDTA Exam Questions And Answers |Latest 2025 | Guaranteed Pass'. The main content area contains several questions and their answers, with some text obscured by a red redaction box. One visible question is: 'ZCC - Answer✓ Lightweight app that sits on users, endpoint, and enforces security policies and access controls, regardless of device location or application'. Another question is: 'Time to check for software updates - Answer✓ Every 2 hours'. A third question is: 'Time when ZCC will connect and download any policy updates for the app profiles and forwarding profiles - Answer✓ Every hour'. At the bottom of the interface, there is a navigation bar with a blue bar containing the number '1' and a 'Page 1' indicator.

## 100% Pass Quiz 2026 ZDTA: Zscaler Digital Transformation Administrator Fantastic Simulated Test

It can almost be said that you can pass the ZDTA exam only if you choose our ZDTA exam braindumps. Our ZDTA study materials will provide everything we can do to you. Only should you move the mouse to buy it can you enjoy our full range of thoughtful services. Having said that, why not give our ZDTA Preparation materials a try instead of spending a lot of time and effort doing

something that you may be not good at? Just give it to us and you will succeed easily.

## Zscaler Digital Transformation Administrator Sample Questions (Q12-Q17):

### NEW QUESTION # 12

Does the Cloud Firewall detect evasion techniques that would allow applications to communicate over non- standard ports to bypass its controls?

- A. The Cloud Firewall includes an IPS engine, which will detect the evasion techniques and will just block the transactions as it is invalid.
- B. Zscaler Client Connector will prevent evasion on the endpoint in conjunction with the endpoint operating system's firewall.
- C. The Cloud Firewall includes Deep Packet Inspection, which detects protocol evasions and sends the traffic to the respective engines for inspection and handling.
- D. As traffic usually is forwarded from an on-premise firewall, this firewall will handle any evasion and will make sure that the protocols are corrected.

**Answer: C**

Explanation:

The Cloud Firewall includes Deep Packet Inspection (DPI) capabilities that detect protocol evasion techniques where applications try to communicate over non-standard ports to bypass firewall controls. Once detected, the traffic is sent to the appropriate inspection engines for further handling and mitigation. This ensures that evasive traffic does not bypass security controls.

### NEW QUESTION # 13

What does TLS Inspection for Zscaler Internet Access secure public internet browsing with?

- A. Removing certificates and reconnecting client connection using HTTP.
- B. Intermediate certificates are created for each client connection.
- C. Logging which clients receive the original webserver certificate.
- D. Storing connection streams for future customer review.

**Answer: B**

Explanation:

TLS Inspection in Zscaler Internet Access secures public internet browsing by creating intermediate certificates for each client connection. This Man-In-The-Middle approach enables Zscaler to decrypt and inspect encrypted traffic for threats and policy compliance while still maintaining secure connections with the client. The intermediate certificate acts as a trusted entity between the client and the real server during inspection.

### NEW QUESTION # 14

Within ZPA, the mapping relationship between Connector Groups and Server Groups can best be defined as which of the following?

- A. Connector Groups are configured for Dynamic Server Discovery so that ZPA can steer traffic through the appropriate Server Group.
- B. Server Groups are configured for Dynamic Server Discovery so that mapped Connector Groups can DNS resolve and make health checks toward the application.
- C. Connector Groups are configured for Dynamic Server Discovery so that mapped Server Groups can DNS resolve and advertise the applications.
- D. Server Groups are configured for Dynamic Server Discovery so that mapped Connector Groups can then DNS resolve individual application Segment Groups.

**Answer: B**

Explanation:

Server Groups in ZPA use Dynamic Server Discovery to supply Connector Groups with the application endpoints' DNS names or IPs. The Connector Groups then resolve those addresses and perform health checks to ensure the applications are reachable before steering user traffic.

## NEW QUESTION # 15

What is one of the four steps of a cyber attack?

- A. Find Attack Surface
- B. Find Least Secure Office Building
- C. Find Cash Safe
- D. Find Email Addresses

**Answer: A**

Explanation:

One of the four essential steps of a cyber attack is to find the attack surface. This step involves identifying vulnerabilities, entry points, and targets within an organization's network or systems that can be exploited by attackers.

The study guide outlines this as a critical phase in the cyber kill chain, where attackers map out potential avenues for compromise.

## NEW QUESTION # 16

When a SAML IDP returns an assertion containing device attributes, which Zscaler component consumes the attributes first, for policy creation?

- A. Mobile Admin Portal
- B. Zscaler SAML SP
- C. Zero Trust Exchange
- D. Enforcement node

**Answer: C**

Explanation:

When a SAML Identity Provider (IdP) returns an assertion containing device attributes, these attributes are first consumed by the Zero Trust Exchange component. This component uses the device attributes for policy creation and enforcement decisions, integrating identity and device posture information to make dynamic access decisions.

## NEW QUESTION # 17

.....

In order to gain more competitive advantages when you are going for a job interview, more and more people have been longing to get a ZDTA certification.
