

# Plat-Dev-210 Dumps For DumpTorrent - Best

P.S. Free 2026 Salesforce Plat-Dev-210 dumps are available on Google Drive shared by DumpTorrent:  
[https://drive.google.com/open?id=1ysQ\\_QthSIHiPK5wAGy9WgxLN8\\_PnP77](https://drive.google.com/open?id=1ysQ_QthSIHiPK5wAGy9WgxLN8_PnP77)

The Plat-Dev-210 certification verifies that you are a skilled professional. DumpTorrent product is designed by keeping all the rules and regulations in focus that Salesforce publishes. Our main goal is that you can memorize the actual Salesforce Plat-Dev-210 Exam Question to complete the Salesforce Certified Omnistudio Developer (Plat-Dev-210) test in time with extraordinary grades.

## Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Expression Sets &amp; Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Omniscripts: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Flexcards:</b> This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Integrated Troubleshooting and Deployment:</b> This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.</li> </ul>

We offer a full refund guarantee, which means DumpTorrent is obliged to return 100% of your money in case of failure after using our Salesforce Plat-Dev-210 dumps. Buy Salesforce Plat-Dev-210 updated exam questions today and start your journey towards success in the Salesforce Certified Omnistudio Developer (Plat-Dev-210) test. Our dedicated customer support team is available 24/7 to help you ease your confusion.

### Salesforce Certified Omnistudio Developer Sample Questions (Q102-Q107):

#### NEW QUESTION # 102

A developer creates an Integration Procedure with a Set Values and a DataRaptor Extract Action that requires AccountId as a key. When the developer previews the Integration Procedure, the developer enters the AccountId correctly and execute the Preview. The developer sees the data extract by the DataRaptor in the Debug Log, but the response is empty.

What is the likely cause of this issue?

- **A. A Response Action was not added to the integration Procedure.**
- B. The AccountId used for the preview is invalid.
- C. The Response cannot be previewed directly.
- D. The DataRaptor Action did not have the add response Ro Response JSON property set to true.

**Answer: A**

Explanation:

According to the OmniStudio Developer Guide, "To return a response from an Integration Procedure, add a Response action as the last action in your Integration Procedure." Therefore, the correct answer is C.

#### NEW QUESTION # 103

An OmniScript displays data from an API using Integration Procedure, but some of the data is missing. Which two configuration errors could cause this? Choose 2 answers

- A. The Integration Procedure Preview Input Parameters do not match the JSON sent from the OmniScript.
- B. The missing data is trimmed in the Integration Procedure Action Response JSON Path.
- **C. The JSOW sent from the Integration Procedure Action does not match any of the Original Input for the Integration Procedure**
- **D. The element name for the missing data does not match the JSON node key in the Integration Procedure Response.**

**Answer: C,D**

Explanation:

The element name for the missing data must match the JSON node key in the Integration Procedure Response, otherwise the data

will not be mapped correctly. The JSON sent from the Integration Procedure Action must match one of the Original Input for the Integration Procedure, otherwise the Integration Procedure will not execute properly. The Integration Procedure Preview Input Parameters and the Response JSON Path have no effect on displaying data in OmniScript.

#### NEW QUESTION # 104

A developer is configuring the API URL in an HTTP Action element within an Integration procedure. What is the merge code syntax for passing a Date node from an element named SetValues in the URL?

- A. ('Setvalues')[ 'Date']
- **B. {{SetValues.Date}}**
- C. %SetValues Date
- D. x%SetValues.Date%

**Answer: B**

Explanation:

The correct syntax for merge codes in Integration Procedure is {{(NodeName)}}, where NodeName is the name of the JSON node in the data source. The other options are either missing the parentheses or using incorrect symbols.

#### NEW QUESTION # 105

Which calculation procedure version in the list would execute on 2/15/2020 at 12:00 PM?

- A. Version Number 3
- **B. Version Number 4**
- C. Version Number 2
- D. Version Number 1

**Answer: B**

Explanation:

the calculation procedure version that would execute on 2/15/2020 at 12:00 PM is the one that has the start date time and end date time that include that date and time, and also has the highest priority among the enabled versions. In this case, only version number 4 meets these criteria, as it has a start date time of 2/1/2020 12:00 AM, an end date time of 4/1/2020 12:00 AM, a priority of 1, and is enabled. The other versions either have a different start or end date time, a lower priority, or are not enabled.

#### NEW QUESTION # 106

A developer is configuring the API URL in an HTTP Action element within an Integration Procedure. What is the merge code syntax for passing a Date node from an element named SetValues in the URL?

- **A. %SetValues.Date%**
- B. %SetValues: Date%
- C. t'SetValues' ][ 'Date' ]
- D. {{SetValues.Date}}

**Answer: A**

Explanation:

In OmniStudio Integration Procedures, when referencing data from a prior step in the HTTP Action URL, the correct merge code syntax is:

\* %ElementName.PropertyName%

So, referencing a value called Date from a step named SetValues must be written as:

\* %SetValues.Date%

This is the format recognized by the OmniStudio Merge Language (OML) for dynamic value substitution in URLs or headers.

Incorrect Options:

- \* A. Invalid syntax - not recognized by OmniStudio merge logic.
- \* B. {{SetValues.Date}} is used in FlexCards, not in Integration Procedures.
- \* D. %SetValues: Date% is incorrect merge syntax due to space and colon use.

## NEW QUESTION # 107

.....

According to the statistic about candidates, we find that some of them take part in the Plat-Dev-210 exam for the first time. Considering the inexperience of most candidates, we provide some free trail for our customers to have a basic knowledge of the Plat-Dev-210 exam guide and get the hang of how to achieve the Plat-Dev-210 exam certification in their first attempt. We also welcome the suggestions from our customers, as long as our clients propose rationally. We will adopt and consider it into the renovation of the Plat-Dev-210 Exam Guide. Anyway, after your payment, you can enjoy the one-year free update service with our guarantee.
