New Microsoft GH-900 Exam Bootcamp & Reliable GH-900 Study Plan

If you prefer to practice GH-900 questions and answers on paper, then our GH-900 exam dumps are your best choice. GH-900 PDF version is printable, and you can print them into a hard one and take notes on them, and you can take them with you. GH-900 exam bootcamp offers you free demo for you to have a try before buying, so that you can have a better understanding of what you are going to buy. GH-900 Exam Materials contain both questions and answers, and you can have a convenient check after practicing.

Microsoft GitHub Foundations Sample Questions (Q20-Q25):

NEW QUESTION # 20

Which of the following statements most accurately describes secret gists?

- A. Anyone can see the gist from the gist Discover page.
- B. Secret gists require GitHub Enterprise.
- C. Users with assigned access can view the gist.
- **D. Anyone with the URL for the gist can view the gist.**

Answer: D

Explanation:

Secret gists on GitHub are "unlisted" gists, meaning they are not publicly discoverable but can be viewed by anyone who has the URL.

Visibility of Secret Gists:

Option A is correct because secret gists can be viewed by anyone who has the direct URL, making them accessible yet unlisted.

Incorrect Options:

Option B is incorrect because secret gists do not require GitHub Enterprise; they are available on all GitHub accounts.

Option C is incorrect because secret gists do not appear on the gist Discover page.

Option D is incorrect because secret gists do not have an "assigned access" feature; access is determined by sharing the URL.

Reference:

GitHub Docs: About Gists

NEW QUESTION # 21

You're reading a YAML workflow file in a GitHub repository and notice that it defines multiple jobs, each with several steps. Your team lead asks you to briefly explain how GitHub Actions workflows are structured. Which of the following best describes the main components that make up a GitHub Actions workflow?

- A. Pull requests, forks, and branches
- B. Issues, discussions, and commits
- C. Webhooks, gists, and notifications
- **D. Workflows, jobs, steps, actions, and runners**

Answer: D

Explanation:

GitHub Actions workflows consist of workflows, which define automation processes; jobs, which are tasks executed in parallel or sequentially; steps, which are individual commands within jobs; actions, which are reusable components performing specific tasks; and runners, which are environments that execute workflows. This structured approach allows for efficient automation of builds, tests, and deployments.

Option D is CORRECT because GitHub Actions is built from the following key components:

Workflows - Automated processes triggered by events.

Jobs - Group of steps that execute on the same runner.

Steps - Individual commands or actions in a job.

Actions - Reusable extensions that run complex tasks.

Runners - Virtual machines or servers that execute jobs.

<https://docs.github.com/en/actions/learn-github-actions/understanding-github-actions>

NEW QUESTION # 22

Which of the following options can a user do from a discussion post?

- **A. Create an issue from the discussion**
- B. Add the discussion to README
- C. Duplicate the discussion
- D. Archive the discussion

Answer: A

Explanation:

From a discussion post on GitHub, a user can Create an issue from the discussion. This feature allows users to turn a discussion into an actionable item by creating an issue directly from the discussion thread. This is particularly useful when a conversation identifies a bug, task, or enhancement that needs to be tracked in the repository.

NEW QUESTION # 23

Which of the following are available statuses of a pull request?

(Each answer presents a complete solution. Choose four.)

- A. Closed
- B. Open
- C. Rebasing
- D. Draft
- E. Merged
- F. Modified

Answer: A,B,D,E

Explanation:

Pull requests (PRs) on GitHub can have several statuses that indicate their current state in the development and review process:

Draft:

Option A is correct. A pull request can be in a "Draft" status, indicating that it is a work in progress and not yet ready for review.

Closed:

Option B is correct. A pull request can be "Closed" without being merged, which might happen if the proposed changes are not needed or are incorporated differently.

Merged:

Option D is correct. A pull request that has been reviewed and approved can be "Merged" into the target branch, indicating that the changes have been successfully incorporated.

Open:

Option F is correct. An "Open" pull request is one that is active and awaiting review or further action.

Incorrect Options:

Option C (Rebasing) is incorrect because "Rebasing" is not a status; it's an operation that can be performed on branches.

Option E (Modified) is incorrect because there is no "Modified" status for pull requests.

Reference:

GitHub Docs: About Pull Requests

NEW QUESTION # 24

What should be done to locate an existing action that was provided by a GitHub-approved vendor? (Choose two.)

- A. Add the vendor as an allowed Actions Source.
- B. Install the GitHub App that was provided by the vendor.
- C. Search the vendor's website for a github.yaml index.
- D. Create a new workflow file.
- E. Confirm that the action has a verification badge.
- F. Search the GitHub Marketplace for Actions by the vendor.

Answer: E,F

Explanation:

To locate an existing GitHub Action provided by a GitHub-approved vendor, you can use the following methods:

Verification Badge:

Option C is correct because actions provided by GitHub-approved vendors will typically have a verification badge. This badge indicates that the action is from a trusted source, giving users confidence in its security and reliability.

Search the GitHub Marketplace:

Option F is correct because GitHub Marketplace is the official location to find and install actions, including those provided by third-party vendors. You can search for actions by the vendor's name to find the specific one you need.
