## Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.</li></ul>

## Chrome-Enterprise-Administrator Free Exam Questions & Test Chrome-Enterprise-Administrator Sample Questions

Google Chrome-Enterprise-Administrator pdf dumps format contains actual Chrome-Enterprise-Administrator exam questions. With Google Chrome-Enterprise-Administrator pdf questions you don't have to spend a lot of time on Professional Chrome Enterprise Administrator Certification Exam Networking Solutions Chrome-Enterprise-Administrator exam preparation. You just go through and memorize these real Chrome-Enterprise-Administrator exam questions. Real4exams has designed this set of valid Google Exam Questions with the assistance of highly qualified professionals. Preparing with these Chrome-Enterprise-Administrator Exam Questions is enough to get success on the first try. However, this format of Real4exams Chrome-Enterprise-Administrator exam preparation material is best for those who are too much busy in their life and don't have enough time to prepare for Google Chrome-Enterprise-Administrator exam.

### Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q29-Q34):

#### NEW QUESTION # 29

An organization has a compatibility issue with an internal website after the latest Chrome update. The decision is made to revert any updates to the working version and stop Chrome from updating beyond the working version. For security, Chrome needs to continue updating older versions to the latest compatible version. Which configuration would an administrator set?

- A. Update to extended stable channel
- B. **Target version and rollback**
- C. Google Updater policy precedence
- D. Auto update check period

#### Answer: B

Explanation:

To pin Chrome to a specific working version and prevent upgrades beyond it while still allowing updates within that major version for security patches, the "Target version and rollback" policy is the appropriate choice. This allows administrators to specify a target version and potentially roll back if issues arise, while still receiving critical security updates within that targeted version.

#### NEW QUESTION # 30

An organization using Chrome browser on Windows has policies from group policy and Chrome Enterprise Core. In what order are the policies applied?

- A. Cloud policy takes precedence
- B. Group policy takes precedence
- C. From least restrictive to most restrictive
- D. **By the precedence hierarchy**

#### Answer: D

Explanation:

When both Group Policy (local machine policy) and Chrome Enterprise Core (cloud policy) are configured on a Windows device, the effective policy is determined by a defined order of precedence. Generally, cloud policies for managed browsers will override conflicting local policies. The specific precedence order is configurable, but it follows a hierarchical structure where certain policy sources take priority over others.

Options C and D present a simplified view that might not always be the case depending on the configuration.

Option B is a general principle of conflict resolution but doesn't describe the specific order in Chrome policy application.

#### NEW QUESTION # 31

What report types are available in Google Chrome Enterprise Core on the Chrome Insights Report page?

- A. Chromium browsers, Devices that need to be purchased, Devices that have been used by family members

- B. Browsers pending updates, Browsers without activity in the past 28 days, Browsers that have been recently enrolled
- C. Devices that need attention, Devices that need to be purchased, Devices that have been used by family members
- D. Device Fleet Hardware report, Browsers that need attention, Chromium browsers

**Answer: B**

Explanation:

The Chrome Insights Report in the Google Admin console provides visibility into the managed Chrome browser environment. Key report types available here include "Browsers pending updates" to identify devices needing patching, "Browsers without activity in the past 28 days" to understand browser usage, and

"Browsers that have been recently enrolled" for monitoring onboarding. The other options list reports that are either not specific to Chrome Insights or related to device hardware rather than browser status.

**NEW QUESTION # 32**

How often do extensions update"?

- A. When Chrome is not running, the update occurs within the first few minutes of OS loading and then again every few hours when a new version is available in the Chrome Web Store, even when Chrome is not running
- B. When Chrome is running, the update occurs within the first few minutes of launching Chrome and then again every few hours Updates occur when users sign into the Chrome Web Store
- C. Extensions update immediately whenever the developer publishes a new version to the Chrome Web Store, regardless of whether Chrome is running
- D. Extensions only update when the user manually initiates the update process from the Chrome Web Store's extension management page

**Answer: B**

Explanation:

Chrome checks for extension updates periodically when the browser is running. This check typically happens within the first few minutes of launching Chrome and then again every few hours. While updates are triggered by developers publishing to the Chrome Web Store, the actual update on the user's browser happens when Chrome is active and performs these periodic checks. Option A is incorrect as extensions generally don't update when Chrome is not running. Option C describes a manual update process, which is not the default behavior. Option D is incorrect because the update on the user's end is dependent on Chrome being active and checking for updates.

**NEW QUESTION # 33**

An IT administrator manages a large organization that uses Chrome browser across multiple platforms including Windows, macOS, and Linux. The organization has diverse user needs and varying levels of risk associated with different departments, for which the administrator must determine the most efficient method to manage Chrome updates across the organization. Why is it advantageous to manage Chrome update policies using the Google Admin console instead of the Group Policy Management Console (GPMC)?

- A. The Google Admin console is only applicable to devices with ChromeOS, making it more secure
- B. Group Policy does not support platforms other than Windows
- C. The Google Admin console does not allow administrators to view the browser version of any given managed device as Group Policy does
- D. Group Policy does not support Chrome update policies

**Answer: B**

Explanation:

The key advantage of using the Google Admin console for managing Chrome updates in a multi-platform environment is its ability to apply policies consistently across Windows, macOS, and Linux devices. Group Policy (GPMC) is a Windows-specific tool and cannot natively manage Chrome updates on other operating systems. The Google Admin console provides a centralized and platform-agnostic approach to Chrome management.

**NEW QUESTION # 34**

.....

Real4exams is the best catalyst to help IT personage be successful. Many people who have passed some IT related certification exams used our Real4exams's training tool. Our Real4exams expert team use their experience for many people participating in Google certification Chrome-Enterprise-Administrator exam to develop the latest effective training tools, which includes Google Chrome-Enterprise-Administrator Certification simulation test, the current exam and answers. Our Real4exams's test questions and answers have 95% similarity with the real exam. With Real4exams's training tool your Google certification Chrome-Enterprise-Administrator exams can be easily passed.
