100% Pass Quiz 2026 C-TS470-2412: Pass-Sure SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Cost Effective Dumps

As you know, we are now facing very great competitive pressure. We need to have more strength to get what we want, and C-TS470-2412 exam dumps may give you these things. After you use our study materials, you can get C-TS470-2412 certification, which will better show your ability, among many competitors, you will be very prominent. The 99% pass rate is the proud result of our study materials. If you join, you will become one of the 99%. I believe that pass rate is also a big criterion for your choice of

products, because your ultimate goal is to obtain C-TS470-2412 Certification. In C-TS470-2412 exam dumps, you can do it.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q66-Q71):

NEW QUESTION # 66

When using a configurable service product in the service contract, which condition type is used to reflect the price of the selected configuration?

- A. 871 (Service Type (Abs.))
- **B. VA00 (Variant Price)**
- C. PSI1 (Price f. Srv. Cntr. Itm)
- D. VASE (Variant Price)

Answer: B

Explanation:

In SAP S/4HANA Cloud Private Edition, Service, a configurable service product in a service contract uses variant configuration to allow customization (e.g., selecting specific service options). The pricing for the selected configuration is reflected using the condition type VA00 (Variant Price) (Option B).

VA00 is a standard condition type in SAP's pricing framework that adjusts the base price based on the chosen configuration variants. It is linked to the variant configuration profile and updates the contract item price dynamically.

* VASE (A): This is not a standard SAP condition type; it seems to be a typo or misinterpretation.

* 871 (C): This is not a recognized condition type for configurable products in service contracts.

* PSI1 (D): This might relate to service contract items but is not specific to configurable product pricing.

"The condition type VA00 (Variant Price) is used in service contracts with configurable products to reflect the price adjustments based on the selected configuration."

NEW QUESTION # 67

In a service confirmation, what is the actual duration used for? Note: There are 3 correct answers to this question.

- A. Updating the technician's capacity
- **B. Creation of a CATS entry**
- **C. Calculation of internal costs**
- D. Calculation of the customer price
- **E. Capturing the technician's working time**

Answer: B,C,E

Explanation:

The actual duration in a service confirmation (e.g., IW41) records time spent on a task. The correct answers are A, C, D.

* Capturing the technician's working time (A): Actual duration (e.g., 5 hours) logs the technician's effort.

* Creation of a CATS entry (C): Transfers time to CATS for payroll/HR integration.

* Calculation of internal costs (D): Multiplies duration by rate (e.g., \$50/hour) for cost posting.

Why Not the Others?

* B: Capacity updates are planning-based, not from confirmations.

* E: Customer price uses billing rates, not just duration.

"Actual duration in a service confirmation captures working time, creates CATS entries, and calculates internal costs."

NEW QUESTION # 68

What are examples of customizing activities required for an in-house repair process? Note: There are 3 correct answers to this question.

- **A. Define Number Ranges**
- **B. Enable Item-Based Accounting for Service Management**
- C. Define Partner Determination Procedure
- **D. Define Basic Settings for Transactions**
- E. Define Derivation of Attendance Type, Activity Type, and Cost Element

Answer: A,B,D

Explanation:

The in-house repair process (scope item 3XK) in SAP S/4HANA Cloud Private Edition requires specific customizing activities to set up the system:

- * Enable Item-Based Accounting for Service Management: This is critical for in-house repair to activate item-level cost and revenue tracking, ensuring accurate financial postings for repair orders.
- * Define Basic Settings for Transactions: This includes configuring transaction types (e.g., REPA for repair orders) and item categories, which are foundational for processing in-house repairs.
- * Define Number Ranges: Number ranges must be defined for repair orders and related documents to ensure unique identification and proper document flow.
- * Define Derivation of Attendance Type, Activity Type, and Cost Element: This is more relevant to time recording or project accounting, not a core requirement for in-house repair.
- * Define Partner Determination Procedure: While useful, it's not mandatory for the basic in-house repair process setup. These activities are outlined in the SAP Best Practices for in-house repair configuration. "Customizing for in-house repair includes enabling item-based accounting, defining transaction settings, and setting up number ranges." (SAP Signavio Process Navigator, In-House Repair).

NEW QUESTION # 69

How are the inspection and maintenance operations determined, that must be performed regularly when you are using the scenario Service with Advanced Execution?

- **A. Using a maintenance task list**
- B. Using a service order template
- C. Always manually
- D. Using a bill of material

Answer: A

Explanation:

In Service with Advanced Execution, recurring inspection and maintenance operations are systematically planned. The correct answer is using a maintenance task list (A). Let's dive in.

Advanced Execution Scenario:

This scenario enhances service processes with detailed execution, often using maintenance orders mapped to service orders.

Why Maintenance Task List?

A maintenance task list (e.g., IA05) defines standard operations (e.g., "Inspect bearings," "Replace oil") for recurring activities. In a maintenance plan (e.g., strategy plan), the task list is assigned, and its operations are triggered based on scheduling (e.g., every 6 months). These operations are then executed via service /maintenance orders in the advanced execution framework, ensuring consistency and automation.

Why Not the Others?

- * Bill of material (B): BOMs list components, not operations.
- * Service order template (C): Templates structure orders, not recurring operations.
- * Manually (D): Advanced execution automates via task lists, not manual entry.

Example:

Task list "TL001" with operations "Check pressure" (6M) and "Replace filter" (12M) drives a strategy plan's calls.

"In Service with Advanced Execution, regular inspection and maintenance operations are determined using a maintenance task list."

NEW QUESTION # 70

Which of the following can you assign to a work center? Note: There are 2 correct answers to this question.

- A. Maintenance planning plant
- **B. Task list usage**
- **C. Capacity category**
- D. Planner group

Answer: B,C

Explanation:

Work centers in SAP S/4HANA Service (and Plant Maintenance) define execution locations and capacities:

- * Task list usage: Specifies which task lists (e.g., service or maintenance) the work center can use, assigned in the work center master data (transaction CR01).
- * Capacity category: Defines the type of capacity (e.g., labor, machine) available at the work center, critical for scheduling.
- * Planner group: Assigned to technical objects or orders, not directly to work centers.
- * Maintenance planning plant: A work center is assigned to a plant during creation, but the plant itself isn't assigned to the work center as a customizable attribute. These settings are configured in the work center master record. "Assign task list usage and capacity categories to a work center to define its operational scope." (SAP Help Portal, Work Center Master Data).

NEW QUESTION # 71

.....

We offer you C-TS470-2412 study guide with questions and answers, and you can practice it by concealing the answers, and when you have finished practicing, you can cancel the concealment, through the way like this, you can know the deficient knowledge for C-TS470-2412 exam dumps, so that you can put your attention to the disadvantages. In addition, we also have the free demo for C-TS470-2412 Study Guide for you to have a try in our website. These free demos will give you a reference of showing the mode of the complete version. If you want C-TS470-2412 exam dumps, just add them into your card.

C-TS470-2412 Detailed Study Plan: <https://www.crampdf.com/C-TS470-2412-exam-prep-dumps.html>

The Reliability and authority of C-TS470-2412 exam software on our CramPDF has been recognized by majority of our customers, which will be found when you download our free demo, If you have questions when installing or using our C-TS470-2412 practice engine, you can always contact our customer service staff via email or online consultation, The C-TS470-2412 dumps practice test software is easy to install and has a simple interface.

It uses Ant's `` element to execute `dx` as a system C-TS470-2412 command, and gives greater flexibility as to the options that can be passed to `dx` via nested `` elements.

At this point, you will see a message stating that the New C-TS470-2412 Test Syllabus transaction is subject to Xbox Live terms of use and any additional terms, The Reliability and authority of C-TS470-2412 Exam software on our CramPDF has been recognized by majority of our customers, which will be found when you download our free demo.

Pass Guaranteed Quiz The Best SAP - C-TS470-2412 - SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Cost Effective Dumps

If you have questions when installing or using our C-TS470-2412 practice engine, you can always contact our customer service staff via email or online consultation.

The C-TS470-2412 dumps practice test software is easy to install and has a simple interface, Testing Mode and Practice Mode. We Respect Privacy Policy Exam Score History.

The results of your test will C-TS470-2412 Detailed Study Plan be analyzed and a statistics will be presented to you.
