Why we can give you a promise that we will fully refund the money you purchased our software if you fail 1Z0-1055-25 Exam with our dump? Because we believe that our products can make you success. As the 1Z0-1055-25 exam continues to update, our software will be always updating with it.

### Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q53-Q58):

#### NEW QUESTION # 53

##### SIMULATION

##### MANAGE POLICIES BY EXPENSE CATEGORY

Create an Expense Policy for meals that raises a warning, if the expense exceeds the prescribed limit, without blocking the expense processing. Your expense policy should be ready to be associated with an expense type within an expense report template.

#### Answer:

##### Explanation:

See the Explanation for Step by Step Solution

##### Explanation:

Step-by-Step Solution: Configuring an Expense Policy in Oracle Financials Cloud To configure this expense policy in Oracle Financials Cloud, follow these steps:

Step 1: Access the Expense Policies Setup Page

Log in to Oracle Financials Cloud with the appropriate Expense Manager or Financial Administrator role.

Navigate to Setup and Maintenance.

Select the Task: Manage Policies by Expense Category.

Step 2: Create or Locate the Meal Expense Category

Search for the Meals expense category.

If the Meals category does not exist:

Click Create Expense Category.

Category Name: "Meals".

Category Type: "Meals and Entertainment".

Save the entry.

Step 3: Define a Policy Rule for Raising a Warning

Select the Meals Expense Category and click Edit.

Navigate to the Policies and Limits tab.

Under Amount Limits, click Add New Rule.

Configure the Expense Policy Rule:

Description: "Meal Expense Warning Policy".

Limit Type: "Warning Only".

Limit Amount: Enter the prescribed limit (e.g., 50 USD).

Per: Select Day (or another relevant time frame).

Applies To: Select All Employees.

Location-Based Rules: Leave blank if not location-specific.

Set Warning Behavior:

Select Raise a Warning if the expense exceeds the prescribed limit.

Ensure the policy does not block submission or approval.

Click Save and Close.

Step 4: Associate the Policy with an Expense Report Template

Navigate to Setup and Maintenance > Manage Expense Report Templates.

Search for the Expense Report Template where the Meals category should be included.

Click Edit and go to the Expense Types section.

Add the Meals Expense Type and associate it with the newly created Meals Expense Warning Policy.

Click Save and Close.

Step 5: Enable and Validate the Policy

Ensure the policy is marked as Active.

Click Submit to finalize the policy configuration.

Run the Validate and Deploy Expense Policies process.

Step 6: Testing the Policy

Simulate an Expense Report Submission:

Create a new expense report and select Meals as the expense type.

Enter an expense amount exceeding the limit (e.g., 55 USD).

Verify that a warning message appears, but the expense is still allowed to proceed.

Submit an expense below the limit (e.g., 45 USD) and ensure no warning appears.

Expected Outcome:

If the meal expense exceeds the limit, the system raises a warning but does not block the expense submission.

If the meal expense is within the limit, the system processes it without warnings.

The policy is successfully associated with an expense type in an expense report template.

Conclusion

By following these steps, you successfully configure an expense policy that raises a warning for meals exceeding a specified limit without blocking submission or processing. This ensures that employees are notified about policy violations while allowing flexibility in expense approvals.

#### NEW QUESTION # 54

An installment for \$2,000 USD is due for payment on July 31, 2022. The installment has two discounts: the first discount date is June 15, 2022 for \$150 USD and the second discount date is June 30, 2022 for \$50 USD.

You submit a Payment Process Request with the following criteria:

Payment Date = June 20, 2022

Pay Through Date = July 30, 2022

Date Basis = Due Date

What will be the resulting status of the installment and discount?

- A. The installment is not selected because the discount dates are before the Pay Through Date.
- B. The installment is selected and no discount is applied.
- C. The installment is selected and a discount of \$150 USD is applied.
- **D. The installment is not selected because the due date is after the Pay Through Date.**
- E. The installment is selected and a discount of \$50 USD is applied.

**Answer: D**

#### NEW QUESTION # 55

You have recently enabled the keyword audit feature for expenses to help automate the detection of potential policy violations or fraudulent activity within expense reports. After the feature is enabled all expense reports containing keywords in certain fields are selected for audit.

Which two Expense Item fields are included in this feature?

- A. Location
- B. Itemization Type
- **C. Merchant Name**
- D. Expense Type
- **E. Description**

**Answer: C,E**

#### NEW QUESTION # 56

Your organization has decided to create employee expense items by leveraging the digital assistant feature and sending expense receipts via email.

Which is the next processing step after an email with an expense receipt is received in the expenses application?

- A. The application extracts the receipt details and creates expense items
- B. The Application automatically matched receipts to corporate card charges
- C. The application assigns an expense type based on category

- D. The application sends the expenses team receipt notification
- E. The application verifies the sender's email address and compares it with the employee's email addressed in HCM

**Answer: E**

#### NEW QUESTION # 57

An installment meets all the selection criteria of a Payment Process Request, but it still does not get selected for payment processing. What are the two reasons for this?

- A. The invoice requires approval.
- B. The pay-through date is in a closed Payables period.
- C. The invoice needs re-validation.
- D. The pay-through date is in a future period.
- E. The invoice has not been accounted.

**Answer: A,C**

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, even when an installment meets the selection criteria of a Payment Process Request (PPR), certain conditions can prevent it from being selected for payment processing. Understanding these conditions is crucial for troubleshooting and ensuring a smooth payment workflow.

Analysis of Each Option:

A . The pay-through date is in a future period.

The pay-through date in a PPR determines the latest due date of invoices to be included for payment. Setting this date in the future is a common practice to include all invoices due up to that date. Therefore, having a pay-through date in a future period would not prevent installments from being selected; instead, it broadens the selection criteria. This is not a reason for an installment not being selected.

B . The pay-through date is in a closed Payables period.

The pay-through date affects which invoices are selected based on their due dates, but it does not directly relate to the status of accounting periods. While processing payments in a closed period is not allowed, the pay-through date itself being in a closed period does not prevent installment selection. Therefore, this is not a valid reason for an installment not being selected.

C . The invoice needs re-validation.

Invoices that have undergone changes affecting their payment attributes may require re-validation. If an invoice is in a status indicating it needs re-validation, it will not be selected for payment processing until the validation process is successfully completed.

This ensures that all invoice data is accurate and meets the necessary criteria for payment. According to Oracle documentation, an installment might not get selected if "The invoice must be revalidated." docs.oracle.com

D . The invoice requires approval.

Invoices often need to go through an approval workflow to ensure their legitimacy and accuracy. If an invoice has not received the necessary approvals, it remains in a pending status and is excluded from payment processing. Ensuring that all invoices are approved is essential for them to be selected in a PPR. The Oracle documentation states that an installment might not get selected if "The invoice requires approval." docs.oracle.com

E . The invoice has not been accounted.

While accounting is a critical aspect of financial management, the accounting status of an invoice does not typically prevent it from being selected for payment. Invoices can be selected and paid even if they have not yet been accounted, with accounting entries being created subsequently. Therefore, the lack of accounting is not a reason for an installment not being selected in a PPR.

Conclusion:

The two primary reasons an installment, despite meeting selection criteria, might not be selected for payment processing are:

C . The invoice needs re-validation.

D . The invoice requires approval.

Ensuring that all invoices are validated and approved is essential for their inclusion in payment processing.
