100% 合格率最新C_BW4H_2505考證以及資格考試領先提供平臺和優質的 C_BW4H_2505: SAP Certified Associate - Data Engineer - SAP BW/4HANA

NewDumps有專業的IT人員針對 SAP C_BW4H_2505 認證考試的考試練習題和答案做研究，他們能為你考試提供很有效的培訓工具和線上服務。如果你想購買NewDumps的產品，NewDumps會為你提供最新最好品質的，很詳細的培訓材料以及很準確的考試練習題和答案來為你參加SAP C_BW4H_2505認證考試做好充分的準備。放心用我們NewDumps產品提供的試題，選擇了NewDumps考試是可以100%能通過的。

最新的 SAP Certified Associate C_BW4H_2505 免費考試真題 (Q81-Q86):

問題 #81

Which external hierarchy properties can be changed in the query definition? Note: There are 3 correct answers to this question.

- A. Time dependency
- B. Position of child nodes
- C. Exp to level
- D. Display text nodes
- E. Sort direction

答案: B,C,E

問題 #82

How does integrating SAP Databricks within SAP Business Data Cloud reduce IT overhead for customers?

- A. By eliminating the need for rebuilding data structures and business logic externally
- B. By automating data ingestion pipelines
- C. By streamlining data governance processes and minimizing the need for complex data security configurations
- D. By providing pre-built connectors to various data sources

答案: A,B

問題 #83

You create a report with SAP Crystal Reports for Enterprise and need an analysis view as a data source. Which tool can you use to create this analysis view?

- A. SAP BusinessObjects Web Intelligence
- B. SAP Analysis for Microsoft Office
- C. SAP Lumira, designer edition
- D. SAP Crystal Reports for Enterprise

答案: B

問題 #84

Which SAP BW/4HANA objects support the feature of generating an external SAP HANA View? Note: There are 2 correct answers to this question.

- A. Semantic group object
- B. BW query
- C. Open ODS view
- D. Composite Provider

答案: B,C

解題說明:

In SAP BW/4HANA, certain objects support the generation of external SAP HANA views, enabling seamless integration with SAP HANA's in-memory capabilities and allowing consumption by other tools or applications outside of SAP BW/4HANA. Below is an explanation of the correct answers:

A). BW query A BW query in SAP BW/4HANA can generate an external SAP HANA view. This feature allows the query to be exposed as a calculation view in SAP HANA, making it accessible for reporting tools like SAP Analytics Cloud (SAC), SAP BusinessObjects, or custom applications. By generating an external HANA view, the BW query leverages SAP HANA's performance optimization while maintaining the analytical capabilities of SAP BW/4HANA.

* SAP BW/4HANA Query Designer includes functionality to expose queries as external HANA views. This is documented in the SAP BW/4HANA Query Design Guide and is part of the broader integration between SAP BW/4HANA and SAP HANA.

B). Open ODS view Open ODS views are designed to provide direct access to data stored in SAP HANA tables or other sources. They inherently support the generation of external SAP HANA views, as they are tightly integrated with SAP HANA's modeling capabilities. Open ODS views act as a bridge between SAP BW/4HANA and SAP HANA, allowing data to be consumed directly by external tools or applications via HANA views.

Reference: The Open ODS view functionality is a core feature of SAP BW/4HANA, as described in the SAP BW/4HANA Modeling Guide. It is specifically designed to leverage SAP HANA's native capabilities, including the generation of external views.

Incorrect Options C. Composite Provider Composite Providers in SAP BW/4HANA combine data from multiple sources (e.g., InfoProviders, Open ODS views, or HANA tables) into a unified structure for reporting. However, Composite Providers do not directly support the generation of external SAP HANA views. While they can be used within SAP BW/4HANA for reporting purposes, their architecture does not include the ability to expose themselves as HANA views.

Reference: The SAP BW/4HANA Modeling Guide explicitly states that Composite Providers are internal to SAP BW/4HANA and do not generate external HANA views.

D). Semantic group object Semantic group objects are used to organize and manage metadata in SAP BW/4HANA. They do not represent physical data structures or support the generation of external SAP HANA views. Instead, they serve as logical containers for grouping related objects, such as InfoObjects or queries, for easier navigation and maintenance.

Reference: The SAP BW/4HANA Administration Guide describes semantic groups as organizational tools rather than data modeling or integration components.

Conclusion The two SAP BW/4HANA objects that support the feature of generating an external SAP HANA view are:

BW query

Open ODS view

These objects enable seamless integration with SAP HANA's in-memory database and allow external tools to consume data modeled in SAP BW/4HANA. This capability underscores the tight integration between SAP BW/4HANA and SAP HANA, leveraging the strengths of both platforms for advanced analytics and reporting.

問題 #85

You are allowed to run a BW query, but the data selection is only partially covered by your authorizations. What happens related to the BW query in this scenario?

- A. The BW query starts and shows an error message.
- B. The BW query starts and the unauthorized values are 0.
- C. The BW query does not start running.
- **D. The BW query starts and only the authorized data is displayed.**

答案： D

問題 #86
