Meanwhile, our NIS-2-Directive-Lead-Implementer Exam Materials are demonstrably high effective to help you get the essence of the knowledge which was convoluted. You will get more than you can imagine by our NIS-2-Directive-Lead-Implementer learning guide.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q29-Q34):

NEW QUESTION # 29

Which statement regarding the EU-CyCLONe is correct?

- A. It serves as a bridge between technical and political levels during large-scale incidents and crises
- B. It serves as a bridge operational and technical levels during large-scale incidents and crises
- C. It serves as a bridge between operational and political levels during large-scale incidents and crises

Answer: A

NEW QUESTION # 30

Scenario 8: FoodSafe Corporation is a well-known food manufacturing company in Vienna, Austria, which specializes in producing diverse products, from savory snacks to artisanal desserts. As the company operates in regulatory environment subject to this NIS 2 Directive, FoodSafe Corporation has employed a variety of techniques for cybersecurity testing to safeguard the integrity and security of its food production processes.

To conduct an effective vulnerability assessment process, FoodSafe Corporation utilizes a vulnerability assessment tool to discover vulnerabilities on network hosts such as servers and workstations. Additionally, FoodSafe Corporation has made a deliberate effort to define clear testing objectives and obtain top management approval during the discovery phase. This structured approach ensures that vulnerability assessments are conducted with clear objectives and that the management team is actively engaged and supports the assessment process, reinforcing the company's commitment to cybersecurity excellence.

In alignment with the NIS 2 Directive, FoodSafe Corporation has incorporated audits into its core activities, starting with an internal assessment followed by an additional audit conducted by its partners. To ensure the effectiveness of these audits, the company meticulously identified operational sectors, procedures, and policies. However, FoodSafe Corporation did not utilize an organized audit timetable as part of its internal compliance audit process. While FoodSafe's Corporation organizational chart does not clearly indicate the audit team's position, the internal audit process is well-structured. Auditors familiarize themselves with established policies and procedures to gain a comprehensive understanding of their workflow. They engage in discussions with employees further to enhance their insights, ensuring no critical details are overlooked.

Subsequently, FoodSafe Corporation's auditors generate a comprehensive report of findings, serving as the foundation for necessary changes and improvements within the company. Auditors also follow up on action plans in response to nonconformities and improvement opportunities.

The company recently expanded its offerings by adding new products and services, which had an impact on its cybersecurity

program. This required the cybersecurity team to adapt and ensure that these additions were integrated securely into their existing framework. FoodSafe Corporation commitment to enhancing its monitoring and measurement processes to ensure product quality and operational efficiency. In doing so, the company carefully considers its target audience and selects suitable methods for reporting monitoring and measurement results. This includes incorporating additional graphical elements and labeling of endpoints in their reports to provide a clearer and more intuitive representation of data, ultimately facilitating better decision-making within the organization.

Which change factors impacted FoodSafe's Corporation cybersecurity program? Refer to scenario 8.

- A. Changes in technologies
- B. External changes
- C. Organizational changes

Answer: C

NEW QUESTION # 31

Which type of vulnerability assessment scans is primarily focused on evaluating websites and mobile applications of known software vulnerabilities and incorrect configurations?

- A. Application scans
- B. Web-based scans
- C. Network-based scans

Answer: A

NEW QUESTION # 32

According to recital 59 of the NIS 2 Directive, who is responsible for ensuring alignment with international standards and existing industry best practices for cybersecurity risk management?

- A. The Commission, ENISA, and Member States
- B. The organizations affected by the Directive
- C. The European Parliament and European Council

Answer: A

NEW QUESTION # 33

What does integration testing involve?

- A. Testing and analyzing the functionality of each individual module in isolation
- B. Both A and B, depending on the objectives of the organization
- C. Testing combination of modules as a group to analyze their interactions and functionality

Answer: C

NEW QUESTION # 34

.....
