Answer: C

NEW QUESTION # 15

What is the function of WalkMe in the toolchain?

- A. Supporting interface testing

- B. Automating data backup
- **C. Providing user guidance and enablement**
- D. Supporting test automation

Answer: C

Explanation:

WalkMe is an end-user enablement tool integrated into SAP transformation programs to ensure smooth adoption and reduce user learning challenges. It provides interactive guidance, on-screen instructions, and automated walkthroughs directly within the SAP application interface. This allows users to follow step-by-step workflows while performing tasks in real time, significantly improving their ability to adapt to new processes and system changes introduced during transformation.

During deployments, WalkMe accelerates onboarding by reducing training time and minimizing errors. It also supports change management by ensuring that process updates or new functionalities are clearly communicated. Instead of relying on static documentation, users receive dynamic, context-aware guidance.

WalkMe does not perform test automation (A) or interface testing (B), which are functions handled by other tools such as Tricentis. It also does not manage data backups (C). Its purpose within the RISE with SAP and Activate methodologies is to provide in-application guidance, digital adoption support, and user empowerment, ensuring that business users can navigate redesigned processes confidently and efficiently.

NEW QUESTION # 16
