

Reliable 3V0-32.23 Test Cram | 3V0-32.23 Valid Dumps Book

VMware 3V0-32.23 Certification Details	
Exam Code	3V0-32.23
Full Exam Name	VMware Cloud Management and Automation Advanced Design
No. of Questions	60
Online Practice Exam	VMware Certified Advanced Professional - Cloud Management and Automation Design 2023 (VCAP-CMA Design 2023) Practice Test
Sample Questions	VMware 3V0-32.23 Sample Questions
Passing Score	300 / 500
Time Limit	145 minutes
Exam Fees	\$450 USD
Become successful with VMEexam.com	

P.S. Free & New 3V0-32.23 dumps are available on Google Drive shared by PDFVCE: <https://drive.google.com/open?id=1L7ruljDEtYHlxcSBqFgVM3ofOhxhu-kg>

Many don't find real Cloud Management and Automation Advanced Design exam questions and face loss of money and time. PDFVCE made an absolute gem of study material which carries actual Cloud Management and Automation Advanced Design (3V0-32.23) Exam Questions for the students so that they don't get confused in order to prepare for Cloud Management and Automation Advanced Design (3V0-32.23) exam and pass it with a good score. The 3V0-32.23 practice test questions are made by examination after consulting with a lot of professionals and receiving positive feedback from them.

It is easy for you to pass the exam because you only need 20-30 hours to learn and prepare for the exam. You may worry there is little time for you to learn the 3V0-32.23 Study Tool and prepare the exam because you have spent your main time and energy on your most important thing such as the job and the learning and can't spare too much time to learn. But if you buy our Cloud Management and Automation Advanced Design test torrent you only need 1-2 hours to learn and prepare the exam and focus your main attention on your most important thing.

The users of 3V0-32.23 exam dumps cover a wide range of fields, including professionals, students, and students of less advanced culture. This is because the language format of our study materials is easy to understand. No matter what information you choose to study, you don't have to worry about being a beginner and not reading data. 3V0-32.23 test questions are prepared by many experts. The content is very rich, and there are many levels. Whatever you want to choose, you want to learn from which stage. In our study materials, you can find the right one for you. At the same time, the 3V0-32.23 Exam Prep is constantly updated. After you have finished learning a part, you can choose a new method according to your own situation. Our study materials are so easy to understand that no matter who you are, you can find what you want here.

To earn the VMware 3V0-32.23 Certification, you must have experience designing and implementing cloud solutions using VMware products and technologies. This includes a deep understanding of VMware vSphere, vRealize Suite, and NSX. You should also have a solid understanding of cloud computing concepts, such as software-defined networking, virtualization, and automation.

VMware Cloud Management and Automation Advanced Design Sample Questions (Q173-Q178):

NEW QUESTION # 173

The Service Owner of a vRealize Automation solution has requested that public cloud use is restricted to hosting workloads only. The configured cloud zones for all projects will be stated as follows:

- vSphere
- AWS
- Azure

Which FaaS provider should the architect recommend for generic extensibility actions to meet the Service Owner's requirement?

- A. Microsoft Azure
- B. Auto Select
- **C. On-Prem**
- D. Amazon Web Services

Answer: C

NEW QUESTION # 174

A company is planning a logical design for a VMware Aria Automation project. The company has the following requirements.

The company wants to provision virtual machines using intelligent workload placement.

The company wants to use the least administrative effort in their tagging strategy.

The company wants to integrate VMware Aria Automation and VMware Aria Operations.

Developers plan to code locally and centralize template version control.

Which design decision would achieve the requirements?

- A. Create user defined tags, use default placement policy, add integration using external repository for importing templates and Sync
- B. Create user defined tags, configure binback placement policy, add integration using internal repository for importing templates and Sync
- **C. Use pre-created vCenter tags, configure advanced placement policy, use discovered tags, create a token and add integration using external repository for templates and Sync**
- D. Use pre-created vCenter tags, configure spread placement policy, use user defined tags, create a token and add integration using external repository for templates and Sync

Answer: C

Explanation:

Pre-created vCenter tags and discovered tags minimize administrative effort. Advanced placement policy enables intelligent workload placement. Integration with an external repository and sync supports developer workflows for centralized template version control.

NEW QUESTION # 175

When designing a mixed Cloud Management environment (on-prem and SaaS), which two combinations of products are supported? (Choose two.)

- A. VMware Aria Automation on-prem and VMware Aria Operations on-prem
- B. VMware Aria Operations on-prem and VMware Aria Operations for Loqs SaaS
- **C. VMware Aria Automation SaaS and VMware Aria Operations SaaS**
- D. VMware Aria Automation SaaS and VMware Aria Operations on-prem
- **E. VMware Aria Automation on-prem and VMware Aria Operations SaaS**

Answer: C,E

Explanation:

These combinations are supported for hybrid (mixed on-prem and SaaS) cloud management environments, providing flexibility in deployment models while maintaining integration and management capabilities.

NEW QUESTION # 176

After an organization completed an audit of their vSphere environment, they found that virtual machine deployments weren't consistent. They weren't using appropriate vSphere tags, resulting in confusion around who owned what virtual machines. Going forward Aria Automation has been chosen to bring consistency to their deployments and day two management. The organization wants to make sure the resources of each department are tagged appropriately.

Which two options will meet the technical requirements? (Choose two.)

- **A. Create a project for each department**
- B. Set capability tags in cloud zone

- C. Set resource tags in every project
- D. Create a single project for all departments
- E. Apply tags manually after deployment

Answer: A,C

Explanation:

Creating a project for each department and defining resource tags in each project ensures resources are automatically and consistently tagged per department during deployment, meeting the organization's requirements for ownership and consistency.

NEW QUESTION # 177

Which of the following statements accurately describe the design principles behind VMware Validated Solutions (VVS) and VMware Cloud Foundation? (Select all that apply)

- A. Discourage the use of third-party hardware and software.
- B. Simplify management through a consistent and unified platform.
- C. Embrace a one-size-fits-all approach for all types of workloads.
- D. Ensure interoperability and seamless integration between components.
- E. Focus exclusively on on-premises deployment models.

Answer: B,D

NEW QUESTION # 178

.....

As the labor market becomes more competitive, a lot of people, of course including students, company employees, etc., and all want to get VMware authentication in a very short time, this has developed into an inevitable trend. Each of them is eager to have a strong proof to highlight their abilities, so they have the opportunity to change their current status, including getting a better job, have higher pay, and get a higher quality of material, etc. It is not easy to qualify for a qualifying exam in such a short period of time. Our company's 3V0-32.23 Study Guide is very good at helping customers pass the exam and obtain a certificate in a short time, and now I'm going to show you our 3V0-32.23 exam dumps. Our products mainly include the following major features.
