Topic 9	<ul style="list-style-type: none"> <li>Internal processing (Physical Inventory, Replenishment): This topic involves defining physical inventory processes and setting up and executing replenishment.</li> </ul>

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q45-Q50):

### NEW QUESTION # 45

Which assignment do you make to create external process steps in process-oriented storage control?

- A. External process step to a storage process
- B. External process step to a warehouse process type
- C. External process step to an internal process step
- D. External process step to a warehouse storage type

**Answer: A**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Process-oriented storage control (POSC) in SAP EWM manages complex processes with internal and external steps (e.g., deconsolidation, VAS). Option B ("External process step to a storage process") is correct because external steps (e.g., quality check) are assigned to a storage process in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Process-Oriented Storage Control > Define Storage Process, linking them to the overall flow. Options A, C, and D are incorrect as they don't align with POSC configuration logic.

### NEW QUESTION # 46

What can be used to specify the storage process? Note: There are 2 correct answers to this question.

- A. Warehouse storage type
- B. Warehouse process type
- C. Activity area
- D. Warehouse order creation rule

**Answer: A,B**

Explanation:

#### Comprehensive and Detailed In-Depth Explanation:

The storage process in SAP EWM defines how goods are stored. Option A ("Warehouse process type") is correct as it specifies the process (e.g., putaway), configured in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Warehouse Task > Define Warehouse Process Type. Option C ("Warehouse storage type") is correct because it defines the storage location type (e.g., bulk, high rack), set in SPRO: SCM Extended Warehouse Management > Master Data > Storage Types. Option B (WOCR) groups tasks, and option D (activity area) organizes bins, neither directly specifying the storage process.

#### NEW QUESTION # 47

What can a warehouse order include? Note: There are 2 correct answers to this question.

- A. Physical inventory items
- B. Warehouse requests
- C. Warehouse tasks
- D. Wave items

#### Answer: A,B

Explanation:

Warehouse Orders

- \* A Warehouse order groups operations to be performed in the warehouse, such as putaway or picking. It can include:
  - \* Warehouse Requests (A): These are requests for inbound, outbound, or internal operations.
  - \* Physical Inventory Items (B): Items flagged for counting during physical inventory processes.

Excluded Options

- \* Warehouse Tasks (C): Tasks are detailed operations but are not directly part of a warehouse order.
- \* Wave Items (D): Wave items are part of planning waves, not directly included in orders.

SAP S/4HANA Cloud Private Edition Reference

\* Refer to Warehouse Order Management and Structure in SAP EWM Help documentation for comprehensive details.

#### NEW QUESTION # 48

Your customer wants to use batch management in SAP Extended Warehouse Management (SAP EWM).

When do you have to create a batch during the inbound process?

- A. Before the inbound delivery is distributed from SAP ERP to SAP EWM
- B. Before the goods receipt is posted in SAP EWM
- C. Before the inbound delivery is created in SAP ERP
- D. Before the inbound delivery is created in SAP EWM

#### Answer: C

Explanation:

Batch Creation Timing in Inbound Process

- \* When using batch management in SAP EWM, the batch must be created in SAP ERP before creating the inbound delivery. This ensures the batch information is transferred seamlessly during integration.

Excluded Options

- \* A (Before goods receipt): Batch creation before goods receipt in SAP EWM is too late in the process.
- \* B (Before inbound delivery in SAP EWM): Inbound delivery in SAP EWM depends on ERP data.
- \* D (Before distribution to EWM): Batch creation must occur before document creation in ERP.

SAP S/4HANA Cloud Private Edition Reference

\* Refer to Batch Management in SAP EWM Integration Guide for details on batch creation.

#### NEW QUESTION # 49

Which of the following are product warehouse tasks during putaway with process-oriented storage control?

- A. The final process step
- B. The first process step
- C. The first and final process step
- D. All process steps

**Answer: B**

## NEW QUESTION # 50

Our online staff is professionally trained and they have great knowledge on the C\_S4EWM\_2023 study guide. So they can clearly understand your requirements and ideas and then help you make the right choices. When you have purchased our C\_S4EWM\_2023 exam practice, but you do not know how to install it, we can also provide remote guidance to help you complete the installation. All in all, we will always be there to help you until you pass the C\_S4EWM\_2023 Exam and get a certificate.
