

Test 300-715 Dates - Pass Guaranteed First-grade 300-715 - Test Implementing and Configuring Cisco Identity Services Engine Guide

P.S. Free & New 300-715 dumps are available on Google Drive shared by Braindumpsqa: https://drive.google.com/open?id=1sQB_QNLj6KQiPG-ZUC9Ldigc-74nUqyy

When you first contacted us with 300-715 quiz torrent, you may be confused about our 300-715 exam question and would like to learn more about our products to confirm our claims. We have a trial version for you to experience. If you encounter any questions about our 300-715 Learning Materials during use, you can contact our staff and we will be happy to serve for you. As for any of your suggestions, we will take it into consideration, and effectively improve our 300-715 exam question to better meet the needs of clients.

To pass the Cisco 300-715 exam, candidates must have a good understanding of network security concepts, protocols, and technologies. They must also be familiar with Cisco ISE functionality, including policy configuration, device administration, and identity management. 300-715 exam consists of multiple-choice questions and simulation-based scenarios that test the candidate's ability to apply their knowledge to real-world scenarios. Passing the Cisco 300-715 exam demonstrates to potential employers that an IT professional has the knowledge and skills necessary to secure and manage their organization's network infrastructure through the use of Cisco Identity Services Engine.

The Cisco 300-715 Exam covers a range of topics, including ISE architecture, installation and configuration, network access devices, identity management, endpoint compliance, and network access security. 300-715 exam is designed to test the candidate's knowledge and abilities in these areas, and it is recommended that candidates have practical experience working with ISE solutions before attempting the exam.

The Best 300-715 - Test Implementing and Configuring Cisco Identity Services Engine Dates

With the development of science and technology the internet in our daily life is playing a more and more important role! IT workers become high-salary people. Cisco certifications become hot vocational qualification certificate. Braindumpsqa offers the best 300-715 Guide Torrent files to help people clear exams and realize their idea better. We are engaged in this field more than 8 years. If you have dream in this field, our valid 300-715 guide torrent files will be a good chance for you.

Cisco 300-715 Exam covers a wide range of topics related to Cisco ISE implementation and configuration, including network access devices, user and device authentication, endpoint compliance, and policy enforcement. It also covers the latest Cisco ISE features and capabilities, such as integration with third-party products and technologies, threat protection, and advanced analytics and reporting.

Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q315-Q320):

NEW QUESTION # 315

Which media type must be used for zero-touch provisioning on a Cisco ISE hardware appliance?

- A. network
- **B. USB**
- C. CD/DVD
- D. virtual media

Answer: B

Explanation:

Cisco ISE hardware appliances support zero-touch provisioning using a USB drive that contains the required configuration file. This is the mandatory media type for ZTP on ISE physical appliances.

NEW QUESTION # 316

An engineer is configuring ISE for network device administration and has devices that support both protocols.

What are two benefits of choosing TACACS+ over RADIUS for these devices? (Choose two.)

- **A. TACACS+ provides the ability to authorize specific commands while RADIUS does not.**
- B. TACACS+ is FIPS compliant while RADIUS is not.
- C. TACACS+ is designed for network access control while RADIUS is designed for role-based access.
- D. TACACS+ uses secure EAP-TLS while RADIUS does not.
- **E. TACACS+ encrypts the entire payload being sent while RADIUS only encrypts the password.**

Answer: A,E

NEW QUESTION # 317

A network administrator must configure endpoints using an 802.1X authentication method with EAP identity certificates that are provided by the Cisco ISE. When the endpoint presents the identity certificate to Cisco ISE to validate the certificate, endpoints must be authorized to connect to the network. Which EAP type must be configured by the network administrator to complete this task?

- A. EAP-PEAP-MSCHAPv2
- **B. EAP-TLS**
- C. EAP-FAST
- D. EAP-TTLS

Answer: B

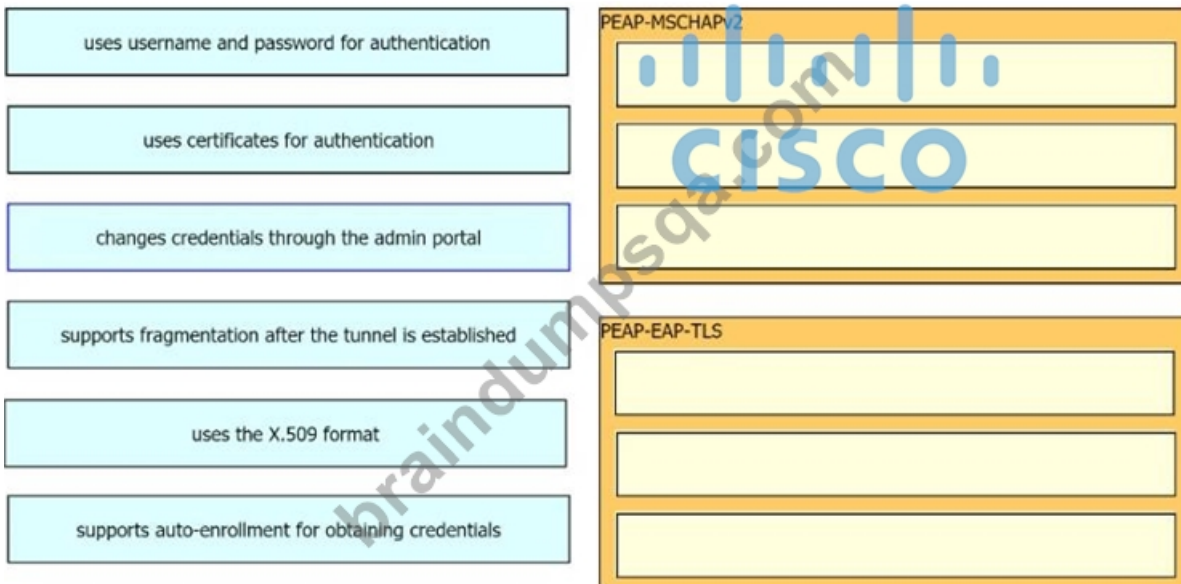

Explanation:

<https://www.cisco.com/c/en/us/support/docs/wireless-mobility/eap-fast/200322-Understanding-EAP-FAST-and-Chaining-imp.html>

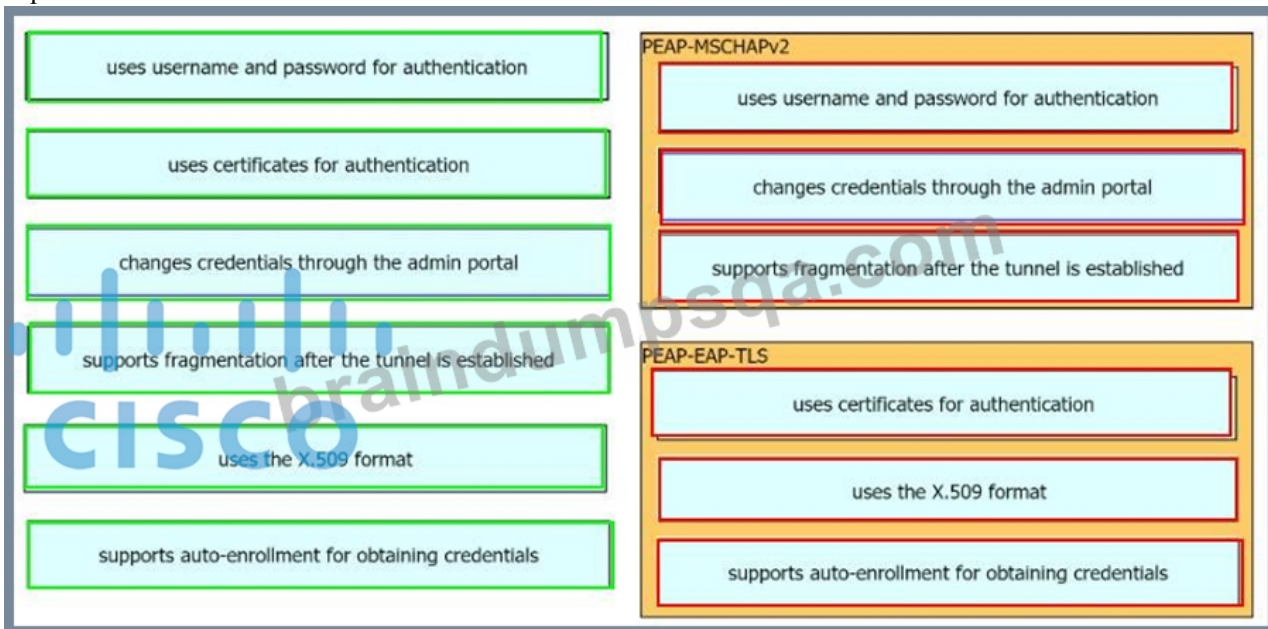

NEW QUESTION # 318

An organization wants to implement 802.1X and is debating whether to use PEAP-MSCHAPv2 or PEAP-EAP-TLS for authentication. Drag the characteristics on the left to the corresponding protocol on the right.

Answer:

Explanation:

NEW QUESTION # 319

What are two requirements of generating a single signing in Cisco ISE by using a certificate provisioning portal, without generating a certificate request? (Choose two)

- A. Location the CSV file for the device MAC
- B. Enter the IP address of the device
- C. Enter the common name
- D. Choose the hashing method
- E. Select the certificate template

Answer: C,E

Explanation:
