So we clearly understand our duty to offer help in this area. If you have any question, you can just contact our online service, they will give you the most professional advice on our CrowdStrike CCFH-202b Exam Guide.

CrowdStrike Certified Falcon Hunter Sample Questions (Q26-Q31):

NEW QUESTION # 26
Which of the following best describes the purpose of the Mac Sensor report?

- A. The Mac Sensor report provides a comprehensive view of activities occurring on Mac hosts, including items of interest that may be hunting or investigation leads
- B. The Mac Sensor report provides a detection focused view of known malicious activities occurring on Mac hosts, including machine-learning and indicator-based detections
- C. The Mac Sensor report displays a listing of all Mac hosts without a Falcon sensor installed
- D. The Mac Sensor report displays a listing of all Mac hosts with a Falcon sensor installed

Answer: A

Explanation:
This is the correct answer for the same reason as above. The Mac Sensor report provides a comprehensive view of activities occurring on Mac hosts, including items of interest that may be hunting or investigation leads. It does not display a listing of all Mac hosts with or without a Falcon sensor installed, nor does it provide a detection focused view of known malicious activities occurring on Mac hosts.

NEW QUESTION # 27
Which of the following is a suspicious process behavior?

- A. PowerShell launching a PowerShell script
- B. PowerShell running an execution policy of RemoteSigned
- C. Non-network processes (eg, notepad exe) making an outbound network connection
- D. An Internet browser (eg, Internet Explorer) performing multiple DNS requests

Answer: C

Explanation:
Non-network processes are processes that are not expected to communicate over the network, such as notepad.exe. If they make an outbound network connection, it could indicate that they are compromised or maliciously used by an adversary. PowerShell running an execution policy of RemoteSigned is a default setting that allows local scripts to run without digital signatures. An Internet browser performing multiple DNS requests is a normal behavior for web browsing. PowerShell launching a PowerShell script is also a common behavior for legitimate tasks.

NEW QUESTION # 28
Which of the following does the Hunting and Investigation Guide contain?

- A. A list of all event types and their syntax
- B. Example Event Search queries useful for Falcon platform configuration
- C. Example Event Search queries useful for threat hunting
- D. A list of all event types specifically used for hunting and their syntax

Answer: C

Explanation:
The Hunting and Investigation guide contains example Event Search queries useful for threat hunting. These queries are based on common threat hunting use cases and scenarios, such as finding suspicious processes, network connections, registry activity, etc. The guide also explains how to customize and modify the queries to suit different needs and environments. The guide does not contain a list of all event types and their syntax, as that information is provided in the Events Data Dictionary. The guide also does not contain example Event Search queries useful for Falcon platform configuration, as that is not the focus of the guide.

NEW QUESTION # 29
What is the main purpose of the Mac Sensor report?

- A. To provide a dashboard for Mac related detections
- B. To identify endpoints that are in Reduced Functionality Mode
- C. To provide vulnerability assessment for Mac Operating Systems
- D. To provide a summary view of selected activities on Mac hosts

Answer: D

Explanation:
The Mac Sensor report is a pre-defined report that provides a summary view of selected activities on Mac hosts. It shows information such as process execution events, network connection events, file write events, etc. that occurred on Mac hosts within a specified time range. The Mac Sensor report does not identify endpoints that are in Reduced Functionality Mode, provide vulnerability assessment for Mac Operating Systems, or provide a dashboard for Mac related detections.

NEW QUESTION # 30
What do you click to jump to a Process Timeline from many pages in Falcon, such as a Hash Search?

- A. Process ID or Parent Process ID
- B. Process Timeline Link
- C. CID
- D. PID

Answer: B

Explanation:
The Process Timeline Link is what you click to jump to a Process Timeline from many pages in Falcon, such as a Hash Search. The Process Timeline Link is an icon that looks like three horizontal bars with dots on them. It appears next to each process name or ID on various pages in Falcon, such as Hash Search results, Detection details, Event Search results, etc. Clicking on it will open a new tab with the Process Timeline for that process. The PID, the Process ID or Parent Process ID, and the CID are not what you click to jump to a Process Timeline.

NEW QUESTION # 31
.....

Constant learning is necessary in modern society. If you stop learning new things, you cannot keep up with the times. Our CCFH-202b study materials cover all newest knowledge for you to learn. In addition, our CCFH-202b learning braindumps just cost you less time and efforts. And we can claim that if you prapare with our CCFH-202b Exam Questions for 20 to 30 hours, then you are able to pass the exam easily. What are you looking for? Just rush to buy our CCFH-202b practice engine!

CCFH-202b Clearer Explanation: https://www.free4torrent.com/CCFH-202b-braindumps-torrent.html

Our company has introduced the most advanced operation system which works very fast and efficiently in order to guarantee the fast delivery speed for our customers since we understand that time is precious especially for those who are preparing for the exam, just like the old saying goes:" To save time is to lengthen life."
