Pdf UiPath-ABAAv1 Exam Dump, UiPath-ABAAv1 Practice Online

The experts in our company have been focusing on the UiPath-ABAAv1 examination for a long time and they never overlook any

new knowledge. The content of our UiPath-ABAAv1 study materials has always been kept up to date. Don't worry if any new information comes out after your purchase of our UiPath-ABAAv1 Practice Braindumps. We will inform you by E-mail when we have a new version and send it to you right away. So as long as you buy our UiPath-ABAAv1 learning guide, you can always have the latest exam questions and answers.

UiPath Automation Business Analyst Associate Exam (2023.10) Sample Questions (Q58-Q63):

NEW QUESTION # 58

What is the output of the Process Analysis stage?

- A. Project Charter
- **B. Process Definition Document (PDD)**
- C. Solution Design Document
- D. Hypercare Support Plan

Answer: B

Explanation:

The primary output of the Process Analysis stage is the Process Definition Document (PDD). This document captures a detailed description of the As-Is process, including process steps, roles involved, input/output data, exception scenarios, and system interactions.

The Business Analyst and Solution Architect work closely with the Client Team to observe the current process and document it in a structured and comprehensive format. The PDD serves as the foundation for defining the scope, identifying automation opportunities, and creating the future To-Be design.

A well-documented PDD ensures that the implementation team fully understands what is being automated and helps in developing accurate test cases for UAT and success criteria for deployment approval.

NEW QUESTION # 59

Which of the following teams is highly recommended to be involved early in the implementation process for technical management?

- A. Marketing Team
- B. UiPath Customer Support
- **C. Client IT Team**
- D. Human Resources Team

Answer: C

Explanation:

The Client IT Team is highly recommended to be involved early in the automation implementation process because they own the technical management of the department's software and infrastructure. Their involvement is critical for provisioning access, ensuring network security compliance, setting up environments, and integrating UiPath components (e.g., Orchestrator, Robots, and Studio) with existing systems.

Delays in engaging the Client IT Team can result in project bottlenecks, especially when access to applications or technical support is needed. They also play a crucial role in helping Infrastructure Engineers from the Implementation Team understand the client's IT policies and systems, enabling a smooth technical setup.

Involving them early ensures that infrastructure readiness, access provisioning, and system compatibility are not left to the last minute, reducing risks and enabling a seamless development and deployment experience.

NEW QUESTION # 60

In the Business Case and Technical Validation stage, what is the Automation Business Analyst responsible for?

- A. Performing coding reviews
- B. Finalizing Solution Design Document
- **C. Validating business case and cost-benefit analysis**
- D. Creating test cases for UAT

Answer: C

Explanation:

In the Business Case and Technical Validation stage, the Automation Business Analyst (ABA) plays a key role in validating the business case for the selected automation use cases. This includes assessing the cost-benefit ratio, projected ROI, and alignment with business goals.

The ABA evaluates how automating a process would affect productivity, cost savings, error reduction, and customer experience. They collaborate with stakeholders to collect business metrics, time savings, and resource utilization data that feed into a quantitative and qualitative justification for automation.

Their analysis helps in prioritizing automation candidates and ensures that only those with strong business value proceed to the next stages. Without this step, organizations risk automating processes that do not deliver measurable value, undermining the long-term success of their automation programs.

NEW QUESTION # 61

Which of the following best describes the Automation Business Analyst's role during the Process Analysis stage?

- A. Defines coding best practices
- **B. Analyzes the As-Is process and defines the To-Be process**
- C. Approves solution architecture
- D. Handles infrastructure provisioning

Answer: B

Explanation:

During the Process Analysis stage, the Automation Business Analyst is responsible for analyzing the current (As-Is) process and defining the future (To-Be) process to be automated. This includes mapping out each step, understanding business rules, identifying inefficiencies, and collaborating with stakeholders to envision how automation will change the process.

The Business Analyst also works closely with the Solution Architect to prepare the Process Definition Document (PDD) and ensures that the process is well-documented for the developers to understand and automate.

This role is essential for bridging the gap between business users and technical implementers, ensuring that the solution reflects the true needs of the business while being technically feasible.

NEW QUESTION # 62

Which of the following documents outlines how end-user testing will be conducted post-development?

- A. Kickoff Agenda
- B. Solution Design Document (SDD)
- **C. User Acceptance Testing (UAT) Plan**
- D. Project Readiness Checklist

Answer: C

Explanation:

The User Acceptance Testing (UAT) Plan is the document that outlines how end-user testing will be conducted after the automation is developed. This includes the scope of testing, test scenarios, responsibilities, success criteria, and timeline.

The plan is typically prepared by the Business Analyst and Project Manager in collaboration with the Client Team. It ensures that all necessary preparations are in place for a smooth UAT phase, including access, environment setup, and test data availability.

UAT is critical for validating that the developed automation meets the business needs and works as expected in a near-production environment. A well-documented UAT Plan reduces confusion, ensures accountability, and speeds up the testing and approval process.

NEW QUESTION # 63

.....

If you are ready for the UiPath-ABAAv1 exam for a long time, but lack of a set of suitable UiPath-ABAAv1 learning materials, I will tell you that you are so lucky to enter this page. We are such UiPath-ABAAv1 exam questions that you can use our products to prepare the exam and obtain your dreamed UiPath-ABAAv1 certificates. We all know that if you desire a better job post, you have to be equipped with appropriate professional quality and an attitude of keeping forging ahead. And we can give what you need!
