Pdf 1z0-1093-25 Dumps, Test 1z0-1093-25 Free
There are three versions of our 1z0-1093-25 study materials so that you can choose the right version for your exam preparation. The test engine is a way of exam simulation that makes you feels the atmosphere of 1z0-1093-25 Real Exam. It brings great convenience for most IT workers because it allows candidates to practice 1z0-1093-25 exam prep anytime and anywhere as long as you download the 1z0-1093-25 dumps pdf.

Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.

Topic 2	• Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.
Topic 3	• MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
Topic 4	• NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.
Topic 5	• Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.

2026 Oracle Pass-Sure 1z0-1093-25: Pdf Oracle Cloud Database Services 2025 Professional Dumps

To meet the needs of users, and to keep up with the trend of the examination outline, our products will provide customers with larest version of our products. Our company's experts are daily testing our 1z0-1093-25 learning materials for timely updates. So we solemnly promise the users, our products make every effort to provide our users with the latest learning materials. As long as the users choose to purchase our 1z0-1093-25 learning material, there is no doubt that he will enjoy the advantages of the most powerful update.

Oracle Cloud Database Services 2025 Professional Sample Questions (Q82-Q87):

NEW QUESTION # 82
When provisioning an Oracle Cloud Infrastructure (OCI) Base Database Service (BaseDB) on a virtual machine (VM), what is a primary factor that distinguishes it from using a Bare Metal database service?

- A. The ability to create multiple database homes on a single server.
- B. The underlying hardware is dedicated solely to your instance.
- C. The ability to choose your own hypervisor for virtualization.
- D. The database software binaries are always pre-installed.

Answer: B

Explanation:
Primary Distinction:
The primary difference betweenBaseDB on a VMandBare Metalis how the underlying hardware is allocated:
* BaseDB on VM:The infrastructure issharedamong multiple tenants, using virtualization to isolate instances.
* Bare Metal Database Service:The server'sphysical hardware is dedicatedexclusively to a single tenant, offeringmaximum performance and isolation.
* This exclusive access to hardware in Bare Metal allows forbetter performanceand control compared to VM-based instances.
Why the other options are incorrect:

* A:Binaries are not always pre-installed in both cases; it depends on the configuration.
* B:Oracle handles hypervisor configuration, not the user.
* D:Both VM and Bare Metal allow multiple database homes if configured properly.

NEW QUESTION # 83
Which two metrics are available for monitoring within the Performance Hub's Real-Time SQL Monitoring feature in Database Management?

* A. Database Version
* B. Average Active Sessions
* C. Physical Reads
* D. Number of CPUs on the host

Answer: B,C

Explanation:
Performance Hub Real-Time SQL Monitoring:
ThePerformance Hubin Oracle Database Management provides detailed real-time monitoring of SQL queries, including:
* Physical Reads (A):Measures the number of physical I/O operations performed by a SQL statement.
* Average Active Sessions (B):Reflects the number of sessions actively performing database operations, giving insights into workload and bottlenecks.
These metrics help database administratorsanalyze query performanceand detect issues in real-time.
Why the other options are incorrect:
* C:Number of CPUs is a hardware metric, not part of SQL monitoring.
* D:Database version is static information, not a performance metric.

NEW QUESTION # 84
When cloning a BaseDB database for development and testing, which of the following considerations is MOST critical to ensure compliance with data privacy regulations?

* A. Maintaining the same network security group (NSG) rules as the production database.
* B. Scheduling the cloning operation during off-peak hours.
* C. Ensuring the compute shape of the cloned database is identical to the production database.
* D. Using the same database version as the production database.
* E. Masking or anonymizing sensitive data in the cloned database.

Answer: E

Explanation:
B: Masking or anonymizing sensitive data:
* Data privacy regulations (likeGDPR,HIPAA) mandate thatpersonally identifiable information (PII) is protected, even in non-production environments.
* Cloning a database without masking sensitive data could expose confidential information to unauthorized users.
* Techniques include:
* Data masking:Replacing real data with realistic, but non-sensitive values.
* Data anonymization:Irreversibly removing personally identifiable information.
Why the other options are incorrect:
* A. Matching compute shape:Relevant to performance, not privacy.
* C. Using the same database version:Important for compatibility, but not related to data privacy.
* D. Same NSG rules:Important for network security, but does not directly address data exposure.
* E. Off-peak scheduling:Minimizes disruption but does not address data protection.

NEW QUESTION # 85
Which data formats are directly supported by the HeatWave Lakehouse feature for querying data in object storage?

* A. Only Parquet files.
* B. Only XML files.

- C. Only CSV (Comma Separated Values) files.
- D. CSV, Parquet, and Avro files.
- E. Only JSON files.

Answer: D

Explanation:
C: CSV, Parquet, and Avro files:
* HeatWave Lakehousecan directly query data stored inOCI Object Storagewithout loading it into MySQL.
* Supports widely-used data formats:
* CSV (Comma Separated Values): Simple, text-based data format.
* Parquet: Columnar storage format optimized for analytical queries.
* Avro: Row-oriented format used for data serialization.
* This versatility allows integrating data from various sources and querying directly.
Why the other options are incorrect:
* A. Only CSV files:HeatWave supports more than just CSV.
* B. Only Parquet files:HeatWave also supports CSV and Avro.
* D. Only JSON files:JSON is not directly supported by HeatWave Lakehouse.
* E. Only XML files:XML is not directly supported.

NEW QUESTION # 86
Which database lifecycle management operation in BaseDB requires the creation of a new database home and is non-reversible after completion?

- A. Applying an operating system patch.
- B. Scaling the compute shape of the VM.
- C. Upgrading the Oracle Grid Infrastructure.
- D. Upgrading the Oracle Database software version.
- E. Enabling Automatic Storage Management (ASM).

Answer: D

Explanation:
Database Software Upgrade:
When upgrading theOracle Database software versionon aBaseDB VM, a newOracle Homeis created to house the upgraded software. Once the database is moved to this new home, the process isnot easily reversible.
* Rolling back would requiredowngrading, which is a complex and risky process.
* The new Oracle Home ensures that the upgraded database environment isisolated from the previous version, preventing compatibility conflicts.
Why the other options are incorrect:
* A:Grid Infrastructure upgrades can be managed independently of the database upgrade.
* B:Scaling VMs is a reversible operation.
* D:OS patches do not impact the Oracle Home directly.
* E:ASM configuration changes are reversible.

NEW QUESTION # 87
......

As for the 1z0-1093-25 study materials themselves, they boost multiple functions to assist the learners to learn the 1z0-1093-25 learning dumps efficiently from different angles. For example, the function to stimulate the exam can help the exam candidates be familiar with the atmosphere and the pace of the Real 1z0-1093-25 Exam and avoid some unexpected problem occur such as the clients answer the questions in a slow speed and with a very anxious mood which is caused by the reason of lacking confidence.
