First and foremost, we have high class operation system so we can assure you that you can start to prepare for the PCCP exam with our PCCP study materials only 5 to 10 minutes after payment. Second, once we have compiled a new version of the PCCP test question, we will send the latest version of our PCCP Training Materials to our customers for free during the whole year after purchasing. Last but not least, our worldwide after sale staffs will provide the most considerate after sale service on PCCP training guide for you in twenty four hours a day, seven days a week.

Palo Alto Networks PCCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Security Operations: This final section measures skills of a Security Operations Analyst and covers key characteristics and practices of threat hunting and incident response processes. It explains functions and benefits of security information and event management (SIEM) platforms, security orchestration, automation, and response (SOAR) tools, and attack surface management (ASM) platforms. It also highlights the functionalities of Cortex solutions, including XSOAR, Xparse, and XSIAM, and describes services offered by Palo Alto Networks' Unit 42.
Topic 2	<ul style="list-style-type: none"> • Endpoint Security: This domain is aimed at an Endpoint Security Analyst and covers identifying indicators of compromise (IOCs) and understanding the limits of signature-based anti-malware. It includes concepts like User and Entity Behavior Analytics (UEBA), endpoint detection and response (EDR), and extended detection and response (XDR). It also describes behavioral threat prevention and endpoint security technologies such as host-based firewalls, intrusion prevention systems, device control, application control, disk encryption, patch management, and features of Cortex XDR.

Topic 3	<ul style="list-style-type: none"> • Cloud Security: This section targets a Cloud Security Specialist and addresses major cloud architectures and topologies. It discusses security challenges like application security, cloud posture, and runtime security. Candidates will learn about technologies securing cloud environments such as Cloud Security Posture Management (CSPM) and Cloud Workload Protection Platforms (CWPP), as well as the functions of a Cloud Native Application Protection Platform (CNAPP) and features of Cortex Cloud.
Topic 4	<ul style="list-style-type: none"> • Cybersecurity: This section of the exam measures skills of a Cybersecurity Practitioner and covers fundamental concepts of cybersecurity, including the components of the authentication, authorization, and accounting (AAA) framework, attacker techniques as defined by the MITRE ATT&CK framework, and key principles of Zero Trust such as continuous monitoring and least privilege access. It also addresses understanding advanced persistent threats (APT) and common security technologies like identity and access management (IAM), multi-factor authentication (MFA), mobile device and application management, and email security.
Topic 5	<ul style="list-style-type: none"> • Network Security: This domain targets a Network Security Specialist and includes knowledge of Zero Trust Network Access (ZTNA) characteristics, functions of stateless and next-generation firewalls (NGFWs), and the purpose of microsegmentation. It also covers common network security technologies such as intrusion prevention systems (IPS), URL filtering, DNS security, VPNs, and SSL • TLS decryption. Candidates must understand the limitations of signature-based protection, deployment options for NGFWs, cybersecurity concerns in operational technology (OT) and IoT, cloud-delivered security services, and AI-powered security functions like Precision AI.

100% Pass Quiz PCCP - Palo Alto Networks Certified Cybersecurity Practitioner Fantastic Formal Test

With years of experience in the field, TestInsides are always striving hard to provide customers with genuine Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) exam dumps so that they crack their Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) exam in less time. TestInsides also offer the best self-assessment software so besides memorizing PCCP Exam Questions, applicants put their learning to the test and reduce their chances of failure in the real Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) examination.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q143-Q148):

NEW QUESTION # 143

What type of address translation does a NAT perform?

- A. Physical to logical
- B. Logical to physical
- **C. Private to public**
- D. Public to private

Answer: C

Explanation:

NAT stands for Network Address Translation, which is a process that allows devices on a private network to communicate with devices on a public network, such as the Internet. NAT translates the private IP addresses of the devices on the private network to public IP addresses that can be routed on the public network. This way, multiple devices on the private network can share a single public IP address and access the Internet.

NAT also provides security benefits, as it hides the internal network structure and IP addresses from the outside world. References: Palo Alto Networks Certified Cybersecurity Entry-level Technician (PCCET), Fundamentals of Network Security, Network Address Translation (NAT)

NEW QUESTION # 144

What is a reason IoT devices are more susceptible to command-and-control (C2) attacks?

- A. Decreased connection quality within a local area network
- B. Limited battery life preventing always-on security
- C. Higher attack surface due to mobility
- **D. Increased sharing of data through the internet**

Answer: D

Explanation:

IoT devices often have constant internet connectivity and increased data sharing, making them more vulnerable to command-and-control (C2) attacks. Their limited security features and exposure to external networks provide attackers more opportunities to compromise and control them remotely.

NEW QUESTION # 145

What are two capabilities of identity threat detection and response (ITDR)? (Choose two.)

- **A. Scanning for excessive logins**
- **B. Analyzing access management logs**
- C. Securing individual devices
- D. Matching risks to signatures

Answer: A,B

NEW QUESTION # 146

Which type of attack includes exfiltration of data as a primary objective?

- A. Denial-of-service (DoS)
- **B. Advanced persistent threat**
- C. Watering hole attack
- D. Cross-Site Scripting (XSS)

Answer: B

Explanation:

An Advanced Persistent Threat (APT) is a long-term, targeted cyberattack where data exfiltration is often the primary objective. Attackers maintain a covert presence in the network to steal sensitive information over time.

NEW QUESTION # 147

Given the graphic, match each stage of the cyber-attack lifecycle to its description.

□

Answer:

Explanation:

□ Explanation:

□

NEW QUESTION # 148

.....

Our experts have carefully researched each part of the test syllabus of the PCCP guide materials. Then they compile new questions and answers of the study materials according to the new knowledge parts. At last, they reorganize the PCCP learning questions and issue the new version of the study materials. Once the newest test syllabus of the PCCP Exam appear on the official website, our staff will quickly analyze them and send you the updated version. So our PCCP guide materials deserve your investment.
