

High Pass-Rate Verified NCP-EUC Answers Covers the Entire Syllabus of NCP-EUC

ActualCollection recognizes the acute stress the aspirants undergo to get trust worthy and authentic Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam study material. They carry undue pressure with the very mention of appearing in the Nutanix NCP-EUC certification test. Here the ActualCollection come forward to prevent them from stressful experiences by providing excellent and top-rated Nutanix NCP-EUC Practice Test questions to help them hold the Nutanix NCP-EUC certificate with pride and honor.

Nutanix NCP-EUC (Nutanix Certified Professional - End - User Computing) Exam is an industry-recognized certification exam designed for IT professionals who work with Nutanix solutions. NCP-EUC exam is designed to test the candidate's proficiency in deploying, managing, and troubleshooting Nutanix end-user computing environments. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification is ideal for system administrators, IT managers, and support staff who work with Nutanix solutions in their daily roles.

The NCP-EUC certification exam is a challenging exam that requires a strong understanding of Nutanix VDI solutions. NCP-EUC Exam is designed to test the candidate's skills and knowledge on Nutanix VDI solutions, including how to configure and manage Nutanix VDI solutions, how to troubleshoot VDI issues, and how to optimize VDI performance. Candidates who pass the NCP-EUC certification exam will have a deep understanding of Nutanix VDI solutions and will be able to provide expert advice to their customers on the design and implementation of Nutanix VDI solutions.

NCP-EUC Examcollection Free Dumps | NCP-EUC Test Collection Pdf

The top personal and professional Nutanix NCP-EUC certification exam benefits are recognition of skills, updated knowledge, more career opportunities, instant promotion, and increase in salary, etc. If your answer is yes first of all you have to enroll in the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) certification exam and put all your efforts to pass this career advancement certification exam. Are you looking for the right and recommended way to pass the Nutanix NCP-EUC exam?

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam

Sample Questions (Q179-Q184):

NEW QUESTION # 179

An EUC environment is being deployed with multi-session server OS workloads. An administrator has a requirement for configuring RDS licensing for redundancy across Nutanix clusters.

Which action should the administrator take when configuring the group policy settings needed for this requirement?

- A. Specify the remote desktop license server security group.
- B. Prevent remote desktop license server upgrade.
- C. Set the remote desktop licensing mode.
- D. Use the specified remote desktop license servers.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Microsoft RDS and Nutanix Best Practices:

* GPO Configuration: The specific Group Policy Object (GPO) setting used to define which license servers an RD Session Host should contact is titled "Use the specified remote desktop license servers".

* Redundancy: In this policy setting, the administrator can input a list of multiple license servers (IP addresses or FQDNs). If the first server in the list is unreachable (due to a cluster failure or maintenance), the host automatically attempts to contact the subsequent servers, thereby achieving the required redundancy.

NEW QUESTION # 180

Refer to the exhibit.

Refer to the exhibit.

An administrator is configuring a virtual desktop gold master image with P40 NVIDIA vGPU. upon trying to add a vCPU assignment in Prism Element, the administrator noticed that it is not selectable and cannot proceed.

Which two actions are correct steps to resolve this issue? (Choose two.)

- A. Install the NVIDIA GPU Manager Driver.
- B. Disable ECC by running `nvidia-smi -e 0`.
- C. Install the NVIDIA GPU drivers on the Gold Master.
- D. Check if ECC Mode is turned on by running `nvidia-smi -q | grep "ECC Mode" -A2`

Answer: B,D

Explanation:

ECC (Error Correcting Code) mode is a feature of some NVIDIA GPUs that provides error detection and correction for memory errors. However, ECC mode can interfere with vGPU functionality and prevent vGPU-enabled VMs from being created or started. Therefore, two correct steps to resolve this issue are B (Disable ECC by running `nvidia-smi -e 0`) and D (Check if ECC Mode is turned on by running `nvidia-smi -q | grep "ECC Mode" -A2`).

"ECC Mode" -A2).

NEW QUESTION # 181

An administrator is using EUC broker software to manage and direct connections to virtual desktops and applications. After losing power to a host in the cluster, the administrator needs to make sure the broker VMs restart. What will happen to the broker VMs in this situation?

- A. The VMs will remain powered off until the host is back online.
- B. A policy must be created so the VMs will power back on.
- C. The VMs will live migrate to a powered-on host.
- **D. Built-in AHV policies will automatically restart the VMs.**

Answer: D

Explanation:

Nutanix AHV includes a native feature called VM High Availability (VMHA), which protects VMs in the event of a host failure (such as power loss).

When a host fails, the Acropolis High Availability service detects the failure. Built-in AHV policies automatically restart the affected VMs on the remaining healthy hosts in the cluster.

Live migration (Option D) is not possible because the host is already down (powered off), meaning the memory state cannot be transferred; the VMs must be restarted (booted) on new hosts. No manual policy creation (Option B) is required as this is a core default function of the AHV cluster, provided resources are available.

NEW QUESTION # 182

An administrator has been asked to investigate encrypting intra-cluster storage traffic. Which factor should be considered in this implementation?

- **A. Increased IO latency and CVM CPU utilization**
- B. Lack of encryption for Volume-Group connections
- C. Higher User- VM CPU and memory utilization
- D. Stargate traffic between CVMs remains unencrypted

Answer: A

Explanation:

Nutanix supports Data-in-Transit Encryption to secure traffic flowing between nodes (CVM to CVM) and between the CVM and hypervisor. This feature uses TLS to encrypt replication and storage data traffic.

However, the Security Guide notes that enabling encryption introduces computational overhead. The encryption and decryption of storage traffic are handled by the Controller VM (CVM) CPUs. Therefore, a key design consideration is that this configuration results in increased CVM CPU utilization. Consequently, due to the processing time required for encryption operations, there may be a slight increase in I/O latency.

Administrators must ensure the cluster has sufficient CPU headroom on the CVMs to absorb this overhead without impacting application performance.

NEW QUESTION # 183

An administrator wants to deploy 1,000 virtual desktops on Nutanix AOS and wants to leverage a cloning technology from the company's chosen virtual desktop broker vendor which is Citrix.

What kind of Nutanix storage efficiency feature should the administrator use for this solution?

- A. Compression + Deduplication
- **B. Deduplication**
- C. Compression
- D. Deduplication + Capacity

Answer: B

Explanation:

one of the possible Nutanix storage efficiency features that the administrator can use for this solution is Deduplication. Deduplication is a technology that eliminates duplicate blocks of data and reduces storage consumption. Deduplication can be enabled on a per-container basis and can provide significant savings for Citrix virtual desktop deployments that use cloning technologies such as

Machine Creation Services (MCS) or Provisioning Services (PVS)1.

NEW QUESTION # 184

.....

In order to meet the demand of most of the IT employees, ActualCollection's IT experts team use their experience and knowledge to study the past few years Nutanix certification NCP-EUC exam questions. Finally, ActualCollection's latest Nutanix NCP-EUC simulation test, exercise questions and answers have come out. Our Nutanix NCP-EUC simulation test questions have 95% similarity answers with real exam questions and answers, which can help you 100% pass the exam. If you do not pass the exam, ActualCollection will full refund to you. You can also free online download the part of ActualCollection's Nutanix Certification NCP-EUC Exam practice questions and answers as a try. After your understanding of our reliability, I believe you will quickly add ActualCollection's products to your cart. ActualCollection will achieve your dream.
