

Real Cisco 350-401 Questions - Verified By Experts

Top 5 Facts to Rely on Cisco 350-401 Practice Tests

1. You get the actual Cisco 350-401 exam experience.

2. Time management becomes easy during the actual exam.

3. Valuable insights offer more improvement scope.

4. Rigorous Practice Makes you perfect about the Cisco 350-401 syllabus domains.

5. Self-assessment provides self-satisfaction regarding the 350-401 exam preparation.

P.S. Free 2026 Cisco 350-401 dumps are available on Google Drive shared by PracticeDump: <https://drive.google.com/open?id=1PcfjflAGRX0FY1D7xr12GKWs99k4veT6>

Do you feel headache looking at so many IT certification exams and so many exam materials? What should you do? Which materials do you choose? If you don't know how to choose, I choose your best exam materials for you. You can choose to attend Cisco 350-401 exam which is the most popular in recent. Getting 350-401 certificate, you will get great benefits. Moreover, to effectively prepare for the exam, you can select PracticeDump Cisco 350-401 certification training dumps which are the best way to pass the test.

Cisco 350-401 (Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR)) Exam is a certification exam offered by Cisco Systems for enterprise networking professionals. 350-401 exam measures their knowledge and skills to implement core enterprise network technologies, including network infrastructure, security, automation, and virtualization. 350-401 Exam is a requirement for the Cisco Certified Specialist – Enterprise Core Certification.

Free 350-401 Vce Dumps | Valid 350-401 Exam Camp

The staffs of 350-401 training materials are all professionally trained. If you have encountered some problems in using our products,

you can always seek our help. Our staff will guide you professionally. If you are experiencing a technical problem on the system, the staff at 350-401 practice guide will also perform one-on-one services for you. We want to eliminate all unnecessary problems for you, and you can learn our 350-401 Exam Questions without any problems. You may have enjoyed many services, but the professionalism of 350-401 simulating exam will conquer you.

Cisco Implementing Cisco Enterprise Network Core Technologies (350-401 ENCOR) Sample Questions (Q359-Q364):

NEW QUESTION # 359

Refer to the exhibit.

A network engineer is enabling logging to a local buffer, to the terminal and to a syslog server for all debugging level logs filtered by facility code 7. Which command is needed to complete this configuration snippet?

- A. logging discriminator Disc1 severity includes 7
- B. logging buffered discriminator Disc1 debugging
- **C. logging discriminator Disc1 severity includes 7 facility includes fac7**
- D. logging buffered debugging

Answer: C

NEW QUESTION # 360

Drag and drop the characteristics of Cisco Catalyst SD-WAN from the left onto the right. Not all options are used.

Answer:

Explanation:

Explanation:

NEW QUESTION # 361

Refer to the exhibit.

An engineer configures monitoring on SW1 and enters the show command to verify operation. What does the output confirm?

- A. SPAN session 2 monitors all traffic entering and exiting port FastEthernet 0/15.
- B. SPAN session 2 only monitors egress traffic exiting port FastEthernet 0/14.
- **C. RSPAN session 1 is incompletely configured for monitoring**
- D. RSPAN session 1 monitors activity on VLAN 50 of a remote switch

Answer: C

Explanation:

SW1 has been configured with the following commands:

SW1(config)#monitor session 1 source remote vlan 50 SW1(config)#monitor session 2 source interface fa0/14

SW1(config)#monitor session 2 destination interface fa0/15

The session 1 on SW1 was configured for Remote SPAN (RSPAN) while session 2 was configured for local SPAN. For RSPAN we need to configure the destination port to complete the configuration.

Note: In fact we cannot create such a session like session 1 because if we only configure -Source RSPAN VLAN 50 || (with the command -monitor session 1 source remote vlan 50 ||) then we will receive a -Type: Remote Source Session || (not -Remote Destination Session ||).

NEW QUESTION # 362

Refer to the exhibit. How should the programmer access the list of VLANs that are received via the API call?

- **A. VlanName['response']**
- B. VlanName[Vlan1']
- C. list(VlanNames)
- D. VlanNames(0)

Answer: A

NEW QUESTION # 363

Lab Simulation 9

Guidelines

This is a lab item in which tasks will be performed on virtual devices.

- Refer to the Tasks tab to view the tasks for this lab item.
- Refer to the Topology tab to access the device console(s) and perform the tasks.
- Console access is available for all required devices by clicking the device icon or using the tab(s) above the console window.
- All necessary preconfigurations have been applied.
- Do not change the enable password or hostname for any device.
- Save your configurations to NVRAM before moving to the next item
- Click Next at the bottom of the screen to submit this lab and move to the next question
- When Next is clicked, the lab closes and cannot be reopened.

Topology

Tasks

Configure OSPF on all three routers according to the topology to achieve these goals:

1. Configure OSPF without using the "network" statement under the "router ospf" configuration section.
2. Ensure that all networks are advertised between the routers.
3. Configure a single command under each Ethernet interface to prevent OSPF neighbors from participating in a DR/BDR election and ensure that no extra host routes are generated.

Answer:

Explanation:

Task 1. Configure OSPF without using the "network" statement under the "router ospf" configuration section.

R1,R2(config)#interface e0/0

R1,R2(config-if)#ip ospf 1 area 0

R1,R2,R3(config-if)#interface lo0

R1,R2,R3(config-if)#ip ospf 1 area 0

More on R2, R3:

R2,R3(config)#interface e0/1

R2,R3(config-if)#ip ospf 1 area 0

Verification

R1,R2#show ip ospf neighbor

Task 2. Ensure that all networks are advertised between the routers.

R1,R2,R3#show ip route (or "show ip route ospf" if possible) to check all advertised routes.

Task 3. Configure a single command under each Ethernet interface to prevent OSPF neighbors from participating in a DR/BDR election and ensure that no extra host routes are generated.

R1,R2(config)#interface e0/0

R1,R2(config-if)#ip ospf network point-to-point

More on R2, R3:

R2,R3(config)#interface e0/1

R2,R3(config-if)#ip ospf network point-to-point

Note: Setting OSPF to point-to-point mode results in advertised routes containing the actual subnet mask instead of the default behavior of advertising /32 for a loopback interface.

Don't forget to save the configuration

R1,R2,R3#copy running-config startup-config

NEW QUESTION # 364

.....

PracticeDump follows its motto to facilitate its consumer by providing them the material to qualify for the Cisco 350-401 certification exam with excellence. Therefore, it materializes its mission by giving them free of cost Cisco 350-401 demo of the dumps. This practical step taken by the PracticeDump will enable its users to assess the quality of the Cisco 350-401 dumps.
