Boring learning is out of style. Our 3V0-21.23 study materials will stimulate your learning interests. Then you will concentrate on learning our 3V0-21.23 practice guide for we have professional experts who have been in this career for over ten year apply the newest technologies to develop not only the content but also the displays. Nothing can divert your attention. If you are ready to change yourself, come to purchase our 3V0-21.23 Exam Materials. Never give up your dreams.

## VMware 3V0-21.23 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>VMware Products and Solutions: Targeting VMware Engineers, this section describes VMware Cloud Foundation architecture, its components like vSphere and NSX, benefits such as automation and scalability, and use cases like hybrid cloud environments. It assesses understanding of VMware Validated Solutions.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Plan and Design the VMware Solution: This part targets Solution Designers, evaluating their ability to gather business objectives, create conceptual models based on these objectives, develop logical designs, and translate them into physical designs that meet specific requirements like manageability or security.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers differentiating between business and technical requirements, as well as conceptual, logical, and physical design. A key skill measured is "Designing System Availability."</li> </ul>

## Avail Trustable 3V0-21.23 100% Correct Answers to Pass 3V0-21.23 on the First Attempt

Buy VMware 3V0-21.23 preparation material from a trusted company such as Real4dumps. This will ensure you get updated VMware 3V0-21.23 study material to cover everything before the big day. Practicing for an VMware vSphere 8.x Advanced Design (3V0-21.23) exam is one of the best ways to ensure success. It helps students become familiar with the format of the actual 3V0-21.23 Practice Test. It also helps to identify areas where more focus and attention are needed. Furthermore, it can help reduce the anxiety and stress associated with taking an VMware vSphere 8.x Advanced Design (3V0-21.23) exam as it allows students to gain confidence in their knowledge and skills.

### VMware vSphere 8.x Advanced Design Sample Questions (Q27-Q32):

#### NEW QUESTION # 27

An architect is designing a new VMware software-designed data center (SDDC) using vSphere 7 to meet the following requirements:

- The SDDC must be deployed at two locations: primary and secondary.
- vSphere Replication must be used to replicate virtual machines between the two locations.
- Site Recovery Manager must be used to orchestrate disaster recovery (DR) activities.
- One single-sign on (SSO) domain must be used to authenticate access at both locations.

Which design decision should the architect make to meet these requirements?

- A. A vCenter Server Appliance will be deployed to each site. Unique SSO domains will be created per site.
- B. A vCenter Server will be installed on Windows virtual machines deployed to both sites.
- **C. A vCenter Server Appliance will be deployed to each site.**
- D. A vCenter Server Appliance will be deployed to the primary site only.

**Answer: C**

Explanation:

Prerequisites for Site Recovery Manager Server: You need a vCenter Server on both sites.

[https://docs.vmware.com/en/Site-Recovery-](https://docs.vmware.com/en/Site-Recovery-Manager/8.4/com.vmware.srm.install_config.doc/GUID-BB0C03E4-72BE-4C74-96C3-97AC6911B6B8.html)

[Manager/8.4/com.vmware.srm.install\\_config.doc/GUID-BB0C03E4-72BE-4C74-96C3-97AC6911B6B8.html](https://docs.vmware.com/en/Site-Recovery-Manager/8.4/com.vmware.srm.install_config.doc/GUID-BB0C03E4-72BE-4C74-96C3-97AC6911B6B8.html)

#### NEW QUESTION # 28

Which two of the listed requirements would be classified as performance non-functional requirements? (Choose two.)

- A. The vSphere platform must be able to provide N+1 redundancy
- **B. The vSphere platform must be able to provide a minimum throughput of 400 MB/s**
- C. The vSphere platform must be able to provide a service-level agreement (SLA) of 99,9%
- D. The vSphere platform must be able to provide a recovery time objective of 30 minutes
- **E. The vSphere platform must be able to provide a maximum read latency of 15 ms**

**Answer: B,E**

Explanation:

### NEW QUESTION # 29

An architect is creating the design for a vSphere platform that will be used as the target for a migration from multiple legacy vSphere platforms that are being decommissioned. The customer has provided the following information:

Each legacy platform has its own set of virtual machine templates stored in OVF format.

All of the templates need to be migrated to the new platform.

After migration, the templates should be centralized into a single location.

The templates must be accessible to all clusters in the new platform vCenter instance.

Any new templates added to the central location must be automatically available to all clusters.

Administrators must be able to deploy new virtual machines directly from the template instances.

The customer also confirmed that after the migrations are complete, the new platform will be the only vSphere solution available.

Which design choice should the architect evaluate in the logical design for the storage and management of virtual machine templates?

- A. Use a shared datastore on each vSphere cluster
- B. Use a dedicated datastore on each vSphere cluster
- C. Use a subscribed content library
- D. Use a local content library

**Answer: C**

### NEW QUESTION # 30

What do risks in the context of design refer to?

- A. Potential events or circumstances that could negatively impact the design's success.
- B. Constraints imposed by industry regulations and standards.
- C. Assumptions about the hardware and infrastructure requirements.
- D. The specific tasks and operations the design must perform.

**Answer: A**

### NEW QUESTION # 31

An architect is tasked with designing a solution to monitor the operational state of a VMware Cloud Foundation environment through ad-hoc reporting and custom dashboards, alerts, and notifications.

Using VMware Validated Solutions, which validated solution can the architect leverage to meet this requirement?

- A. Intelligent Operations Management for VMware Cloud Foundation
- B. Private Cloud Automation for VMware Cloud Foundation
- C. VMware Validated Design for VMware Cloud Foundation
- D. Health Reporting and Monitoring for VMware Cloud Foundation

**Answer: A**

Explanation:

Intelligent Operations Management for VMware Cloud Foundation is designed to help monitor the operational state of a VMware Cloud Foundation environment. It provides capabilities for ad-hoc reporting, custom dashboards, alerts, and notifications. This validated solution ensures comprehensive monitoring and management of the environment, addressing the requirements for reporting and monitoring the operational state of the infrastructure.

### NEW QUESTION # 32

.....

With our numerous advantages of our 3V0-21.23 latest questions and service, what are you hesitating for? Our company always serves our clients with professional and precise attitudes, and we know that your satisfaction is the most important thing for us. We always aim to help you pass the 3V0-21.23 Exam smoothly and sincerely hope that all of our candidates can enjoy the tremendous benefit of our 3V0-21.23 exam material, which might lead you to a better future!
