

# Plat-Con-201 Valid Test Prep - Latest Plat-Con-201 Test Guide

P.S. Free 2026 Salesforce Plat-Con-201 dumps are available on Google Drive shared by Itbrandumps:  
[https://drive.google.com/open?id=1GQ7uXBW2nBF7QwOQ\\_vBAgV4djgh6mx](https://drive.google.com/open?id=1GQ7uXBW2nBF7QwOQ_vBAgV4djgh6mx)

If you want to achieve that you must boost an authorized and extremely useful certificate to prove that you boost good abilities and plenty of knowledge in some area. Passing the test Plat-Con-201 certification can help you realize your goal and if you buy our Plat-Con-201 latest torrent you will pass the exam successfully. Our product boosts many merits and high passing rate. Our products have 3 versions and we provide free update of the Plat-Con-201 Exam Torrent to you. If you are the old client you can enjoy the discounts.

Our Plat-Con-201 test torrent has been well received and have reached 99% pass rate with all our dedication. As a powerful tool for a lot of workers to walk forward a higher self-improvement, our Plat-Con-201 certification training continued to pursue our passion for advanced performance and human-centric technology. To get a full understanding of our Plat-Con-201 study torrent, you can visit our web or free download the demo of our Plat-Con-201 exam questions as we provide them on the web for our customers to try the quality of our Plat-Con-201 training guide.

**Free PDF 2026 Salesforce Professional Plat-Con-201 Valid Test Prep**

The Salesforce Certified Omnistudio Consultant (Plat-Con-201) questions are available in three easy-to-use forms. The first one is a Plat-Con-201 Dumps PDF form, and it is printable and portable. You can print Salesforce Certified Omnistudio Consultant (Plat-Con-201) questions PDF or can access them by saving them on your smartphones, tablets, and laptops. The Salesforce Certified Omnistudio Consultant (Plat-Con-201) dumps PDF format can be used anywhere, anytime and is essential for students who like to learn from their smart devices for Plat-Con-201 exam.

## Salesforce Certified Omnistudio Consultant Sample Questions (Q51-Q56):

### NEW QUESTION # 51

When a customer wants to buy a new device, a discounted rate can be applied after considering the number lines and internet coverage on their current plan.

Which OmniStudio tool could a consultant recommend to get the discounted rate?

- A. DataRaptor Turbo
- B. DataRaptor Transform
- C. OmniStudio Action
- D. Calculation Matrices

**Answer: D**

Explanation:

The OmniStudio tool that the consultant should recommend to get the discounted rate is Calculation Matrices. A Calculation Matrix is a tool that can perform complex calculations based on multiple input variables and output values. The consultant can use a Calculation Matrix to define the input variables, such as number of lines and internet coverage, and the output values, such as discounted rate. The Calculation Matrix can then apply rules and formulas to calculate the discounted rate for each combination of input variables.

### NEW QUESTION # 52

A business has a requirement to display cases in a console for service agents. Cases can have a variety of statuses, including Active, Closed, or Escalated. When a case is Closed, agents need to be able to reopen the case. When the case is Active or Escalated, agents should not have the option to reopen the case.

Which FlexCard functionality can be used to meet this requirement?

- A. Conditional View
- B. Flyouts
- C. State
- D. Styling

**Answer: A**

Explanation:

The FlexCard functionality that can be used to meet this requirement is Conditional View. A Conditional View is a property that determines whether a FlexCard element, such as a field or an action, is visible or hidden based on certain conditions. The consultant can use a Conditional View to show or hide the reopen case action based on the status of the case.

### NEW QUESTION # 53

A company has a requirement to create a 360° view of their customers using FlexCards. At this company, customer data is stored in Salesforce but also in external legacy systems. A consultant reviews the use cases needed and recommends a FlexCard canvas that contains 5 child FlexCards inside the state of the parent FlexCard.

How many different data sources can be configured using FlexCards in this scenario?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

Explanation:

The number of different data sources that can be configured using FlexCards in this scenario is 6. A FlexCard can have one data source per state, and a state can have multiple child FlexCards, each with its own data source. Therefore, the parent FlexCard can have one data source for its state, and each of the 5 child FlexCards can have a different data source, making a total of 6 data sources

#### NEW QUESTION # 54

A company uses Expression Sets to determine product pricing. Due to the company's pricing schedules, there is always more than one Expression Set active at one time for a given date.

In this scenario, how will the calculation engine select which Expression Set to run?

- A. Date created
- B. Date modified
- C. Sequence
- **D. Rank**

**Answer: D**

Explanation:

\* Rank (A) - The Expression Set with the highest rank is selected by the Calculation Engine when multiple active Expression Sets exist for the same date.

\* This ensures that the most relevant pricing rule is applied based on the company's prioritization strategy.

\* B. Date modified - The modification date does not determine priority for execution.

\* C. Date created - The system does not use the creation date to prioritize which Expression Set to execute.

\* D. Sequence - Sequence applies within an Expression Set but does not control selection between multiple active Expression Sets.

Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:

\* Expression Sets in Calculation Procedures

\* OmniStudio Calculation Engine Overview

#### NEW QUESTION # 55

A consultant is tasked with migrating Calculation Matrices and Procedures as Decision Matrices and Expression Sets respectively. What is a key consideration when migrating Calculation Matrices and Procedures?

- A. Procedures can be migrated without considerations.
- B. Matrices can be migrated with minimal considerations.
- **C. Looping procedures cannot be migrated as expression sets.**
- D. Matrices can be migrated without considerations.

**Answer: C**

Explanation:

The task involves migrating legacy Calculation Matrices to Decision Matrices and Calculation Procedures to Expression Sets in OmniStudio. A key consideration arises from the differences in functionality between these tools, particularly with looping logic, making D the correct answer.

Here's why D. Looping procedures cannot be migrated as Expression Sets is the correct answer:

\* Migration Context:

\* Calculation Matrices # Decision Matrices: Calculation Matrices (from older Vlocity tools) are lookup tables that map inputs to outputs. They migrate to Decision Matrices in OmniStudio, which serve the same purpose (e.g., returning a discount based on inputs) and are generally straightforward to convert, as both are data-driven tables stored as Salesforce metadata.

\* Calculation Procedures # Expression Sets: Calculation Procedures are sequential, logic-driven processes that can include formulas, conditions, and loops. They migrate to Expression Sets in OmniStudio, which are collections of reusable expressions (formulas or conditions) executed in a specific order.

\* Key Consideration - Looping:

\* Calculation Procedures: These legacy procedures support looping logic, such as iterating over a list of items (e.g., processing multiple line items in a quote to calculate totals).

\* Expression Sets: Expression Sets in OmniStudio are designed for linear, non-iterative calculations. They execute a series of expressions (e.g., Total = Price \* Quantity) but do not natively support looping constructs like "for each" or "while" loops. Looping requires an Integration Procedure or custom Apex in OmniStudio, not Expression Sets.

\* Impact: If a Calculation Procedure includes looping (e.g., summing values across a JSON array), it cannot be directly migrated to an Expression Set without rearchitecting the logic. The consultant must consider alternative tools (e.g., an Integration Procedure with

a Loop Block) to handle such cases.

\* Why It's Key: Failing to account for looping can break the migrated process, as Expression Sets lack this capability. Identifying and addressing looping logic upfront is critical to ensure functional equivalence post-migration.

Now, let's examine why the other options are incorrect:

\* A. Procedures can be migrated without considerations: This is false. Calculation Procedures often include complex logic (e.g., loops, branching), and Expression Sets have limitations (e.g., no looping), requiring careful analysis and potential redesign during migration.

\* B. Matrices can be migrated with minimal considerations: While migrating Calculation Matrices to Decision Matrices is relatively straightforward (both are lookup tables), "minimal considerations" understates potential issues like data mapping or deprecated features, though looping isn't a factor here.

This isn't the key consideration compared to D.

\* C. Matrices can be migrated without considerations: This is incorrect. Even for matrices, considerations like field mappings, data type compatibility, or version differences exist, though they're less complex than procedure migrations.

References:

\* Salesforce OmniStudio Documentation: Migration Guide - Discusses migrating Calculation Matrices and Procedures, noting limitations like looping in Expression Sets.

\* Salesforce OmniStudio Developer Guide: Expression Sets - Confirms Expression Sets lack looping, unlike Integration Procedures.

## NEW QUESTION # 56

.....

Our Salesforce Plat-Con-201 exam dumps give help to give you an idea about the actual Salesforce Certified Omnistudio Consultant (Plat-Con-201) exam. You can attempt multiple Salesforce Certified Omnistudio Consultant (Plat-Con-201) exam questions on the software to improve your performance. Itbraindumps has many Salesforce Certified Omnistudio Consultant (Plat-Con-201) practice questions that reflect the pattern of the real Salesforce Certified Omnistudio Consultant (Plat-Con-201) exam. Itbraindumps allows you to create a Salesforce Certified Omnistudio Consultant (Plat-Con-201) exam dumps according to your preparation. It is easy to create the Salesforce Plat-Con-201 practice questions by following just a few simple steps. Our Plat-Con-201 exam dumps are customizable based on the time and type of questions.
