2026 Exam 1Y0-205 Practice Free PDF | Pass-Sure Study 1Y0-205 Center: Citrix Virtual Apps and Desktops Administration

We all know that Citrix Virtual Apps and Desktops Administration (1Y0-205) exam dumps are an important section of the Citrix Virtual Apps and Desktops Administration (1Y0-205) exam that is purely based on your skills, expertise, and knowledge. So, we

must find quality 1Y0-205 Questions drafted by industry experts who have complete knowledge regarding the Citrix Virtual Apps and Desktops Administration (1Y0-205) certification exam and can share the same with those who want to clear the 1Y0-205 exam. The best approach to finding Citrix Virtual Apps and Desktops Administration (1Y0-205) exam dumps is to check the Test4Cram that is offering the Citrix Virtual Apps and Desktops Administration (1Y0-205) practice questions.

Citrix Virtual Apps and Desktops Administration Sample Questions (Q24-Q29):

NEW QUESTION # 24

Scenario: A Citrix Administrator would like to review the history of logon performance and resource utilization for a Citrix Virtual Apps and Desktops Site over the past year. From which tab within Citrix Director could the administrator obtain this information?

- A. Trends
- B. Filters
- C. Alerts
- D. Dashboard

Answer: A

Explanation:

The Trends tab in Citrix Director provides historical reports, including logon performance and resource utilization, allowing administrators to review data over extended periods such as months or a year.

NEW QUESTION # 25

After creating a new machine catalog, a Citrix Administrator notices that the Virtual Delivery Agent (VDA) machines fail to register. What could the administrator have done to cause this condition?

- A. Selected an invalid VM naming scheme in Citrix Studio
- B. Failed to run the Citrix Health Assistant
- C. Failed to take a VM snapshot prior to creating the catalog
- D. Selected an incompatible VDA functional level in Citrix Studio

Answer: D

Explanation:

If an incompatible VDA functional level is selected when creating the machine catalog, the VDA machines cannot register with the Delivery Controllers. The functional level must match or be supported by the installed VDA software version.

NEW QUESTION # 26

A Citrix Administrator is looking to provide apps and desktops to users. Project requirements dictate that management and maintenance should be minimized for the administrator, while still maintain control of the Virtual Delivery Agent (VDA machines). (Choose three.)

- A. XenServer
- B. Microsoft HyperV
- C. Amazon Web Services
- D. Google Cloud Platform
- E. Nutanix Acropolis
- F. Microsoft Azure

Answer: C,D,F

Explanation:

Using public cloud platforms such as AWS, GCP, or Azure with Citrix Cloud services minimizes infrastructure management and maintenance for the administrator, while still providing control over the VDA machines. The cloud provider handles most of the underlying infrastructure, reducing administrative overhead.

NEW QUESTION # 27

A Citrix Administrator has enabled an HDX Session printers policy within a Citrix Virtual Apps and Desktops Site. The administrator added a printer to a print server and assigned the printer to all users through a session printer policy. In addition, several local client printers are auto-created within HDX sessions. No other printing policies are configured. How will print jobs be routed when users send print jobs to a printer managed by the print server?

- A. Over the HDX virtual channel to the specified printer attached to the print server
- B. Directly to the network print server and then to the specified printer
- C. Over the HDX virtual channel, through the endpoint, and then to the print server
- D. Directly from the session Virtual Delivery Agent (VDA) machine to the printer

Answer:

Explanation:

When using session printers from a print server, print jobs are routed directly from the VDA to the network print server, which then forwards them to the physical printer. The HDX virtual channel is only used for client printers, not for print server-based session printers.

NEW QUESTION # 28

Scenario: A Citrix Administrator previously configured a Citrix Virtual Desktops Site to use evaluation licenses. The administrator then installed valid advanced licenses on the Citrix License Server and confirmed that licenses show correctly in the licensing console. However, a user reports an issue about logging on to the published desktop. The user receives an error message stating that the evaluation license is about to expire. What should the administrator do to fix this issue?

- A. Change the product edition in Citrix Studio.
- B. Remove the evaluation license.
- C. Verify the host name entry in the license file.
- D. Restart the License service.

Answer: A

Explanation:

After installing valid licenses on the License Server, the Site must be configured in Citrix Studio to use the correct product edition (for example, Advanced, Enterprise, or Premium). If it remains set to "evaluation," users will continue to see the expiration warning. Updating the product edition in Studio resolves the issue.

NEW QUESTION # 29

.....

To get all these benefits you must have to pass the Citrix Virtual Apps and Desktops Administration (1Y0-205) certification exam which is not an easy task. It is a difficult task but you can make Test4Cram simple and quick. To do this you just visit Exams.
