## 300-710 Test Topics Pdf, New 300-710 Exam Review

Our Cisco 300-710 training materials are compiled by professional experts. All the necessary points have been mentioned in our Securing Networks with Cisco Firepower 300-710 practice engine particularly. About some tough questions or important points, they left notes under them. Besides, our experts will concern about changes happened in Securing Networks with Cisco Firepower 300-710 study prep all the time.

## Cisco Securing Networks with Cisco Firepower Sample Questions (Q79-Q84):

### NEW QUESTION # 79

An engineer must configure high availability for the Cisco Firepower devices. The current network topology does not allow for two devices to pass traffic concurrently. How must the devices be implemented in this environment?

- A. in active/active mode
- B. in a cluster span EtherChannel
- C. in cluster interface mode
- D. in active/passive mode

**Answer: D**

### NEW QUESTION # 80

Which Cisco Firepower feature is used to reduce the number of events received in a period of time?

- A. rate-limiting
- B. suspending
- C. thresholding
- D. correlation

**Answer: C**

Explanation:

<https://www.cisco.com/c/en/us/td/docs/security/firesight/541/firepower-module-user-guide/asa-firepower-module-user-guide-v541/Intrusion-Global-Threshold.html>

### NEW QUESTION # 81

The administrator notices that there is malware present with an .exe extension and needs to verify if any of the systems on the network are running the executable file. What must be configured within Cisco AMP for Endpoints to show this data?

- A. file analysis
- B. vulnerable software
- C. threat root cause
- **D. prevalence**

**Answer: D**

#### NEW QUESTION # 82

A company is deploying Cisco Secure Endpoint private cloud. The Secure Endpoint private cloud instance has already been deployed by the server administrator. The server administrator provided the hostname of the private cloud instance to the network engineer via email. What additional information does the network engineer require from the server administrator to be able to make the connection to Secure Endpoint private cloud in Cisco Secure Firewall Management Centre?

- **A. SSL certificate for the Secure Endpoint private cloud instance**
- B. Internet access for the Secure Endpoint private cloud to reach the Secure Endpoint public cloud
- C. IP address and port number for the connection proxy
- D. Username and password to the Secure Endpoint private cloud instance

**Answer: A**

Explanation:

To connect to a Secure Endpoint private cloud instance from Cisco Secure Firewall Management Center (FMC), the network engineer requires the SSL certificate for the Secure Endpoint private cloud instance. This SSL certificate is necessary to establish a secure, trusted connection between the FMC and the private cloud instance.

Steps:

- \* Obtain the SSL certificate from the server administrator.
- \* Import the SSL certificate into the FMC.
- \* Configure the connection to the Secure Endpoint private cloud instance using the provided hostname and SSL certificate.

This ensures a secure and authenticated connection to the private cloud instance.

#### NEW QUESTION # 83

A network administrator reviews the attack risk report and notices several low-impact attacks. What does this type of attack indicate?

- A. All attacks are listed as low until manually recategorized.
- B. The host is not within the administrator's environment.
- C. The attacks are not dangerous to the network.
- **D. The host is not vulnerable to those attacks.**

**Answer: D**

#### NEW QUESTION # 84

.....

To fit in this amazing and highly accepted exam, you must prepare for it with high-rank practice materials like our 300-710 study materials. They are the Best choice in terms of time and money. All contents of 300-710 training prep are made by elites in this area rather than being fudged by laymen.
