Real And Valid NCP-CN Exam Questions & Answers
Since our Nutanix Certified Professional - Cloud Native v6.10 practice exam tracks your progress and reports results, you can review these results and strengthen your weaker concepts. We offer Nutanix NCP-CN desktop practice test software which works on Windows computers after installation. The web-based NCP-CN practice exam needs no plugins or software installation. Linux, iOS, Android, Windows, and Mac support the web-based Nutanix NCP-CN Practice Exam. Additionally, Chrome, Opera, Firefox, Safari, Internet Explorer support this Nutanix Certified Professional - Cloud Native v6.10 NCP-CN web-based practice test.

Nutanix NCP-CN Exam Syllabus Topics:

Topic	Details
Topic 1	• Prepare the Environment for an NKP Deployment: This section of the exam measures the skills of infrastructure engineers and cloud administrators and covers the initial setup tasks needed for NKP deployment. Candidates must demonstrate the ability to seed a private container registry, create a bootstrap Kubernetes cluster, and determine license tiers suitable for clusters. They also need to prepare a bastion host for secure access, build machine images or prepare nodes for deployment, and gather all necessary information to build a cluster on the target cloud or on-premises provider.
Topic 2	• Manage Building an NKP Cluster: This section evaluates the skills of Kubernetes administrators and platform engineers in customizing and deploying NKP clusters. Candidates must show proficiency in tailoring cluster configurations to meet specific requirements and deploying Kommander, the management platform, while applying the appropriate licenses to enable cluster features and management capabilities.
Topic 3	• Conduct NKP Fleet Management: This section tests the abilities of platform administrators and cloud operations engineers in managing multiple clusters as a fleet. It focuses on configuring workspaces to organize clusters, deploying workload clusters within these workspaces, and attaching or detaching clusters as needed. Additionally, candidates must be able to configure projects for workload segmentation and manage platform applications that support the overall NKP environment.
Topic 4	• Perform Day 2 Operations: This part assesses the expertise of site reliability engineers and cluster operators in ongoing cluster management tasks after deployment. It includes configuring authentication and authorization mechanisms, setting up logging systems, and implementing cluster backup and recovery procedures. Candidates also need to demonstrate skills in monitoring cluster performance and health, configuring autoscaling to handle workload changes, and performing lifecycle management functions such as upgrades and maintenance.

Pass Guaranteed Quiz 2026 Professional Nutanix NCP-CN Interactive EBook

With the number of people who take the exam increasing, the NCP-CN exam has become more and more difficult for many people. A growing number of people have had difficulty in preparing for the NCP-CN exam, and they have a tendency to turn to the study materials. However, a lot of people do not know how to choose the suitable study materials. We are willing to recommend the NCP-CN Study Materials from our company to you.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q59-Q64):

NEW QUESTION # 59
A Platform Engineer is deploying an NKP workload cluster using the nkp create cluster vsphere command. The cluster will be utilized by the company's code-green team and the engineer has already created a code-green NKP workspace on the NKP management cluster.
After issuing the deploy command, the engineer monitored the build using the nkp describe cluster command and confirmed it completed successfully. However, a few hours later, after logging into the NKP UI, the engineer checked the code-green NKP workspace and saw that the NKP workload cluster was not there.
What is the likely reason the NKP workload cluster is not in the code-green NKP workspace?

- A. NKP vSphere clusters cannot be assigned NKP workspaces and instead are assigned the default NKP workspace. The cluster can be viewed from this workspace instead.
- B. The vSphere service account credentials had expired prior to the engineer's attempt to view the cluster in the NKP UI. Once the credentials are refreshed, the vSphere cluster will reappear in the NKP workspace.
- C. The vSphere cluster cannot be displayed in the NKP UI unless its Kubernetes version is within 'N - 1' versions of the NKP management cluster's Kubernetes version.
- D. The engineer did not supply the --namespace code-green parameter as part of the nkp create cluster vsphere command, therefore it was created in the default workspace and needs to be manually attached.

Answer: D

NEW QUESTION # 60
A Cloud Engineer is deploying an NKP management cluster and plans to deploy multiple NKP workload clusters from it. The management cluster will be on Nutanix infrastructure, but the NKP workload clusters may be deployed in multiple provisioning environments, such as:
Nutanix
AWS
AzureWhen the engineer deploys an NKP workload cluster in AWS, which two default behaviors will be performed by NKP on this newly-deployed cluster? (Choose two.)

- A. The NKP workload cluster will receive all of the GitOps sources that have been assigned to the NKP workspace.
- B. The NKP workload cluster will also be assigned to all of the NKP projects that have been created within the NKP workspace.
- C. The NKP workload cluster will receive all of the NKP RBAC policy that has been assigned to this NKP workspace.
- D. The NKP workload cluster will be deployed all of the applications that have been enabled on this NKP workspace.

Answer: A,D

NEW QUESTION # 61
A Platform Engineer needs to utilize the Konvoy Image Builder for building a custom operating system image. This image will be used to deploy clusters on various platforms. The engineer has been tasked with creating an OS image compatible with Konvoy's requirements. In order to successfully build a compatible image using the Konvoy Image Builder, the engineer needs to ensure that a development environment meets the necessary prerequisites.
Which system is required to create a compatible OS image with the Konvoy Image Builder?

- A. A 32-bit Windows machine with a USB connection

- B. A virtualized arm64 environment using KVM
- C. An x86_64-based Linux or MacOS Machine
- D. A lambda instance within an AWS account

Answer: C

NEW QUESTION # 62

A development team is working on a new application that requires access to certain cluster resources. The team needs to ensure that they have limited permissions to avoid unauthorized changes in other environments. Among the tasks they will perform are the following:
Deploy new versions of the application to their specific namespace.
Scale deployments according to demand.
View logs and metrics of their applications to monitor performance. When using the NKP GUI, what type of access should the team configure?

- A. Kommander Role
- B. NKP Role
- C. Cluster Role
- D. Cluster Admin

Answer: B

NEW QUESTION # 63

Refer to the exhibit.

A Platform Engineer is preparing to deploy an NKP cluster in an air-gapped environment. The NKP cluster will be deployed on Nutanix infrastructure using the CAPI Nutanix provisioner (CAPX). The engineer has decided to create the bootstrap cluster first, then NIB-prep an Ubuntu 22.04 OS image that the Linux engineering team has provided in Prism Central. After that, the engineer will deploy the NKP cluster. However, during the first step of creating a bootstrap cluster, the engineer received the error shown in the exhibit. What could be the reason?

- A. The CAPI provisioning method needs to be specified as part of the command nkp create bootstrap nutanix.
- B. The bootstrap cluster image needs to be loaded prior to creating the bootstrap cluster.
- C. The nkp create bootstrap command needs to be executed as root.
- D. The Ubuntu 22.04 OS image needs to be NIB-prepped prior to creating the bootstrap.

Answer: B

NEW QUESTION # 64

......

When you take ActualCollection Nutanix NCP-CN practice exams, you can know whether you are ready for the finals or not. It shows you the real picture of your hard work and how easy it will be to clear the NCP-CN exam if you are ready for it. So, don't miss practicing the NCP-CN Mock Exams and score yourself honestly. You have all the time to try Nutanix NCP-CN practice exams and then be confident while appearing for the final turn.
