## Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q64-Q69):

### NEW QUESTION # 64

A customer has deployed OnCommand Unified Manager and wants to use it to manage their data protection relationships within their NetApp storage infrastructure.

In this scenario, which additional component must be deployed to satisfy this requirement?

- A. OnCommand System Manager
- B. NetApp SnapCenter
- C. OnCommand Cloud Manager
- D. OnCommand Workflow Automation

**Answer: D**

**NEW QUESTION # 65**

Your customer wants to create application-aware backups of their SAP HANA databases, which are running on VMware vSphere. What two steps must be completed to create these backups? (Choose two.)

- A. Install the plug-in for VMware vSphere in SnapCenter software.
- **B. Install the plug-in for SAP HANA in SnapCenter software.**
- **C. Create a policy when given the retention requirements by the customer.**
- D. Install the plug-in for Unix file systems.

**Answer: B,C**

Explanation:

To create application-aware backups of SAP HANA databases:

\* You must install the SnapCenter Plug-in for SAP HANA, which provides database-consistent backup and restore operations.

\* You must also create a backup policy that aligns with the customer's retention requirements to manage how long backups are kept and how often they're performed.

**NEW QUESTION # 66**

What is the importance of disaster recovery planning in a data protection solution?

- A. To ensure data compliance in case of a disaster
- B. To ensure data confidentiality in case of a disaster
- C. To ensure data integrity in case of a disaster
- **D. To ensure data availability in case of a disaster**

**Answer: D**
