Free PDF Efficient Oracle - Trustworthy 1z0-1080-25 Source

Our company is a professional certificate exam materials provider, we have occupied in this field for years, and we have rich experiences. In addition, 1z0-1080-25 exam materials contain both questions and answers, and you can have a quickly check after payment. 1z0-1080-25 training materials cover most of knowledge points for the exam, and you can master the major knowledge points for the exam as well as improve your professional ability in the process of learning. We have online and offline chat service staff for 1z0-1080-25 Training Materials, and they possess the professional knowledge, if you have any questions, you can consult us.

We provide the Oracle 1z0-1080-25 exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files. TestKingIT provides proprietary preparation guides for the certification exam offered by the 1z0-1080-25 Exam Dumps. In addition to containing numerous questions similar to the 1z0-1080-25 exam, the Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam questions are a great way to prepare for the Oracle 1z0-1080-25 exam dumps.

1z0-1080-25 Training Pdf | 1z0-1080-25 Vce Format

This society is ever – changing and the test content will change with the change of society. You don't have to worry that our 1z0-1080-25 study materials will be out of date. In order to keep up with the change direction of the exam, our question bank has been constantly updated. We have dedicated IT staff that checks for updates every day and sends them to you automatically once they occur. The update for our 1z0-1080-25 Study Materials will be free for one year and half price concession will be offered one year later.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 2	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 3	• Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.

Topic 4	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 5	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 6	• Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 7	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 8	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 9	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 10	• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 11	• Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 12	• Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 13	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 14	• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 15	• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 16	• Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 17	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.

Oracle Planning 2025 Implementation Professional Sample Questions (Q26-Q31):

NEW QUESTION # 26
Which three actions can you perform with Valid Intersections?

- A. Prevent users from executing any type of Calculation Manager rule that uses runtime prompts.
- B. Filter cell intersections to users when they enter data or select runtime prompts.
- C. Specify that certain programs are valid only for some periods or departments.
- D. Allow all users to select from a nonfiltered list of members on the form's point of view.
- E. Restrict cells containing invalid data, setting them to a read-only state within forms.

Answer: B,C,D

NEW QUESTION # 27
Which three are configuration or post-configuration tasks for Financials?

- A. Adding custom expense driver categories
- B. Removing custom dimensions
- C. Adding custom dimensions
- D. Setting up exchange rates (for multicurrency applications)
- E. Completing Planning and Forecast Preparation

Answer: C,D,E

Explanation:
In Oracle Planning 2024, configuring and post-configuring the Financials module involves tasks to establish its structure and functionality. The three valid configuration or post-configuration tasks are:
* A. Adding custom expense driver categories: Incorrect. While Financials supports driver-based planning (e.g., revenue drivers), adding custom expense driver categories is not a standard configuration task-it's more of a customization within forms or rules, not a core setup step.
* B. Adding custom dimensions: Correct. Adding custom dimensions (e.g., Region, Product) is a key configuration task in Financials to tailor the module to business needs, often done during or shortly after initial setup.
* C. Completing Planning and Forecast Preparation: Correct. This mandatory configuration task defines the planning periods, scenarios, and versions for Financials, setting the foundation for budgeting and forecasting.
* D. Setting up exchange rates (for multicurrency applications): Correct. For multicurrency-enabled Financials applications, configuring exchange rates is a critical task during or post-configuration to support currency conversion in financial planning.
* E. Removing custom dimensions: Incorrect. Removing dimensions is not a standard configuration or post-configuration task-it's a rare adjustment that could disrupt existing data and is not recommended as part of setup.
The Oracle documentation identifies B, C, and D as essential tasks during or after Financials configuration, ensuring the module meets planning and reporting requirements.
References:
Oracle Planning 2024 Implementation Study Guide: "Financials Configuration Tasks" (docs.oracle.com, Published 2024-10-15).
Oracle EPM Cloud Documentation: "Setting Up Financials" (docs.oracle.com, Published 2023-12-15, updated for 2024).

NEW QUESTION # 28
You want to copy data between two Planning instances. Which three tasks must you complete so you can copy the data?

- A. Associate the data map with a form.
- B. Define an EPM Connection to the source instance.
- C. Define an EPM Connection to the target instance.
- D. Define a data map with Remote Cube as the target.
- E. Enable cross-POD mapping on the Smart Push card.

Answer: A,C,D

NEW QUESTION # 29
Which three are required when enabling Flexible Account Mapping in Workface?

- A. Specify whether Mapping Drivers should be based on Grade or on Defaults for the application.
- B. Map Salary and Merit from Workface to the same account in Financials and Projects.
- C. Enable Flexible Account Mapping only when you bring your own chart of accounts in Financials.
- D. For Mapping Level, specify whether the mapping should be done at the Global level (the same mapping for every entity) or at the Entity level.
- E. Enable Financials and the Financials Expense planning option to enable this feature.

Answer: A,D,E

NEW QUESTION # 30
Which three statements are true about importing metadata from a flat file into Planning?

- A. You can rename or delete members of attribute dimensions during a metadata import.
- B. You can use the import file functionality to import more metadata or to perform incremental updates from the source system.
- C. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server.
- D. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record.
- E. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified.

Answer: B,D,E

Explanation:
In Oracle Planning 2024, importing metadata from a flat file into Planning involves specific rules and capabilities. The three true statements are:
* A. You can rename or delete members of attribute dimensions during a metadata import: Incorrect.
Metadata imports update dimension members (e.g., adding, updating properties), but renaming or deleting attribute dimension members is not directly supported via flat file import-it requires manual action or a separate process.
* B. You can import data forms, dashboards, and infolets by loading a local import file or an import file from the Inbox server: Incorrect. Flat file imports are for metadata (e.g., dimensions, members), not artifacts like forms, dashboards, or infolets, which are managed via Migration or Application tools.
* C. Your import file must contain a list of metadata records. Each metadata record contains a delimited list of property values that matches the order designated in the header record: Correct. The import file format requires a header defining properties (e.g., Name, Parent) and subsequent records with delimited values (e.g., CSV) matching that order, a standard requirement for metadata imports.
* D. When selecting to clear members during import, any member not specified is deleted from the outline after importing the dimension unless it is an ancestor of a member that was specified, or is a base member of a shared member that was specified: Correct. When the "Clear Members" option is selected, unspecified members are removed, but ancestors of specified members and base members of shared members are retained to maintain hierarchy integrity.
* E. You can use the import file functionality to import more metadata or to perform incremental updates from the source system: Correct. Metadata imports support both full loads and incremental updates, allowing administrators to add or modify members as needed from a source system.
The Oracle documentation verifies that C, D, and E accurately describe the metadata import process, making them the correct answers.
