

2026 PL-600 Latest Braindumps Files | Latest PL-600 Exam Syllabus: Microsoft Power Platform Solution Architect

P.S. Free 2026 Microsoft PL-600 dumps are available on Google Drive shared by ITCertMagic: <https://drive.google.com/open?id=1X3IC6YigmB7cCrJQNVHU0jd34zKKI0bg>

As we entered into such a web world, cable network or wireless network has been widely spread. And it is easier to find an online environment to do your practices. This version of PL-600 test prep can be used on any device installed with web browsers. We specially provide a timed programming test in this online PL-600 Test Engine, and help you build up confidence in a timed exam. With limited time, you need to finish your task in PL-600 quiz guide, considering your precious time, we also suggest this version of PL-600 study guide that can help you find out your problems to pass the exam.

Microsoft PL-600 certification exam is designed for professionals who want to demonstrate their expertise in designing and implementing solutions using Microsoft Power Platform. PL-600 exam is intended for solution architects who are responsible for leading the design and implementation of Power Platform solutions in organizations. Microsoft Power Platform Solution Architect certification exam tests the candidate's knowledge in various areas of Power Platform, including Data Modeling, User Experience, Platform Automation, Integration, and Security.

Microsoft Power Platform is a powerful tool for businesses to automate processes, analyze data, and build custom applications. The PL-600 certification is an excellent way for individuals to demonstrate their expertise in using the Power Platform to solve business problems. With the increasing demand for digital transformation, the PL-600 Certification can help individuals advance their careers and make them more valuable to their organizations.

Microsoft PL-600 certification exam is an advanced-level exam that requires a deep understanding of Power Platform and its various components. PL-600 exam consists of multiple-choice questions, scenario-based questions, and performance-based tasks that evaluate the candidate's ability to apply Power Platform concepts and best practices to real-world scenarios. PL-600 exam is timed, and candidates are required to complete it within a specific time frame. A passing score in the exam indicates that the candidate has the necessary skills and knowledge to design and implement Power Platform solutions.

PL-600 Exam Syllabus - PL-600 Valid Mock Exam

People always want to prove that they are competent and skillful in some certain area. The ways to prove their competences are varied but the most direct and convenient method is to attend the certification exam and get some certificate. The PL-600 exam questions have simplified the sophisticated notions. The software boosts varied self-learning and self-assessment functions to check the learning results. The software of our PL-600 Test Torrent provides the statistics report function and help the students find the weak links and deal with them.

Microsoft Power Platform Solution Architect Sample Questions (Q180-Q185):

NEW QUESTION # 180

A company has a Power Platform solution that integrates with a third-party system. The client reports that unexpected updates are being made to the Accounts table. You need to determine the root cause of the issue. In which three locations should you investigate? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. SDK Message Processing Steps
- B. Plug-in trace log
- C. Audit summary view
- D. Solution history
- E. System job run history

Answer: B,C,D

Explanation:

A: How to View Auditing Log Details?

System administrators can see activities for the entities that are enabled for audit logging. To view the audit logs:

* Go to Settings > System>Auditing.

* Choose Audit Summary View.

* Under Audit Summary View, you will see the list of audit entries

B: You can view details about solution operations from the Solutions area of Power Apps. An operation can be a solution import, export, or uninstall. The solution history displays information such as solution version, solution publisher, type of operation, operation start and end time, and operation status.

D: Trace log records are written to the PluginTraceLog Table. Writing of these records is controlled by the trace settings mentioned in Enable trace logging.

This data can be found in model-driven applications by navigating to Settings and choosing the Plug-in Trace Log tile.

NEW QUESTION # 181

A company plans to create a Microsoft Power Platform solution that integrates with Dynamics 365 Sales. The solution must meet the following requirements:

* Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.

* An external system needs to send data to the company's Dynamics 365 Sales solution.

You need to recommend the most suitable solution to integrate Dynamics 365 Sales with both systems.

What should you recommend? To answer, select the appropriate option in the answer area.

Answer Area

Integration requirement	Solutions
Have read-only visibility of data from an external Azure SQL database.	<ul style="list-style-type: none">Use virtual tables.Use a custom plug-in.Use Dynamics 365 Web API.Use a web resource to display data.
External system sends data to Dynamics 365 Sales.	<ul style="list-style-type: none">Use a custom plug-in.Use Dynamics 365 Web API.Use a web resource to display data.

Answer:

Explanation:

The screenshot shows the 'Answer Area' with the same requirements and solutions as above. In the solution boxes, the following options are highlighted with red boxes:

- For the first requirement: 'Use a custom plug-in.', 'Use Dynamics 365 Web API.', and 'Use a web resource to display data.'
- For the second requirement: 'Use Dynamics 365 Web API.' and 'Use a web resource to display data.'

NEW QUESTION # 182

A company plans to integrate a model-driven app with external data sources. The company has the following requirements:

- * Consume data in its data warehouse from Microsoft Dataverse.
- * Use a plug-in to retrieve information from an external service.

You need to recommend a Microsoft Azure component for each requirement.

Which Azure components should you recommend? To answer, drag the appropriate Azure components to the correct requirements. Each Azure component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows the 'Answer Area' with the following components:

- Requirement:**
 - Consume data in a data warehouse.
 - Consume data from an external source.
- Azure component:**
 - Azure Event Hub
 - Azure Service Bus
 - Azure Data Factory
 - Azure Synapse Link

Answer:

Explanation:

The screenshot shows the 'Answer Area' with the same components as above. The following components are selected for the requirements:

- For 'Consume data in a data warehouse': Azure Data Factory
- For 'Consume data from an external source': Azure Service Bus

Explanation:

<input type="checkbox"/> Azure Event Hub <input type="checkbox"/> Azure Service Bus <input type="checkbox"/> Azure Data Factory <input type="checkbox"/> Azure Synapse Link	Answer Area <table border="1"> <thead> <tr> <th>Requirement</th> <th>Azure component</th> </tr> </thead> <tbody> <tr> <td>Consume data in a data warehouse.</td> <td><input type="text" value="Azure Data Factory"/></td> </tr> <tr> <td>Consume data from an external source.</td> <td><input type="text" value="Azure Service Bus"/></td> </tr> </tbody> </table>	Requirement	Azure component	Consume data in a data warehouse.	<input type="text" value="Azure Data Factory"/>	Consume data from an external source.	<input type="text" value="Azure Service Bus"/>
Requirement	Azure component						
Consume data in a data warehouse.	<input type="text" value="Azure Data Factory"/>						
Consume data from an external source.	<input type="text" value="Azure Service Bus"/>						

NEW QUESTION # 183

An animal welfare organization wants to track the movement of wolf packs in a region. Cameras at specific locations capture images when motion is detected within the camera sensor range. Staff upload the images manually to a shared drive and then analyze the images.

The organization wants to automate image capture and analysis. The organization has the following requirements:

Save captured images in an appropriate location.

Analyze saved images by using an image recognition process.

Display data in real-time dashboards.

You need to recommend the correct technology for the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Technology option
Save captured images in an appropriate location.	<input type="text" value="Business process flow"/> <input type="text" value="Desktop flow"/> <input type="text" value="Instant cloud flow"/> <input type="text" value="Automated cloud flow"/>
Analyze saved images by using an image recognition process.	<input type="text" value="Instant cloud flow and AI Builder"/> <input type="text" value="Automated cloud flow and AI Builder"/> <input type="text" value="Desktop flow and AI Builder"/>
Display data in real-time dashboards.	<input type="text" value="Dynamics 365 interactive experience dashboard"/> <input type="text" value="Model-driven app dashboard with native graphs"/> <input type="text" value="Model-driven app dashboard with Power BI"/>

Answer:

Explanation:

Requirement	Technology option
Save captured images in an appropriate location.	<ul style="list-style-type: none"> Business process flow Desktop flow Instant cloud flow Automated cloud flow
Analyze saved images by using an image recognition process	<ul style="list-style-type: none"> Instant cloud flow and AI Builder Automated cloud flow and AI Builder Desktop flow and AI Builder
Display data in real-time dashboards.	<ul style="list-style-type: none"> Dynamics 365 interactive experience dashboard Model-driven app dashboard with native graphs Model-driven app dashboard with Power BI

NEW QUESTION # 184

You are designing a solution for a national vehicle repair company.

You have the following requirements:

- Customers must search for vehicle issues by using natural language expressions.
- Customers must contact a customer service agent as required.

You need to recommend a solution.

Which two features should you include? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Customer Insights
- **B. Power Apps portal**
- C. Business process flow
- **D. Power Virtual Agents**

Answer: B,D

Explanation:

Business Process Flows are for licensed users, not customers. They also do not provide a method to contact agents. Power Virtual Agents on the portal will assist customers with contacting a live agent if they need assistance.
