I27001F資格認定試験、I27001F日本語資格取得

CertiProf I27001F認定資格試験が難しいので、弊社のI27001F問題集はあなたに相当する認定資格試験問題集を見つけるし、本当の試験問題の難しさを克服することができます。弊社はCertiProf I27001F認定試験の最新要求に従って関心を持って、全面的かつ高品質な模擬試験問題集を提供します。また、購入する前に、無料でI27001FのPDF版デモをダウンロードでき、信頼性を確認することができます。

CertiProf I27001F 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">ISO 27001:2022 Annex A: This domain outlines the set of security controls listed in Annex A of the standard. It explains how these controls are selected and applied to mitigate identified risks within an ISMS.

トピック 2	<ul style="list-style-type: none"> Principles, concepts and the requirements of ISO IEC 27001:2022: This domain covers the core principles, key concepts, and mandatory requirements of the ISO IEC 27001:2022 standard. It explains how information security is structured, managed, and aligned with organizational objectives.
トピック 3	<ul style="list-style-type: none"> How to Develop an ISMS: This section focuses on the process of establishing and implementing an Information Security Management System (ISMS). It includes planning, risk assessment, and applying appropriate controls to protect information assets.

CertiProf Certified ISO/IEC 27001:2022 Foundation 認定 I27001F 試験問題 (Q30-Q35):

質問 # 30

What relevant factor must be considered in internal audit programmes?

- A. Availability of the certification body auditors
- B. The importance of the processes concerned and the results of previous audits**
- C. Ensuring that audits are carried out at least twice during the first year of ISMS implementation
- D. The number of third-party suppliers involved in the area to be audited

正解: B

解説:

ISO/IEC 27001:2022 requires the organization to plan, establish, implement, and maintain an audit programme that takes into consideration the importance of the processes concerned and the results of previous audits. This ensures that audit effort is focused appropriately and that past issues are followed up effectively.

The standard does not prescribe a minimum of two audits in the first year, nor does it make certification body availability or supplier count the defining factors. Therefore, option C is correct.

質問 # 31

What does ISO/IEC 27001:2022 require for information security risk assessment?

- A. Applying an information security risk assessment process that establishes and maintains information security risk criteria**
- B. A consultancy to perform the information security risk assessment professionally
- C. Acquisition of a set of information security tools to automate the assessment using artificial intelligence
- D. A person designated by top management

正解: A

解説:

ISO/IEC 27001:2022 does not require a specific tool, consultant, or named individual as the basis for compliance. What it does require is that the organization define and apply an information security risk assessment process that establishes and maintains risk criteria, ensures consistent, valid, and comparable results, identifies risks, analyzes risks, and evaluates risks. Therefore, option A is the correct answer.

質問 # 32

What are the phases of the PDCA cycle?

- A. Plan, Do, Verify, Assure
- B. Plan, Validate, Verify, Act
- C. Plan, Do, Check, Act**
- D. Propose, Do, Validate, Act

正解: C

解説:

The PDCA cycle stands for Plan, Do, Check, Act. It is a management model commonly associated with management systems, including the implementation and continual improvement of an ISMS. In the context of ISO/IEC 27001:2022, this logic supports planning the ISMS, implementing and operating it, monitoring and reviewing performance, and taking actions for continual improvement. Therefore, option B is correct.

質問 # 33

What is the purpose of management review in ISO/IEC 27001:2022?

- A. To ensure that the information security policy matches all identified risks
- **B. To ensure the continuing suitability, adequacy, and effectiveness of the ISMS**
- C. To ensure that employees receive information about updates to information security policies
- D. To ensure that the information security policy covers all controls indicated in ISO/IEC 27001

正解: B

解説:

ISO/IEC 27001:2022 requires top management to review the organization's ISMS at planned intervals to ensure its continuing suitability, adequacy, and effectiveness. Management review is a formal requirement under performance evaluation and is intended to confirm that the ISMS continues to support the organization's objectives and strategic direction. It is broader than policy review alone and is not limited to communication or Annex A coverage. Therefore, option C is correct.

質問 # 34

Management review must include consideration of:

- A. Changes in external and internal issues that are relevant to the ISMS
- B. The status of actions from previous management reviews
- **C. All of the above**
- D. Opportunities for continual improvement

正解: C

解説:

ISO/IEC 27001:2022 specifies the inputs to management review. These include changes in external and internal issues relevant to the ISMS, feedback on performance including nonconformities and corrective actions, follow-up actions from previous reviews, and opportunities for continual improvement. Since all of the listed elements are valid management review inputs, the correct answer is D.

質問 # 35
