Download Valid H19-301_V4.0 Dumps for Best Preparation

Exam : H19-301_V4.0

Title : HCSA-Presales-IP Network
V4.0

https://www.passcert.com/H19-301_V4.0.html

1 / 4

P.S. Free 2025 Huawei H19-301_V4.0 dumps are available on Google Drive shared by Real4test: https://drive.google.com/open?id=1HLp6mK_rsC10WcyQ4Vy9kktuICZodx5A

With the help of our H19-301_V4.0 Latest Dumps Pdf, you just need to spend one or two days to practice the H19-301_V4.0 training materials. If you remember the key points of study guide, you will pass the real exam with hit-rate. You can trust us about the valid and accuracy of Huawei braindumps because it created by our experienced workers and based on the real questions.

Our H19-301_V4.0 exam questions generally raised the standard of practice materials in the market with the spreading of higher standard of knowledge in this area. So your personal effort is brilliant but insufficient to pass the HCSA-Presales-IP Network V4.0 exam and our H19-301_V4.0 test guide can facilitate the process smoothly & successfully. Our HCSA-Presales-IP Network V4.0 practice materials are successful by ensuring that what we delivered is valuable and in line with the syllabus of this exam. And our H19-301_V4.0 Test Guide benefit exam candidates by improving their ability of coping the exam in two ways, first one is their basic knowledge of it.

Valid H19-301_V4.0 Test Cram, New H19-301_V4.0 Study Guide

Real4test never hits its customers with any kind of scam instead they are offered with 100% authentic products for Huawei H19-301_V4.0 exam preparation. It is our honor to serve you with ever best offering and delivering the core values for your spent pennies. Failure is unusual with H19-301_V4.0 training but if any misfortune leads you towards failure, no issues for financial loss. Real4test will repay you all the charges that you have paid for our H19-301_V4.0 exam products.

Huawei HCSA-Presales-IP Network V4.0 Sample Questions (Q15-Q20):

NEW QUESTION # 15

The high-quality experience assurance card on Huawei CloudEngine S8700 is the core hardware of switches in the centralized application experience upgrade solution.

- A. True
- B. False

Answer: A

Explanation:

The CloudEngine S8700 is a modular switch designed for high-performance, high-visibility campus networks.

Huawei equips this series with an "Experience Assurance Card," which enables:

Real-time traffic identification

Application-level statistics collection

In-path traffic analysis for performance bottlenecks

This hardware is central to the centralized experience assurance solution offered in the High-Quality 10 Gbps Campus Network.

Product Overview # Experience Card Highlights

NEW QUESTION # 16

In the NAC solution, which of the following authentication modes does not require users to install any client software and is applicable to scenarios where dumb terminals such as IP phones and printers need to access the network?

- A. 802.1X authentication
- B. MAC address authentication
- C. Portal authentication
- D. Wireless authentication

Answer: B

Explanation:

MAC address authentication (also known as MAC bypass authentication) is typically used for non-intelligent endpoints such as printers, IP phones, and IoT devices that cannot run client software or access a portal for login.

The authentication process is completed by identifying the device's MAC address and mapping it to predefined policies in the NAC system.

It does not require client installation or human interaction - making it ideal for "dumb terminals." By contrast, 802.1X and portal authentication require software clients or web-based logins and are designed for user-driven authentication.

#####

NEW QUESTION # 17

Which of the following are core capabilities of Huawei's data center network solution? (Select all that apply)

- A. One platform for simplified deployment: zero configuration errors
- B. One network for diverse computing: zero service interruptions
- C. Ultra-stable reliability: all-scenario assurance, sustainable computing power
- D. One map for intelligent O&M: zero management concerns

Answer: A,B,C,D

Explanation:

Huawei's Data Center Network Solution, part of the CloudFabric architecture, highlights four core capabilities:

A: Ultra-stable reliability - Ensures 99.999% availability, delivering sustainable computing and fault-tolerant network infrastructure across various failure scenarios.

B: One network for diverse computing - Seamlessly supports diverse workloads (e.g., HPC, AI, traditional computing) with non-blocking fabric and intelligent forwarding, ensuring zero interruptions.

C: One map for intelligent O&M - Uses Huawei's iMaster NCE to provide full-network visibility, proactive alarms, and AI-driven assurance, addressing O&M concerns.

D: One platform for simplified deployment - Enables centralized automation with zero-touch provisioning, minimizing configuration errors.

#####

NEW QUESTION # 18

Which of the following factors is not related to the AI computing network?

- A. Single-card computing power
- B. Cluster availability
- C. Cluster scale
- D. Cluster efficiency

Answer: A

Explanation:

An AI computing network focuses on interconnecting large numbers of servers and AI accelerators to:

Scale the cluster size efficiently (A)

Ensure cluster-wide efficiency in data exchange and training convergence (B) Maintain high availability of the overall AI computing system (C) D: Single-card computing power refers to individual GPU/AI chip capabilities, which is a hardware-level concern, not a network-level performance factor.

NEW QUESTION # 19

Which of the following technologies can improve the reliability of firewalls?

- A. Security
- B. policies
- C. VLAN
- D. NAT HRP

Answer: D

Explanation:

NAT HRP (Hot Standby High Reliability Protocol) is used in Huawei firewalls to synchronize NAT sessions and state information between the active and standby firewalls. This enables seamless failover without session interruption, thereby improving the reliability of the firewall deployment.

A: VLAN is used for logical segmentation

B: Security is a broad concept, not a specific technology

C: Policies govern traffic handling but don't impact hardware reliability directly
