### **Salesforce Certified Advanced Administrator Sample Questions (Q206-Q211):**

#### **NEW QUESTION # 206**

AW Computing is running a special bundle deal on monitors and keyboards. Normally, discounts need VP approval, but this special bundle is pre-approved.

What should the administrator recommend for these requirements?

- A. Create a separate price book.
- B. Enable Subscriptions.
- C. Remove the approval process.
- **D. Implement CPQ.**

**Answer: D**

#### **NEW QUESTION # 207**

Support Records with a specific record type needs the access restricted to only a Support Manager and four support users. What can you do as a system administrator?

- A. Give the "View All Data" permission to the 5 mentioned users using permission sets.
- **B. Create a criteria based sharing rule for the 5 users.**
- C. Create a new profile and assign the 5 users to the new profile.
- D. Remove the record type access for all users except the 5 mentioned.

**Answer: B**

#### **NEW QUESTION # 208**

At Cloud Kicks, users are able to run reports. However, when users try to export a report, they are taken to a login screen and prompted for additional verification.

What is causing this issue?

- A. The users' profile is missing the Export Reports permission.
- B. The users are logged into an Insecure network.
- C. Users need to update their browser to the latest version.
- **D. Exporting is configured to require a high assurance session.**

**Answer: D**

Explanation:

A high assurance session is a type of session security level that requires users to verify their identity using a second factor of authentication, such as Salesforce Authenticator, a verification code, or a security key.

Administrators can configure certain actions or permissions to require a high assurance session, such as exporting reports, viewing encrypted data, or accessing connected apps.

If users are able to run reports but are taken to a login screen and prompted for additional verification when they try to export a report, it could be because exporting is configured to require a high assurance session. This means that users need to use a second factor of authentication to export reports, even if they have already logged in with their username and password. References:
