Are you planning to crack the Pegasystems Certified Pega Robotics System Architect 22 PEGACPRSA22V1 certification test in a short time and don't know how to prepare for it? Prep4King has updated PEGACPRSA22V1 Dumps questions for the applicants who want to prepare for the Pegasystems PEGACPRSA22V1 Certification test successfully within a few days. This study material is available in three different formats that you can trust to crack the Pegasystems PEGACPRSA22V1 certification test with ease.

The Pega Robotics System Architect 22 exam is based on the latest version of the Pega Robotic Automation platform. Applicants who Pass PEGACPRSA22V1 Exam will be able to demonstrate their proficiency in the latest features and functionalities of the platform. Certified Pega Robotics System Architect 22 certification exam is ideal for developers, architects, and consultants who are interested in building automation solutions that can automate repetitive tasks and improve operational efficiency.

Latest PEGACPRSA22V1 Exam Registration | PEGACPRSA22V1 Practice Test Pdf

It is of no exaggeration to say that sometimes a certification is exactly a stepping-stone to success, especially when you are hunting for a job. The PEGACPRSA22V1 study materials are of great help in this sense. People with initiative and drive all want to get a good job, and if someone already gets one, he or she will push for better position and higher salaries. With the PEGACPRSA22V1 test training, you can both have the confidence and gumption to ask for better treatment. To earn such a material, you can spend some time to study our PEGACPRSA22V1 study torrent. No study can be done successfully without a specific goal and a powerful drive, and here to earn a better living by getting promotion is a good one.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q12-Q17):

NEW QUESTION # 12

An Insurance Call Center project requires the use of the Interaction Framework. The supporting applications should perform specific work when processing claims. The claim requires the claim number and the claim date, but it may also share other claim information in the interaction's context values.

Based on the information, which interaction.xml activity entry configures the project requirements?

□

- A. Exhibit C
- B. Exhibit A
- C. Exhibit B
- D. Exhibit D

Answer: D

NEW QUESTION # 13

You are automating the login process for a web application. There are three possible scenarios that may occur:

(1) You may successfully login, (2) you may not be successful logging in, or (3) you may log in but go to the change password screen.

Which control from the Toolbox do you use to determine which page you were on after performing the login function?

- A. Signal
- B. WaitAll
- C. WaitAny
- D. Switch

Answer: C

NEW QUESTION # 14

Pega Robot Studio produces several log files during the opening, building, debugging, and deployment of a solution.

In the Answer Area, drag the description of the log file on the left to its correct log file name.

□

Answer:

Explanation:

□

References:

NEW QUESTION # 15

Pega Robot Studio has several methods to manage the flow of an automation depending on when a control is matched.

In the Answer Area, drag the description on the left to its matching Design Block.

□

Answer:

Explanation:

□

NEW QUESTION # 16

Within your project for a car renting company, you create an automation that reads data From an online form and calls a subautomation that saves that data in the company's application. The UpdateCustomerDetails subautomation has two exit points, Success and Failure, and two output parameters. Result and errCode.

Which figure represents this subautomation?

- A. □
- B. □
- C. □
- D. □

Answer: C

Explanation:

* Pega Robotics Studio - Automation Design Concepts (Entry/Exit Points & Parameters)

"An automation can expose multiple exit points (for example, Success and Failure) and can define output parameters that return values to the caller. When the automation completes, the appropriate exit point is raised and the output parameters are made available to the caller."

* Pega Robotics Studio - Calling Automations (Run and Parameter Mapping)

"When one automation calls another, the called automation appears as a component with input parameters, output parameters, and exit points. The caller wires the Success/Failure exits to the next steps and maps output parameters (for example, result, errCode) to downstream logic." Why Option C is correct:

* The UpdateCustomerDetails block in Option C clearly shows two exit points - Success and Failure

- and two output parameters - result and errCode - on the subautomation.

* The wiring demonstrates a typical pattern:

* On Success, the flow proceeds to a success path with result available.

* On Failure, the flow proceeds to a failure path with errCode available (the extra, unused result pin on the failure jump is permissible but not required).

* This matches the specification precisely: two exits (Success/Failure) and two outputs (result, errCode).

Why the other options are not correct:

* Option A: Shows errCode but does not expose result clearly as an output to the success path.

* Option B: The component does not display errCode as an output parameter of the subautomation.

* Option D: Emphasizes an additional boolean/conditional output and maps result on the failure path, which does not reflect the stated definition of the subautomation outputs.

Document Sources (Exact Extracts Reference):

* Pega Robotics Studio User Guide - Automation Design Concepts: Entry/Exit Points and Parameters.

* Pega Robotics Studio User Guide - Calling Automations and Mapping Inputs/Outputs.

* Pega Robotics System Certification Study Material - Subautomation design patterns (Success/Failure with output parameters).

NEW QUESTION # 17

.....

Many students often start to study as the exam is approaching. Time is very valuable to these students, and for them, one extra hour of study may mean 3 points more on the test score. If you are one of these students, then PEGACPRSA22V1 exam tests are your best choice. Because students often purchase materials from the Internet, there is a problem that they need transport time, especially for those students who live in remote areas. When the materials arrive, they may just have a little time to read them before the exam. However, with PEGACPRSA22V1 Exam Questions, you will never encounter such problems, because our materials are distributed to customers through emails. After you have successfully paid, you can immediately receive PEGACPRSA22V1 test guide from our customer service staff, and then you can start learning immediately.
