We never boast on the achievements of our MB-700 exam questions. There is no single version of level that is suitable for all exam candidates. Because we are all individual creature has unique requirement. But our MB-700 training materials are considerate for your preference and convenience. After many years of review, experts boiled their knowledge and experience of the exam down to three versions of MB-700 Training Materials. They are all booming MB-700 guide dump in today's market.

## Topics of MB-700: Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Exam

Candidates should apprehend the examination topics before they begin of preparation,because it'll extremely facilitate them in touch the core. Our **MB-700 exam dumps** will include the following topics:

### 1. Identify solution requirements (30-35%)

Identify business requirements

- Identify reporting requirements, including operational, analytical, and externally facing reports
- Visualize an organization structure
- Describe an organization including companies, divisions, and other entities

Perform gap analyses

- Categorize business requirements and determine what gaps exist between current apps and services and the proposed solution
- Identify the functional business processes that must be added, removed, or modified

Define compliance requirements

- Identify regulatory and governmental compliance requirements, including data privacy regulations
- Determine localization requirements and design a localization strategy, including taxes and user interfaces
- Define audit requirements

## Define security requirements

- Design the security strategy and Architecture for a solution
- Design a strategy for segregating duties

## Determine licensing needs and costs

- Estimate upfront and ongoing infrastructure and cloud services costs
- Estimate the long-term costs for a solution
- Determine licensing requirements for Dynamics 365 for Finance and Operations and third-party apps and services
- Evaluate the costs and benefits of solution options

## 2. Design solution components (40-45%)

### Design business processes

- Identify use cases and business optimization opportunities, including upgrade and data migration scenarios
- Select solution functional components
- Map requirements and business process steps to a solution

### Design data migration strategies

- Design a master data management strategy
- Develop a data migration strategy
- Identify and characterize data sources that must be migrated
- Develop a data cut-over plan

### Design system integrations

- Recommend add-on technologies and services
- Identify options for integrating with third-party solutions
- Select integration strategies
- Identify options to increase return on investment by integrating Office 365 apps and services and other Microsoft solutions

### Design solution infrastructure

- Select a cloud-based or on-premises implementation
- Identify required infrastructure apps, services, components, and features
- Define performance requirements

## 3. Define solution testing and management strategies (25-30%)

### Develop an application lifecycle management (ALM) strategy

- Identify the available instance types
- Identify use cases, integration points, and methodologies for implementing Azure DevOps functionality
- Select instance types for a solution

### Recommend Lifecycle Services (LCS) tools

- Select LCS tools to support a solution
- Identify the available LCS tools, including Business Process Modeler (BPM), Regression Suite Automation Tool (RSAT) and Regulatory Updates

### Define a testing strategy

- Define a regression testing strategy, including what requires testing and the order of testing
- Design a strategy for performance and load testing
- Determine when to use RSAT, SysTest, and other tools and technologies
- Define performance goals and requirements, predict transaction volumes

## MB-700 Reliable Exam Bootcamp | MB-700 Latest Learning Material

You can write down your doubts or any other question of our Microsoft Dynamics 365: Finance and Operations Apps Solution Architect test questions. We warmly welcome all your questions. Our online workers are responsible for solving all your problems with twenty four hours service. You still can enjoy our considerate service after you have purchased our MB-700 test guide. If you don't know how to install the study materials, our professional experts can offer you remote installation guidance. Also, we will offer you help in the process of using our MB-700 Exam Questions. Also, if you have better suggestions to utilize our study materials, we will be glad to take it seriously.

### Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q274-Q279):

#### NEW QUESTION # 274

A company uses Dynamics 365 Supply Chain Management. You are evaluating the company's new business processes. You need to determine which tools functional consultants should use to identify any possible gaps and new features available from Microsoft.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a Microsoft Dynamics 365 interface. On the left, a 'Tools' sidebar lists: Business process library, Task Recorder, Feature Management Workspace, and Service Update Availability. In the center, an 'Answer Area' contains a 'Requirement' section with four items: 'Display the new business process visually.', 'Create user manuals in Microsoft Word format.', 'View a Dynamics 365 Supply Chain Management dashboard that has a list of features delivered in each release.', and 'View a website that lists target dates for upcoming product service updates including preview availability, general availability, and end of service.' On the right, a 'Tool' section shows four boxes: 'Tool', 'Tool', 'Tool', and 'Tool'. A large Microsoft logo is visible in the background.

**Answer:**

Explanation:

### NEW QUESTION # 275

The company uses Lifecycle Services (LCS) environment monitoring tools to assess the health of their production environment. The environment administrator must be able to do the following:

- \* View tasks performed during a browser session.
- \* Verify that interactive users are not connecting to servers allocated for batch jobs.

You need to determine which environment monitoring tools meet the requirements. Which tool should you recommend for each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Tool			
View tasks performed during a browser session.	<table border="1"><tr><td>Activity load</td></tr><tr><td>User activity</td></tr><tr><td>User load</td></tr></table>	Activity load	User activity	User load
Activity load				
User activity				
User load				
Verify that interactive users are not connecting to servers allocated for batch jobs.	<table border="1"><tr><td>SQL insights</td></tr><tr><td>User activity</td></tr><tr><td>User load</td></tr></table>	SQL insights	User activity	User load
SQL insights				
User activity				
User load				

**Answer:**

Explanation:

Requirement	Tool			
View tasks performed during a browser session.	<table border="1"><tr><td>Activity load</td></tr><tr><td>User activity</td></tr><tr><td>User load</td></tr></table>	Activity load	User activity	User load
Activity load				
User activity				
User load				
Verify that interactive users are not connecting to servers allocated for batch jobs.	<table border="1"><tr><td>SQL insights</td></tr><tr><td>User activity</td></tr><tr><td>User load</td></tr></table>	SQL insights	User activity	User load
SQL insights				
User activity				
User load				

Explanation:

Box 1: User activity

The User activity grid shows the various activities that users performed, based on their session timestamp.

Box 2: User Load

The User load section shows all the system users. Each chart shows the time that the user spent on a specific machine.

**NEW QUESTION # 277**

A customer is planning to migrate to Dynamics 365 Finance.

You need to recommend a cloud or on-premises solution based on the customer's business requirements. Which deployment type should you recommend? To answer, drag the appropriate deployment types to the correct requirements. Each deployment type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Deployment types**

On-premises only
Cloud only
Cloud or on-premises

**Answer Area****Requirement**

Vendor collaboration  
Office integration  
Warehousing Power BI reports

**Deployment type**

Deployment type
Deployment type
Deployment type

**Answer:**

Explanation:

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Finance.

Forms and reports take longer than usual to open and run in the production environment.

You need to investigate the performance issue by using SQL Insights in Lifecycle Services (LCS).

Solution: Create a non-unique index on a table.

Does the solution meet the goal?

- A. No
- B. Yes

## Answer: A

Explanation:
