Sustainable-Investing認證題庫，最新Sustainable-Investing考題

KaoGuTi的經驗豐富的專家團隊開發出了針對CFA Institute Sustainable-Investing 認證考試的有效的培訓計畫，很適合

參加CFA Institute Sustainable-Investing 認證考試的考生。KaoGuTi為你提供的都是高品質的產品，可以讓你參加CFA Institute Sustainable-Investing 認證考試之前做模擬考試，可以為你參加考試做最好的準備。

最新的 Sustainable Investing Certificate Sustainable-Investing 免費考試真題 (Q456-Q461):

問題 #456

Weighted-average carbon intensity and attributed emissions of sovereign debt most likely measure ESG exposures at the:

- **A. portfolio level.**
- B. security level.
- C. country level.

答案： A

解題說明：

CFA materials describe weighted-average carbon intensity and attributed emissions as portfolio-level ESG measures. They aggregate country-level carbon intensities of sovereign issuers weighted by portfolio exposures. While the data reflects country-level emissions, the metric itself is reported at the portfolio level to provide an integrated ESG exposure picture.

問題 #457

Which of the following statements regarding the effects of an aging population is most accurate?

- **A. Older people spend less on consumer goods.**
- B. Older people have lower accumulated savings per person than younger people.
- C. The ratio of active to inactive workers increases.

答案： A

解題說明：

As populations age, older individuals generally spend less on consumer goods (Option A) because: They shift spending toward healthcare, services, and retirement-related expenses. They buy fewer durable goods (e.g., cars, electronics).

Option B is incorrect because the ratio of active to inactive workers decreases as the proportion of retirees grows.

Option C is incorrect because older people typically have higher accumulated savings than younger individuals.

問題 #458

Which of the following is a success factor characteristic of investor collaboration? Investors should have:

- A. objectives that are linked to material strategic and governance issues.
- **B. clear leadership with appropriate relationships, skills, and knowledge.**
- C. an engagement approach that is bespoke to the target company.

答案： B

解題說明：

Effective investor collaboration is crucial for achieving meaningful outcomes in ESG engagements and initiatives. Clear leadership with appropriate relationships, skills, and knowledge is a key characteristic of successful investor collaboration.

1. Clear Leadership: Having clear leadership ensures that the collaboration is well-coordinated and directed towards common goals. Leaders with the right relationships, skills, and knowledge can navigate complex stakeholder environments, build consensus, and drive the collaboration forward.

2. Engagement Approach (Option A): While having an engagement approach that is bespoke to the target company is important, it is more specific to individual engagements rather than a general characteristic of investor collaboration success.

3. Objectives Linked to Strategic Issues (Option C): Objectives that are linked to material strategic and governance issues are important for the focus and relevance of the collaboration. However, clear leadership is fundamental to ensuring that these objectives

are effectively pursued and achieved.

References from CFA ESG Investing:

Investor Collaboration: The CFA Institute discusses the importance of leadership in investor collaboration, highlighting that successful collaborations often depend on leaders who can leverage their expertise and relationships to achieve common goals.

Characteristics of Successful Collaborations: Understanding the critical success factors, such as clear leadership, helps investors design and participate in effective collaborative initiatives that can drive positive ESG outcomes.

問題 #459

Which of the following is an example of shareholder engagement? Institutional investors:

- A. discussing ESG issues with an investee company's board
- B. making ESG recommendations to policy makers
- C. responding to policy consultations

答案： A

解題說明：

An example of shareholder engagement is institutional investors discussing ESG issues with an investee company's board.

Shareholder engagement involves active dialogue between investors and company management to address and influence ESG practices and performance.

Direct Interaction: Engaging directly with the board allows institutional investors to communicate their ESG concerns and expectations. This can lead to more informed decision-making by the board on ESG matters.

Influence and Accountability: By discussing ESG issues with the board, investors can hold the company accountable for its ESG performance. This can drive improvements in areas such as governance, environmental impact, and social responsibility.

Long-term Value: Effective engagement on ESG issues can enhance long-term value creation for both the company and its shareholders. It encourages sustainable business practices that mitigate risks and capitalize on ESG opportunities.

MSCI ESG Ratings Methodology (2022) - Highlights the role of shareholder engagement in influencing corporate ESG practices.

ESG-Ratings-Methodology-Exec-Summary (2022) - Discusses the importance of direct dialogue between investors and company boards in improving ESG performance.

問題 #460

An asset owner's ESG policies need to address how portfolio managers:

- A. assess ESG risk exposures independent of the overall risk management function.
- B. disclose ESG exposures selectively to investors most affected by the exposures.
- C. establish the rationale for ESG assessment.

答案： C

解題說明：

Asset owners must ensure clarity of purpose: portfolio managers should establish a clear rationale for ESG assessment, such as value creation, risk reduction, or client alignment. This rationale forms the policy's basis.

Selective disclosure (option B) may breach transparency principles, and segregating ESG risk from overall risk management (option C) is generally discouraged. Instead, ESG risk should be integrated holistically with traditional financial risk into the overall risk framework.

問題 #461

.....

來吧，讓暴風雨來得更猛烈些吧！那些想通過IT認證的考生面臨那些考前準備將束手無策，但是又不得不準備，從而形成了那種急躁不安的心理狀態。不過，自從有了KaoGuTi CFA Institute的Sustainable-Investing考試認證培訓資料，那種心態將消失的無蹤無影，因為有了KaoGuTi CFA Institute的Sustainable-Investing考試認證培訓資料，他們可以信心百倍，不用擔心任何考不過的風險，當然也可以輕鬆自如的面對考試了，這不僅是心理上的幫助，更重要的是通過考試獲得認證，幫助他們拼一個美好的明天。
