New Plat-Dev-210 Exam Discount & Plat-Dev-210 Exam Syllabus

The Salesforce expert team use their knowledge and experience to make out the latest short-term effective training materials. This training materials is helpful to the candidates. It allows you to achieve the desired results in the short term. Especially those who study Plat-Dev-210 while working, you can save a lot of time easily. ActualtestPDF's training materials are the thing which you most wanted.

Salesforce Certified Omnistudio Developer Sample Questions (Q101-Q106):

NEW QUESTION # 101

A developer writes an OmniScript that includes a DataRaptor that updates the Account statue based on information provided from the OmniScript. The information must be updated only if the Account record already exists. Otherwise, a new account must be created.

How should the developer accomplish this task?

- A. Check the Upset key and is required for Upsert checkboxes on the Account id field
- B. Check Overwrite Target for all Null input checkbox on the Account id field
- C. Check the Upsert key checkbox on the Account Status field
- D. Populate the Lookup object and Lookup fields

Answer: A

Explanation:

According to the OmniStudio Developer Guide, "To upsert a record, select the Upsert Key checkbox for the field that contains the unique identifier for the record. If you want to create a new record when no match is found, select Is Required for Upsert."

Therefore, the correct answer is B.

NEW QUESTION # 102

In a calculation procedure, what is required for the output of a calculation step to be used in an aggregation step?

- A. It must be included in the calculation output.
- B. It must be a matrix lookup step.
- C. It must be a calculation step.
- D. It must be included in constants.

Answer: A

Explanation:

In a calculation procedure, the output of a calculation step must be included in the calculation output in order to be used in an aggregation step. The calculation output defines the variables that are available for aggregation

NEW QUESTION # 103

Refer to the exhibit below. What is the merge code needed for this integration procedure structure to pass a CaseNumber node from the DRReadCase DataRaptor Extract Action to the HTTP Action's HTTP URL?

- A. ((CaseNumber))
- B. ((DRRCASE, CaseNumber))
- C. MTTOPDetCaseDetail: CaseNumber%
- D. %DRReadCase: CaseNumber%

Answer: D

Explanation:

The merge code syntax for passing data from a DataRaptor Extract Action to an HTTP Action is % DataRaptorName: NodeName%. In this case, it is %DRReadCase: CaseNumber%.

NEW QUESTION # 104

A developer creates an Integration Procedure with a Set values and a DataRaptor Extract Action that requires AccountId as a key. When the developer previews the Integration Procedure, the developer enters the AccountId correctly and executes the preview. The developer sees the data extracted by the DataRaptor in the Debug Log, but the response is empty. What is the likely cause of this issue?

- A. The Response cannot be previewed directly.
- B. The DataRaptor Action did not have the Add Response To Response JSON property set to true.
- C. The AccountId used for the preview is invalid.
- D. A Response Action was not added to the Integration Procedure.

Answer: B

Explanation:

The Add Response To Response JSON property on the DataRaptor Action indicates that the output of the DataRaptor should be added to the response JSON of the Integration Procedure. If this property is not set to true, the response will be empty even if the DataRaptor extracts data successfully.

NEW QUESTION # 105

A developer is creating a FlexCard for a new Community page. The FlexCard will display case information along with actions to close the case and update the case, and it will be styled using the Community's theme. What must the developer do to configure the FlexCard for deployment in a community?

- A. Set the Deployment property in Card Configuration to "Community"
- B. Configure the Component Visibility in the Custom Component
- C. Add the FlexCard's API name to the FlexCard Player component
- D. Set the Target property in Publish Options to "CommunityPage"

Answer: C

Explanation:

The FlexCard Player component is used to display FlexCards in a community page. The developer needs to add the FlexCard's API name to the FlexCard Player component to configure the FlexCard for deployment in a community.

NEW QUESTION # 106

.....

Begin to learn the Plat-Dev-210 exam questions and memorize the knowledge given in them. Only ten days is enough to cover up the content and you will feel confident enough that you can answer all Plat-Dev-210 Questions on the syllabus of Plat-Dev-210 certificate. Such an easy and innovative study plan is amazingly beneficial for an ultimately brilliant success in exam.
