Trusting Authorized Exam Deep-Security-Professional Simulations in TestBraindump Is The Valid Way to Pass Trend Micro Certified Professional for Deep Security

Do you always feel that your gains are not proportional to your efforts without valid Deep-Security-Professional study torrent? Do you feel that you always suffer from procrastination and cannot make full use of your sporadic time? If your answer is absolutely yes, then we would like to suggest you to try our Deep-Security-Professional Training Materials, which are high quality and efficiency Deep-Security-Professional test tools. Your success is 100% ensured to pass the Deep-Security-Professional exam and acquire the

dreaming certification which will enable you to reach for more opportunities to higher incomes or better enterprises.

Trend Micro Certified Professional for Deep Security Sample Questions (Q59-Q64):

NEW QUESTION # 59
Policies in Deep Security can include a Context value. Which of the following statements re-garding Context is correct?

- A. The Context provides Deep Security Agents with location awareness and are associated with Log Inspection and Integrity Monitoring Rules.
- B. The Context provides Deep Security Agents with location awareness and are associated with Web Reputation Rules only.
- C. The Context provides Deep Security Agents with location awareness and are associated with Firewall and Intrusion Prevention Rules.
- D. The Context provides Deep Security Agents with location awareness and are associated with Anti- Malware and Web Reputation Rules.

Answer: C

Explanation:
The Context setting in Deep Security policies gives agents location awareness (such as "Office," "Data Center," or "Untrusted"), which affects Firewall and Intrusion Prevention rules. The context can change dynamically based on network/environment, allowing adaptive protection.
From the official documentation:
"Context provides location awareness and is associated with Firewall and Intrusion Prevention rules, allowing policies to adapt rule application based on the protected computer's environment." Option B is correct.
Options A, C, D are incorrect (context is not associated with Anti-Malware, Web Reputation, Log Inspection, or Integrity Monitoring rules).

NEW QUESTION # 60
Which Protection Modules can make use of a locally installed Smart Protection Server?

- A. Anti-Malware is the only Protection Modules that can use the locally installed Smart Protection Server.
- B. All Protection Modules can make use of the locally installed Smart Protection Server
- C. The Anti-Malware, Web Reputation and Intrusion Prevention Protection Modules can make use of the locally installed Smart Protection Server.
- D. The Anti-Malware and Web Reputation Protection Modules can make use of the locally installed Smart Protection Server.

Answer: D

Explanation:
Only the Anti-Malware and Web Reputation modules are designed to interact with a Smart Protection Server for real-time threat lookups. The other modules do not leverage the Smart Protection Server.
From the official documentation:
"Smart Protection Server provides global threat intelligence lookups to the Anti-Malware and Web Reputation modules. Other modules do not use Smart Protection Server." References:
Trend Micro Smart Protection Server Administrator's Guide
Trend Micro Deep Security Administrator's Guide: Smart Protection Server Integration

NEW QUESTION # 61
What is the purpose of the override.properties file?

- A. This file allows properties to be tested on Deep Security Manager without affecting the original configuration.
- B. This file allows Deep Security Agents to override enforced behavior by providing new policy configuration details.
- C. This file contains the original out-of-the-box configuration properties for Deep Security Manager. This file is renamed to dsm.properties upon initialization of Deep Security Manager.

- D. This file is used to transfer policy settings from one installation of Deep Security Man-ager to another

Answer: A

Explanation:
The properties specified in this configuration file override the properties specified in the dsm.properties file.
This file can be created manually by a support engineer to modify product be-havior without affecting the original configuration.
Explication: Study Guide - page (42)

NEW QUESTION # 62
Recommendation scans can detect applications and/or vulnerabilities on servers on the network. Which of the following Protection Modules make use of Recommendation scans?

- A. Intrusion Prevention, Integrity Monitoring, and Log Inspection
- B. Intrusion Prevention, Firewall, Integrity Monitoring and Log Inspection
- C. Log Inspection, Application Control, and Intrusion Prevention
- D. Firewall, Application Control, and Integrity Monitoring

Answer: A

Explanation:
Recommendation Scans can suggest rules for the following Protection Modules:
* Intrusion Prevention
* Integrity Monitoring
* Log Inspection
Explication: Study Guide - page (161)

NEW QUESTION # 63
Multiple Application Control Events are being displayed in Deep Security after a series of application updates and the administrator would like to reset Application Control. How can this be done?

- A. Application Control can not be reset.
- B. On the Deep Security Agent computer, type the following command to reset Application Control:
  dsa_control -r
- C. Click "Clear All" on the Actions tab in the Deep Security Manager Web console to reset the list of Application Control events.
- D. Application Control can be reset by disabling the Protection Module, then enabling it once again. This will cause local rulesets to be rebuilt.

Answer: D

Explanation:
* Toreset Application Controlin Trend Micro Deep Security, the recommended and official method is to disable the Application Control moduleand thenenable it againfor the agent or computer.
* This processremoves the existing application inventory and local rulesets, effectively resetting Application Control. When re-enabled, the module willrebuild its inventory and local rulesfrom scratch.
* The documentation clearly states:
"If you want to reset Application Control on a computer, disable Application Control for that computer.
When you re-enable Application Control, it removes the inventory and local rules, then rebuilds them from scratch. This is useful after major application upgrades or if the rules become too complex."
* dsa_control -ris not an official reset method for Application Control, nor is there a "Clear All" option specifically for this purpose.
Option D is incorrect as resetis possible.
References:
Trend Micro Deep Security 20 LTS - Application Control Administration Guide Trend Micro Online Help: Reset Application Control
"To reset Application Control on an agent, disable and re-enable the Application Control module. This rebuilds the application inventory and resets local rulesets."

NEW QUESTION # 64

......

The objective of Trend Deep-Security-Professional is to assist candidates in preparing for the Trend Deep-Security-Professional certification test by equipping them with the actual Deep-Security-Professional questions PDF and Deep-Security-Professional practice exams to attempt the Deep-Security-Professional Exam successfully. The Trend Deep-Security-Professional practice material comes in three formats, desktop Deep-Security-Professional practice test software, web-based Deep-Security-Professional practice exam, and Deep-Security-Professional Dumps PDF that cover all exam topics.
