# Exam Dumps 1Z1-182 Demo | 1Z1-182 Dumps Download

What's more, part of that PrepAwayETE 1Z1-182 dumps now are free: https://drive.google.com/open?id=1JrAVq4aKSPT_ItmP0Ve2JxtxMSSbVlQA

Passing the Oracle 1Z1-182 certification exam is necessary for professional development, and employing real Oracle 1Z1-182 Exam Dumps can assist applicants in reaching their professional goals. These actual 1Z1-182 questions assist students in discovering areas in which they need improvement, boost confidence, and lower anxiety. Candidates will breeze through Oracle 1Z1-182 Certification examination with flying colors and advance to the next level of their jobs if they prepare with updated Oracle 1Z1-182 exam questions.

Oracle Database 23ai Administration Associate exam tests hired dedicated staffs to update the contents of the data on a daily basis. Our industry experts will always help you keep an eye on changes in the exam syllabus, and constantly supplement the contents of 1Z1-182 test guide. Therefore, with our study materials, you no longer need to worry about whether the content of the exam has changed. You can calm down and concentrate on learning. At the same time, the researchers hired by 1Z1-182 Test Guide is all those who passed the Oracle Database 23ai Administration Associate exam, and they all have been engaged in teaching or research in this industry for more than a decade. They have a keen sense of smell on the trend of changes in the exam questions. Therefore, with the help of these experts, the contents of 1Z1-182 exam questions must be the most advanced and close to the real exam.

## 1Z1-182 Sure-Pass Torrent: Oracle Database 23ai Administration Associate - 1Z1-182 Test Torrent & 1Z1-182 Exam Guide

For candidates who want to obtain the certification for 1Z1-182 exam, passing the exam is necessary. We will help you pass the exam just one time. 1Z1-182 training materials are high-quality, since we have experienced experts who are quite familiar with exam center to compile and verify the exam dumps. In addition, we offer you free update for 365 days after payment, and the latest version for 1Z1-182 Training Materials will be sent to your email automatically. We have online and offline chat service and if you have any questions for 1Z1-182 exam materials, you can have a chat with us.

## Oracle 1Z1-182 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Employ Oracle-Supplied Database Tools: This section evaluates the abilities of Database Engineers and Support Specialists in identifying and using Oracle-supplied tools for managing databases. It focuses on leveraging tools to monitor, troubleshoot, and optimize database performance effectively. |
| Topic 2 | • Managing Storage: This section tests the knowledge of Storage Engineers in managing storage features such as resumable space allocation, segment space-saving, and block space management. It also includes defining segment characteristics to optimize storage utilization. |
| Topic 3 | • Describe Managing Database Instances: This section tests the knowledge of Database Administrators in performing essential tasks for managing database instances. It includes starting and shutting down databases, utilizing dynamic performance views, managing initialization parameter files, and using the Automatic Diagnostic Repository (ADR) for troubleshooting. |
| Topic 4 | • Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements. |
| Topic 5 | • Configuring Oracle Net Services: This section measures the skills of Network Administrators and Database Administrators in configuring Oracle Net Services. It includes identifying administration components, describing connection methods, and ensuring seamless communication between clients and databases. |
| Topic 6 | • Describe Oracle Database Architecture: This section of the exam measures the skills of Database Administrators and System Architects in understanding the Oracle database architecture. It covers the configurations of Oracle database instances, memory structures like SGA and PGA, and process structures such as background processes. It also explains the logical and physical database structures, including datafiles, control files, and redo log files. |

# Oracle Database 23ai Administration Associate Sample Questions (Q29-Q34):

**NEW QUESTION # 29**
Which two tasks can be performed in the NOMOUNT state?

- A. Full database recovery.
- B. Re-creating control files.
- C. Creating a database.
- D. Renaming data files.
- E. Enabling online redo log archiving.

**Answer: B,C**

Explanation:
A .False. Requires MOUNT to access data files.
B .False. Requires MOUNT for redo logs.
C .True. CREATE DATABASE runs in NOMOUNT.
D .True. CREATE CONTROLFILE is possible.
E .False. Recovery needs MOUNT or OPEN.

**NEW QUESTION # 30**
Which two are benefits of external tables?

- A. The results of a complex join or aggregating function or both can be unloaded to a file for transportation to other systems.
- B. They can be queried while the database is in the MOUNT state like dynamic performance views.
- C. They support DELETEs, which transparently deletes records in the file system as if they were table rows.

- D. They can be queried, transformed, and joined with other tables without having to load the data first.
- E. They support UPDATEs, which transparently updates records in the file system as if they were table rows.

**Answer: A,D**

Explanation:
A .False. External tables are read-only; no DELETE.
B .False. Require OPEN state, unlike V$ views.
C .False. No UPDATE support; read-only.
D .True. Queryable like regular tables without loading.
E .True. Data Pump can unload query results to files.

**NEW QUESTION # 31**
As the DBA, you execute this command: GRANT CREATE VIEW TO usr1 WITH ADMIN OPTION; USR1 then executes: GRANT CREATE VIEW TO usr2 WITH ADMIN OPTION; USR2 then executes: GRANT CREATE VIEW TO usr3; Which statement is true?

- A. When the DBA revokes the CREATE VIEW privilege from USR2, it is revoked from USR3.
- B. When the DBA revokes the CREATE VIEW privilege from USR1, it is revoked from USR2 but not USR3.
- C. When the DBA revokes the CREATE VIEW privilege from USR1, it is neither revoked from USR2 nor USR3.
- D. USR1 can revoke the CREATE VIEW privilege from USR3.
- E. The DBA can revoke only ADMIN OPTION from USR1.

**Answer: A,C**

Explanation:
A .False. Revoking from USR1 doesn't cascade due to WITH ADMIN OPTION.
B .True. Revoking from USR2 cascades to USR3 because USR2 granted it.
C .False. DBA can revoke the full privilege, not just ADMIN OPTION.
D .False. USR1 can't revoke from USR3 directly; only the grantor (USR2) can.
E .True. WITH ADMIN OPTION breaks the revoke chain from USR1 onward.

**NEW QUESTION # 32**
Which three Oracle database space management features will work with both Dictionary and Locally managed tablespaces?

- A. Automatic data file extension (AUTOEXTEND).
- B. Online index segment shrink.
- C. Oracle Managed Files (OMF).
- D. Capacity planning growth reports based on historical data in the Automatic Workload Repository (AWR).
- E. Online table segment shrink.

**Answer: A,C,D**

Explanation:
Dictionary-managed tablespaces (DMTs) use the data dictionary for extent management, whilelocally managed tablespaces (LMTs) use bitmaps. Let's evaluate compatibility:
A . Capacity planning growth reports based on historical data in the Automatic Workload Repository (AWR).
True. AWR tracks space usage (e.g., DBA_HIST_TBSPC_SPACE_USAGE) regardless of tablespace type, enabling growth reports for both DMTs and LMTs.
Mechanics:MMON collects metrics like segment growth, stored in SYSAUX, accessible via EM or scripts.
Practical Use:Helps predict when to add data files, universal across management types.
B . Online table segment shrink.
False. ALTER TABLE ... SHRINK SPACE requires LMTs with Automatic Segment Space Management (ASSM), unavailable in DMTs, which lack bitmap-based free space tracking.
Why Incorrect:DMTs use freelists, incompatible with shrink operations.
C . Online index segment shrink.
False. Like tables, ALTER INDEX ... SHRINK SPACE requires LMTs with ASSM, not supported in DMTs.
Why Incorrect:Same limitation as B; DMTs can't compact online.
D . Oracle Managed Files (OMF).

True. OMF automates file naming and placement (via DB_CREATE_FILE_DEST) for both DMTs and LMTs, agnostic to extent management.

Mechanics:Example: CREATE TABLESPACE ts1; creates an OMF file in either type.

Edge Case:DMTs are rare in 23ai, but OMF still applies.

E . Automatic data file extension (AUTOEXTEND).

True. AUTOEXTEND ON allows data files to grow as needed, supported in both DMTs and LMTs since early versions.

Mechanics:ALTER DATABASE DATAFILE ... AUTOEXTEND ON NEXT 100M; works universally.

## NEW QUESTION # 33

Which two statements are true about advanced connection options supported by Oracle Net for connection to Oracle?

- A. Connect Time Failover requires the connect string to have two or more listener addresses configured.
- B. Connect Time Failover requires the use of Transparent Application Failover (TAF).
- C. Load Balancing requires the use of a name server.
- D. Load Balancing can balance the number of connections to dispatchers when using a Shared Server configuration.
- E. Source Routing requires the use of encrypted connections.

**Answer: A,D**

Explanation:

A .False. Connect Time Failover doesn't need TAF; TAF is for runtime failover.

B .False. Source Routing doesn't mandate encryption.

C .True. Needs multiple addresses (e.g., (ADDRESS_LIST=...)) for failover.

D .False. Load balancing works with tnsnames.ora, no name server required.

E .True. Balances connections across shared server dispatchers.
