## Exam D-VXR-DY-23 Questions Fee | D-VXR-DY-23 Trusted Exam Resource

Experts at TestkingPDF have also prepared EMC D-VXR-DY-23 practice exam software for your self-assessment. This is especially handy for preparation and revision. You will be provided with an examination environment and you will be presented with actual exam EMC D-VXR-DY-23 Exam Questions. This sort of preparation method enhances your knowledge which is crucial to excelling in the actual EMC D-VXR-DY-23 certification exam.

### EMC Dell VxRail Deploy 2023 Sample Questions (Q329-Q334):

#### NEW QUESTION # 329

How should an administrator manually validate the DNS readiness of a customer network?

- A. Generate a Network PEQ
- B. Ping the default gateway of the management VLAN
- C. Run a traceroute to the DNS server
- **D. Run nslookup on server FQDN and IP**

**Answer: D**

Explanation:

Most VxRail implementations are deployed with an external DNS. The external DNS must be configured with forward and reverse lookup records for the vCenter Server, ESXi hosts, and the VxRail Manager VM.

Depending on the VxRail deployment, the DNS records must also exist for: the NTP Server, vRealize Log Insight, and Secure Remote Services Gateway. VxRail 2-Node and stretched clusters require valid DNS records for the Witness host.

The `nslookup` command or the PowerShell equivalent `Resolve-DnsName` can be used to confirm the existence of the required records.

The FQDN and IP addresses are documented in the VxRail PEQ. Check the DNS records for all the required objects. The records should be verified for both:

- FQDN to IP address—Forward DNS check
- IP address to FQDN—Reverse DNS check

#### NEW QUESTION # 330

A VxRail cluster is being deployed with the VxRail Deployment Wizard. For which IP addresses must FQDNs be resolved by DNS?

- A. vCenter Server and VxRail Manager VM only
- B. All VxRail ESXi nodes, vCenter Server, and VxRail Manager VM
- C. All VxRail ESXi nodes, vRealize Operation Manager, and VxRail Manager VM
- D. Only the first VxRail ESXi node, vCenter Server, and VxRail Manager VM

**Answer: B**

#### NEW QUESTION # 331

During VxRail initial deployment the build fails. Support requests that logs be downloaded manually. Which logs should be collected?

- A. All files and folders under `/var/log/vmware`
- B. `/var/log/mystic/web.log`
- C. `/var/log/vmware/marvin/tomcat/logs/marvin.log` only
- D. `/var/log/vmware-installer`

**Answer: B**

#### NEW QUESTION # 332

What is the purpose of the As-Built Configuration Generator?

- A. Capture and generate the installation workflow for review in the event of a failed deployment
- B. Provide advanced control grouping for Stretched Clusters
- C. Keep a record of all spare nodes, not yet added to a VxRail Cluster

- D. Create the customer deliverable documentation of the Dell EMC product/solution implementation

Answer: D

NEW QUESTION # 333

Use the VxRail simulator to explore the system.

**VxRail Cluster** ACTIONS

Summary Monitor Configure Permissions Hosts VMs Datastores Networks Updates

Total Processors: 48
