- A. Build development and testing frameworks that enable a faster and more efficient development process
- **B. Build understanding of what is needed by the Customer to understand prospective Solutions and evaluate alternatives**
- C. Build the Architectural Runway, which enables smoother and faster development
- D. Facilitate specific activities such as verification and validation, documentation, signoffs, regulatory submissions, and approvals

Answer: B

NEW QUESTION # 193

Which of the following types of Enabler Stories is used for building and evaluating prospective Solutions alternatives?

- A. Infrastructure
- B. Architecture
- C. Compliance
- **D. Exploration**

Answer: D

Explanation:

According to the SAFe-for-Teams-SAFE-Practitioner-6-0 documents, enabler stories are short descriptions of a small piece of desired functionality that support exploration, architecture, infrastructure, or compliance.

Among these four types of enabler stories, exploration is the one that is used for building and evaluating prospective solutions alternatives. Exploration enabler stories support research, prototyping, and other activities needed to develop an understanding of customer needs, including the exploration of prospective solutions and evaluation of alternatives. They help validate assumptions, reduce uncertainty, and increase the likelihood of building the right thing. Therefore, the correct answer is A. Exploration.
