Salesforce Data-Cloud-Consultant 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> • Act on Data: This topic defines activations and their basic use cases, using attributes and related attributes, identifying and analyzing timing dependencies affecting the Data Cloud lifecycle. Additionally it focuses on troubleshooting common problems with activations, and using data actions, including their requirements and intended use cases.
주제 2	<ul style="list-style-type: none"> • Identity Resolution: It describes matching and how its rule sets are applied. Furthermore, it discusses reconciling data and its rule sets, the results of identity resolution, and use cases.

주제 3	<ul style="list-style-type: none"> • Data Cloud Setup and Administration: This topic includes applying Data Cloud permissions, permission sets, org-wide settings. It describes and configures data stream types, and data bundles. Moreover, it discusses use cases for data spaces, creating data spaces, managing and administering Data Cloud using reports, dashboards, flows, packaging, data kits, diagnosing and exploring data using Data Explorer, Profile Explorer, and APIs.
주제 4	<ul style="list-style-type: none"> • Segmentation and Insights: This topic defines basic concepts of segmentation and use cases, identifies scenarios for analyzing segment membership, configuring, refining, and maintaining segments within Data Cloud, and differentiating between calculated and streaming insights.
주제 5	<ul style="list-style-type: none"> • Data Ingestion and Modeling: This topic covers the different transformation capabilities within Data Cloud. It includes describing processes and considerations for data ingestion from various sources, defining, mapping, and modeling data using best practices aligned with identity resolution. Lastly, it discusses using available tools to inspect and validate ingested and modeled data.

ExamPassdump에서 출시한 Salesforce인증 Data-Cloud-Consultant덤프를 구매하여Salesforce인증 Data-Cloud-Consultant시험을 완벽하게 준비하지 않으실래요? ExamPassdump의 실력을 증명해드릴게요.

최신 Salesforce Data Cloud Data-Cloud-Consultant 무료샘플문제 (Q54-Q59):

질문 # 54

How can a consultant modify attribute names to match a naming convention in Cloud File Storage targets?

- A. Update attribute names in the data stream configuration.
- B. Use a formula field to update the field name in an activation.
- C. Set preferred attribute names when configuring activation.
- D. Update field names in the data model object.

정답: C

질문 # 55

During discovery, which feature should a consultant highlight for a customer who has multiple data sources and needs to match and reconcile data about individuals into a single unified profile?

- A. Data Consolidation
- B. Data Cleansing
- C. Harmonization
- D. Identity Resolution

정답: D

설명:

The feature that the consultant should highlight for a customer who has multiple data sources and needs to match and reconcile data about individuals into a single unified profile is D. Identity Resolution. Identity Resolution is the process of identifying, matching, and reconciling data about individuals across different data sources and creating a unified profile that represents a single view of the customer. Identity Resolution uses various methods and rules to determine the best match and reconciliation of data, such as deterministic matching, probabilistic matching, reconciliation rules, and identity graphs. Identity Resolution enables the customer to have a complete and accurate understanding of their customers and their interactions across different channels and touchpoints.

질문 # 56

Which solution provides an easy way to ingest Marketing Cloud subscriber profile attributes into Data Cloud on a daily basis?

- A. Marketing Cloud Connect API
- B. Email Studio Starter Data Bundle
- **C. Marketing Cloud Data extension Data Stream**
- D. Automation Studio and Profile file API

정답: C

설명:

The solution that provides an easy way to ingest Marketing Cloud subscriber profile attributes into Data Cloud on a daily basis is the Marketing Cloud Data extension Data Stream. The Marketing Cloud Data extension Data Stream is a feature that allows customers to stream data from Marketing Cloud data extensions to Data Cloud data spaces. Customers can select which data extensions they want to stream, and Data Cloud will automatically create and update the corresponding data model objects (DMOs) in the data space. Customers can also map the data extension fields to the DMO attributes using a user interface or an API. The Marketing Cloud Data extension Data Stream can help customers ingest subscriber profile attributes and other data from Marketing Cloud into Data Cloud without writing any code or setting up any complex integrations.

The other options are not solutions that provide an easy way to ingest Marketing Cloud subscriber profile attributes into Data Cloud on a daily basis. Automation Studio and Profile file API are tools that can be used to export data from Marketing Cloud to external systems, but they require customers to write scripts, configure file transfers, and schedule automations. Marketing Cloud Connect API is an API that can be used to access data from Marketing Cloud in other Salesforce solutions, such as Sales Cloud or Service Cloud, but it does not support streaming data to Data Cloud. Email Studio Starter Data Bundle is a data kit that contains sample data and segments for Email Studio, but it does not contain subscriber profile attributes or stream data to Data Cloud.

질문 # 57

The Data Cloud admin at Northern Trail Outfitters (NTO) wants to be proactively and immediately informed via Slack and email if any of the data streams fail for any reason. If this happens, a case should also be triggered as part of NTO's existing support and triage process, and reflected in its global monitoring dashboard.

What should a consultant recommend for these requirements?

- **A. Data actions**
- B. Salesforce reports and dashboards
- C. Data Cloud Query Editor
- D. Salesforce flows

정답: A

질문 # 58

During a privacy law discussion with a customer, the customer indicates they need to honor requests for the right to be forgotten. The consultant determines that Consent API will solve this business need.

Which two considerations should the consultant inform the customer about?

Choose 2 answers

- A. Data deletion requests are processed within 1 hour.
- **B. Data deletion requests are submitted for Individual profiles.**
- C. Data deletion requests are reprocessed at 30, 60, and 90 days.
- **D. Data deletion requests submitted to Data Cloud are passed to all connected Salesforce clouds.**

정답: B,D
