

Latest 2V0-13.25 Exam Pdf - 2V0-13.25 Reliable Exam Materials

[Pass VMware 2V0-13.25 Exam | Latest 2V0-13.25 Dumps & Practice Exams - Cert007](#)

Exam : **2V0-13.25**

Title : VMware Cloud Foundation
9.0 Architect

<https://www.cert007.com/exam/2v0-13-25/>

1/8

P.S. Free 2026 VMware 2V0-13.25 dumps are available on Google Drive shared by Pass4cram: <https://drive.google.com/open?id=13mMpFcORtiPGjDmu1Lyi5gjQIxYcG71j>

Are you worried about your poor life now and again? Are you desired to gain a decent job in the near future? Do you dream of a better life? Do you want to own better treatment in the field? If your answer is yes, please prepare for the 2V0-13.25 Exam. It is known to us that preparing for the exam carefully and getting the related certification are very important for all people to achieve their dreams in the near future.

You can hardly grow by relying on your own closed doors. Our 2V0-13.25 preparation materials are very willing to accompany you through this difficult journey. You know, choosing a good product can save you a lot of time. And choose our 2V0-13.25 exam questions will save more for our 2V0-13.25 learning guide is carefully compiled by the professional experts who have been in this career for over ten years. So our 2V0-13.25 practice braindumps contain all the information you need.

Ace Exam Preparation with VMware 2V0-13.25 Real Questions

Many companies think highly of VMware certifications, and they will spend money on employees' exam fee and preparation materials. They request executive staff to purchase valid 2V0-13.25 exam questions vce for engineers so that they clear exams and

get certifications easily without too much time and energy. Many companies regard us as their good long-term cooperative partner and think highly of our 2V0-13.25 Exam Questions Vce.

VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.
Topic 2	<ul style="list-style-type: none"> Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.
Topic 3	<ul style="list-style-type: none"> VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.
Topic 4	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.
Topic 5	<ul style="list-style-type: none"> Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.

VMware Cloud Foundation 9.0 Architect Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which best practices improve the security of VMware environments using Broadcom hardware?

- A. Use VMware vSphere Encryption
- B. Leverage Broadcom's hardware security features
- C. Use VMware NSX Distributed Firewall
- D. Enable VM monitoring with vRealize Operations

Answer: A,B,C,D

Explanation:

VMware vSphere Encryption, vRealize Operations, NSX Distributed Firewall, and Broadcom hardware security features all enhance security.

NEW QUESTION # 44

Which Broadcom hardware solutions can optimize VMware Cloud Foundation for better performance?

- A. Broadcom GPUs
- B. Broadcom Ethernet network adapters
- C. Broadcom RAID storage controllers
- D. Broadcom NVMe storage solutions

Answer: B,C,D

Explanation:

Broadcom's hardware solutions like Ethernet adapters, NVMe storage, and RAID controllers are integral to optimizing performance in VMware Cloud Foundation.

NEW QUESTION # 45

A customer has stated the following requirements for Aria Automation within their VCF implementation:

- * Users must have access to specific resources based on their company organization
- * Developers must only be able to provision to the Development environment
- * Production workloads can be placed on DMZ or Production clusters

What two design decisions must be implemented to satisfy these requirements? (Choose two.)

- A. Separate cloud zones will be configured for Development and Production.
- B. Users' access to resources will be controlled by project membership.
- C. Users' access to resources will be controlled by tenant membership.
- D. Separate tenants will be configured for Development and Production.

Answer: A,B

Explanation:

Aria Automation in VCF 5.2 uses cloud zones and projects for resource control.

Option A, "Separate cloud zones for Development and Production," restricts provisioning to specific clusters (Development, Production/DMZ), meeting the second and third requirements.

Option B, "Project membership," assigns users to projects tied to specific zones and roles, satisfying organization-based access and developer restrictions.

Option C (tenant membership) is for multi-tenancy, unnecessary here within one VCF instance.

Option D (separate tenants) overcomplicates isolation beyond needs. A and B leverage Aria Automation's native capabilities effectively.

Reference: VMware Aria Automation 8.10 Configuration Guide, Cloud Zones and Projects; VMware Cloud Foundation 5.2 Automation Guide.

NEW QUESTION # 46

Why would an architect specify the default NSX segment profiles in a VMware Cloud Foundation (VCF) design?

- A. Default segment profiles enable distributed firewall policy enforcement and avoid the need for overlay segments.
- B. Default segment profiles provide sufficient security and operational baseline settings for most common workloads and simplify lifecycle management.
- C. Default segment profiles offer enhanced performance and are automatically optimized for overlay traffic.
- D. Default segment profiles are required for VLAN-backed segments and cannot be overridden.

Answer: B

Explanation:

According to the VMware Cloud Foundation 9.0.2 Design Library and NSX Segment Profiles Design Section, "If you do not associate a custom segment profile when you create a segment, the NSX Manager automatically associates a corresponding default system-defined segment profile." These default segment profiles provide baseline Layer 2 networking configurations - including SpoofGuard, Segment Security, MAC Discovery, and QoS controls - that ensure security and operational compliance for most workload use cases.

The guide explains that these defaults "cannot be deleted or modified" but "can be inherited by custom segment profiles," offering a reliable starting point for secure and consistent lifecycle management. The rationale for using them in a design is to maintain operational simplicity, consistent enforcement of baseline security policies, and reduced administrative overhead when deploying or scaling segments across workload domains.

This approach aligns with the VCF design principles of standardization, automation, and maintainability, ensuring that the network

fabric adheres to validated security baselines without requiring complex customization unless dictated by specific use cases (such as industrial or multi-tenant environments).

NEW QUESTION # 47

Which technology allows VM networks to span multiple physical subnets?

- A. NFS
- **B. VXLAN**
- C. vMotion
- D. vSAN

Answer: B

Explanation:

VXLAN allows VMs to communicate across multiple physical subnets.

NEW QUESTION # 48

.....

Maybe you want to get the 2V0-13.25 certification, but daily work and long-time traffic make you busier to improve yourself. Thanks to our 2V0-13.25 training materials, you can learn for your certification anytime, everywhere. If you get our products, you will surely find a better self. As we all know, the best way to gain confidence is to do something successfully. With our 2V0-13.25 Study Guide, you will easily pass the 2V0-13.25 examination and gain more confidence.
