Reliable 200-901 Real Test & 200-901 Pass4sure

Good opportunities are always for those who prepare themselves well. You should update yourself when you are still young. Our 200-901 study materials might be a good choice for you. The contents of our study materials are the most suitable for busy people. You can have a quick revision of the 200-901 study materials in your spare time. Also, you can memorize the knowledge quickly.

There almost have no troubles to your normal life. You can make use of your spare moment to study our 200-901 Study Materials. The results will become better with your constant exercises. Please have a brave attempt.

Cisco 200-901 Exam Certification Details:

Exam Price	\$300 USD
Passing Score	Variable (750-850 / 1000 Approx.)
Recommended Training	Developing Applications and Automating Workflows using Cisco Core Platforms (DEVASC)
Sample Questions	Cisco 200-901 Sample Questions
Duration	120 minutes
Exam Registration	PEARSON VUE
Exam Name	Developing Applications and Automating Workflows using Cisco Core Platforms
Number of Questions	90-110

Cisco 200-901: DevNet Associate certification is an excellent opportunity for IT professionals to enhance their skills and knowledge in network programmability and software development. It is an entry-level certification that validates the candidate's knowledge and skills in software development and network programmability using Cisco platforms and APIs. With its numerous benefits, the certification is an essential step towards becoming a certified Cisco DevNet professional.

Cisco DevNet Associate Exam Sample Questions (Q284-Q289):

NEW QUESTION # 284

Several teams at a company are developing a new CRM solution to track customer interactions with a goal of improving customer satisfaction and driving higher revenue. The proposed solution contains these components:

- * MySQL database that stores data about customers
- * HTML5 and JavaScript UI that runs on Apache
- * REST API written in Python

What are two advantages of applying the MVC design pattern to the development of the solution? (Choose two.)

- A. to provide only a single view of the data to ensure consistency
- B. to ensure data consistency, which requires that changes to the view are also made to the model
- C. to provide separation between the view and the model by ensuring that all logic is separated out into the controller
- D. to enable multiple views of the same data to be presented to different groups of users
- E. to ensure that only one instance of the data model can be created

Answer: C,D

Explanation:

The Model-View-Controller (MVC) design pattern provides several advantages, including the ability to present multiple views of the same data to different user groups and the separation of concerns by dividing the application into three interconnected components. A . to enable multiple views of the same data to be presented to different groups of users - Correct. MVC allows different views to display the same data, enhancing flexibility and usability. B. to provide separation between the view and the model by ensuring that all logic is separated out into the controller - Correct. MVC promotes the separation of concerns, making the application easier to manage and scale. C. to ensure data consistency, which requires that changes to the view are also made to the model - Incorrect. This is not a primary advantage of MVC; changes to the view do not directly affect the model. D. to ensure that only one instance of the data model can be created - Incorrect. This is not a characteristic or advantage of MVC. E. to provide only a single view of the data to ensure consistency - Incorrect. MVC supports multiple views.

MVC Design Pattern

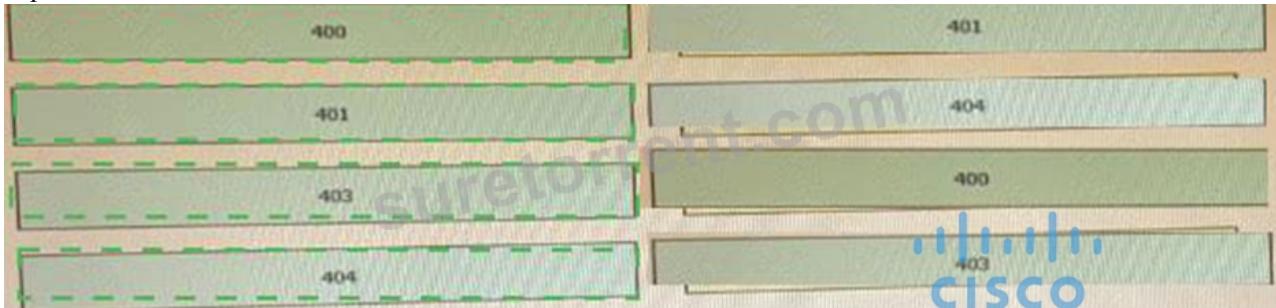

NEW QUESTION # 285

Drag and drop the HTTP status codes from the left onto the correct descriptions on the right.

Answer:

Explanation:

Explanation

1 - B, 2 - D, 3 - A, 4 - C

NEW QUESTION # 286

Refer to the exhibit. A developer cannot reach the web application behind an NGINX load balancer. The developer sends a request to an application FQDN with cURL but gets an HTTP 502 response. Which action solves the problem?

HTTP Request

```
:url http://hello-api.info -v
```

HTTP Response

```
: Trying hello-app.info...
: TCP_NODELAY set
: Connected to hello-app.info (hello-app.info) port 80 (#0
: GET / HTTP/1.1
: Host:hello-app.info
: User-Agent: curl/7.64.1
: Accept: */*

: HTTP/1.1 502 Bad Gateway
: Server: nginx/1.14.0 (Ubuntu)
: Date: Sat, 21 Nov 2020 11:09:54 GMT
: Content-Type: text/html
: Content-Length: 182
: Connection: keep-alive
```

- A. Fix errors in the server configuration, which is behind the load balancer.
- B. Bring up the load balancer to the active state.
- C. Change the default gateway on the load balancer to an active one.
- D. Fix errors in the cURL request sent by the client.

Answer: A

Explanation:

The HyperText Transfer Protocol (HTTP) 502 Bad Gateway server error response code indicates that the server, while acting as a gateway or proxy, received an invalid response from the upstream server.

NEW QUESTION # 287

Refer to the exhibit.

A screenshot of a web browser window. The URL is https://<ASA_IP>/api/access/global/rules. The method is POST. The payload is a JSON object representing a network access rule. The response status code is 400 Bad Request, with the message: "messages": [{"level": "Error", "code": "JSON-PARSE-ERROR", "details": "Unexpected character ('\' (code 34))"}].

URL: https://<ASA_IP>/api/access/global/rules

Method: POST

Payload:

```
{  
  "destinationAddress": {  
    "kind": "IPv4Address",  
    "value": "10.1.1.1"  
  },  
  "remarks": [],  
  "active": true,  
  "permit": true,  
  "sourceAddress": {  
    "kind": "IPv4Address",  
    "value": "192.168.1.1"  
  }  
}
```

Response Status Code: 400 Bad Request

```
{"messages": [{"level": "Error", "code": "JSON-PARSE-ERROR", "details": "Unexpected character ('\' (code 34))"}]}
```

What caused the error in this API request?

- A. The API resource does not support the POST operation.
- **B. The submitted JSON payload has a formatting issue.**
- C. The API resource does not support JSON format payloads.
- D. The submitted JSON payload includes a field that is not supported by the API resources.

Answer: B

NEW QUESTION # 288

A team of developers is responsible for a network orchestration application in the company. The responsibilities also include: developing and improving the application in a continuous manner deployment of the application and management of CI/CD frameworks monitoring the usage and problems and managing the performance improvements Which principle best describes this DevOps practice?

- A. quality assurance checks
- **B. end-to-end responsibility**
- C. responsible for IT operations
- D. automation of processes

Answer: B

Explanation:

The principle that best describes the DevOps practice outlined in the question is "end-to-end responsibility". In DevOps, teams are responsible for the entire lifecycle of the application, including development, deployment, continuous integration/continuous delivery (CI/CD), monitoring, and performance improvements. This holistic approach ensures that the same team manages all aspects of the application's lifecycle, leading to better collaboration, faster deployment cycles, and improved overall quality and reliability of the software.
