

VCETorrent C1000-173 IBM Cloud Pak for Data v4.7 Architect Exam Questions are Available in Three Different Formats

2026 Latest VCETorrent C1000-173 PDF Dumps and C1000-173 Exam Engine Free Share: <https://drive.google.com/open?id=10NOWrgD9JV2q96pKOBhWqXOcNU3BqII>

Our evaluation system for C1000-173 test material is smart and very powerful. First of all, our researchers have made great efforts to ensure that the data scoring system of our C1000-173 test questions can stand the test of practicality. Once you have completed your study tasks and submitted your training results, the evaluation system will begin to quickly and accurately perform statistical assessments of your marks on the C1000-173 Exam Torrent. You only need to spend 20 to 30 hours on practicing and consolidating of our C1000-173 learning material, you will have a good result. After years of development practice, our C1000-173 test torrent is absolutely the best. You will embrace a better future if you choose our C1000-173 exam materials.

Improve your professional ability with our C1000-173 certification. Getting qualified by the certification will position you for better job opportunities and higher salary. Now, let's start your preparation with C1000-173 exam training guide. Our C1000-173 practice pdf offered by VCETorrent is the latest and valid which suitable for all of you. The free demo is especially for you to free download for try before you buy. You can get a lot from the C1000-173 simulate exam dumps and get your C1000-173 certification easily.

Valid Dumps C1000-173 Pdf - Test C1000-173 Voucher

As we all know, the examination fees about C1000-173 exam test is too expensive, so many IT candidates want to get the most valid and useful C1000-173 study material and expect to pass the actual test at first attempt. VCETorrent provide you with the latest C1000-173 exam prep study material which can ensure you 100% pass. The quality & service of C1000-173 exam dumps will give you a good shopping experience. The quality and quantities are controlled by strict standards. VCETorrent has IT experts handling the latest IT information so as to adjust the outline for the exam dumps at the first time, thus to ensure the IBM C1000-173 training exam cram shown front of you is the latest and most relevant.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Security Requirements: This domain targets a Security Architect and focuses on planning security for a Cloud Pak for Data deployment. It includes managing certificates that secure communications, identity management systems, and access and authorization controls to enforce secure and compliant user and service interactions. The auditing features and their integration with enterprise audit systems are crucial to ensure traceability and accountability. Asset interchange security involves safeguarding data movement between services.
Topic 2	<ul style="list-style-type: none"> • Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.
Topic 3	<ul style="list-style-type: none"> • Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes • OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q100-Q105):

NEW QUESTION # 100

An enterprise architect in a financial institute is deciding on the deployment option for Cloud Pak for Data on their existing OpenShift Container Platform cluster.

They have decided to use an automated deployment option and install Cloud Pak for Data from the cloud provider's marketplace. What are the limitations they may face with this decision?

- **A. Partial installation of the Cloud Pak for Data has to be done manually for the first time installation.**
- B. Cloud Pak for Data cannot be installed on an existing cluster.
- C. Cloud Pak for Data operators cannot be co-located with the IBM Cloud Pak foundational services operators.
- D. Automatic installation cannot be done for any of the Cloud Pak for Data services.

Answer: A

Explanation:

According to the IBM Cloud Pak for Data 4.7 Installation Guide and official IBM documentation, when deploying Cloud Pak for Data (CP4D) via a cloud provider marketplace (such as Red Hat OpenShift OperatorHub or a cloud marketplace), the deployment process offers an automated installation method that simplifies the setup. However, there are certain limitations and manual steps that may be required during the initial installation phase.

* CP4D supports installation on an existing OpenShift Container Platform cluster, so option A is incorrect.

* Some core services and operators, including foundational services, can be installed automatically via operators, so option B is incorrect.

* Cloud Pak for Data operators and IBM foundational services operators can coexist in the same OpenShift cluster, so option C is incorrect.

* The official installation documentation for version 4.7 specifies that the initial installation requires manual intervention for partial installation - for example, manually setting up foundational services or configuring specific operators before automated installation of the rest of the platform can continue smoothly. This partial manual setup is especially relevant when using marketplace deployment to ensure all prerequisites and configurations are met.

Exact extract from IBM Cloud Pak for Data 4.7 Installation documentation:

"When deploying Cloud Pak for Data via the OperatorHub or cloud marketplace, the initial setup requires manual installation of foundational services operators and configuration of the cluster environment before proceeding with the automated installation of Cloud Pak for Data services. This partial manual step ensures proper configuration and avoids conflicts during automated deployment."

-IBM Cloud Pak for Data Installation Guide v4.7, section "Installing from OperatorHub and Marketplace" References:

NEW QUESTION # 101

Which component must be enabled in order to render business lineage when installing IBM Knowledge Catalog?

- A. Data quality
- B. Data graph
- C. Automated metadata lineage
- **D. Knowledge graph**

Answer: D

Explanation:

Business Lineage and Knowledge Graph: IBM Knowledge Catalog leverages a Knowledge Graph to store and visualize the relationships between various assets, including data assets, governance artifacts (like business terms), and the flow of data. Business lineage, which shows the end-to-end journey of data in business terms, relies heavily on these interconnected relationships within the Knowledge Graph. Documentation Confirmation: IBM's documentation explicitly states: "To view lineage, you can have any role in a catalog. Optional This feature is not available by default. Knowledge graph must be installed with IBM Knowledge Catalog, IBM Knowledge Catalog Premium, or IBM Knowledge Catalog Standard. For information on installing knowledge graph, see Specifying additional installation options in the IBM Software Hub documentation." (Source: IBM Documentation on Lineage). It further clarifies, "Enable knowledge graph to gain access to the lineage feature, business-term relationship search, and the relationship explorer."

NEW QUESTION # 102

Which two storage requirements are essential to achieve High Availability?

- A. Frequent system downtime for maintenance
- B. Regular data purging
- **C. Scalable storage solutions**
- **D. Data redundancy**

Answer: C,D

NEW QUESTION # 103

Which two Cloud Pak for Data services implement data masking to support secure data sharing?

- A. SPSS
- **B. IBM Knowledge Catalog**
- **C. Data Privacy**
- D. DataStage
- E. Db2 Data Gate

Answer: B,C

Explanation:

Data masking in IBM Cloud Pak for Data is primarily supported by IBM Knowledge Catalog and Data Privacy services. IBM

Knowledge Catalog enforces masking through Data Protection Rules, which dynamically mask sensitive fields when data is accessed through virtualized connections. Data Privacy allows creating masking flows and rules that transform datasets while maintaining usability for analytics, ensuring sensitive data is hidden or obfuscated. DataStage and Db2 Data Gate are ETL and data replication tools, respectively, and SPSS is an analytics tool, none of which natively implement comprehensive masking as a core capability.

NEW QUESTION # 104

Which potential problem can Watson OpenScale detect and mitigate?

- A. Complex rule set
- B. Limited storage capacity
- C. New data overwrites
- **D. Drift**

Answer: D

Explanation:

Watson OpenScale includes advanced monitoring capabilities for deployed AI models, including drift detection. Data drift refers to changes in input data distributions over time, which can degrade model performance. OpenScale continuously compares incoming data to the original training data to detect deviations and alert users when retraining may be required. It does not manage storage, data overwrites, or rule-based systems, making option B the only correct choice.

NEW QUESTION # 105

.....

Each of us is dreaming of being the best, but only a few people take that crucial step. The key step is to work hard to make yourself better. Our C1000-173 study materials may become your right man. Perhaps you have heard of our C1000-173 Exam Braindumps. A lot of our loyal customers are very familiar with their characteristics. And our C1000-173 learning quiz have become a very famous brand in the market and praised for the best quality.
