# Latest 1Z0-771 Exam Simulator | High Pass-Rate Oracle APEX Cloud Developer Professional 100% Free Pass4sure Study Materials

BONUS!!! Download part of ActualCollection 1Z0-771 dumps for free: https://drive.google.com/open?id=1NMVkq55giXkv3X3PAZhqzrNLJSsCO15B

This format enables you to assess your 1Z0-771 test preparation with a Oracle 1Z0-771 certification exam. You can also customize your time and the kinds of Oracle 1Z0-771 Exam Questions of the Oracle 1Z0-771 practice test. ActualCollection has formulated 1Z0-771 PDF questions for the convenience of Oracle 1Z0-771 test takers.

Our Oracle 1Z0-771 exam questions will correct your learning problems with the help of the test engine. All contents of 1Z0-771 training prep are made by elites in this area rather than being fudged by laymen. Let along the reasonable prices which attracted tens of thousands of exam candidates mesmerized by their efficiency by proficient helpers of our company. Any difficult posers will be solved by our Oracle 1Z0-771 Quiz guide.

Real 1Z0-771 Questions - Remove Your Exam Fear

The passing rate of our 1Z0-771 study material is very high, and it is about 99%. We provide free download and tryout of the 1Z0-771 question torrent, and we will update the 1Z0-771 exam torrent frequently to guarantee that you can get enough test bank and follow the trend in the theory and the practice. We provide 3 versions for you to choose thus you can choose the most convenient method to learn. Our 1Z0-771 Latest Questions are compiled by the experienced professionals elaborately. So it will be very convenient for you to buy our product and it will do a lot of good to you.

Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details

Topic 1	• Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 2	• Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Topic 3	• Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Topic 4	• Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Topic 5	• Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Topic 6	• Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 7	• Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 8	• Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
Topic 9	• Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Topic 10	• Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Topic 11	• Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Topic 12	• Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 13	• Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 14	• Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.

Topic 15	• Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Topic 16	• Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.
Topic 17	• Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.

Oracle APEX Cloud Developer Professional Sample Questions (Q23-Q28):

NEW QUESTION # 23
In your application, you want to display data in a searchable, customizable report that supports inline editing at runtime using the mouse or keyboard. Which report type will you create?

- A. Smart Filters
- B. Interactive Report
- C. Interactive Grid
- D. Classic Report

Answer: C

Explanation:
An Interactive Grid is the report type that supports searchable, customizable data display with inline editing at runtime using mouse or keyboard. Interactive Reports are searchable and customizable but lack inline editing. Classic Reports are static, and Smart Filters is a component, not a report type.

NEW QUESTION # 24
Which two statements are true about the APEX_MAIL API?

- A. You can send emails using the APEX_MAIL package from an Oracle APEX application.
- B. The APEX_MAIL package supports sending emails only to Oracle database users.
- C. You can receive emails using the APEX_MAIL package in an Oracle APEX application.
- D. You can add files as attachments to your emails using the APEX_MAIL package.

Answer: A,D

Explanation:
The APEX_MAIL API facilitates email functionality:
A . You can add files as attachments: Using APEX_MAIL.ADD_ATTACHMENT (e.g.,
APEX_MAIL.ADD_ATTACHMENT(p_mail_id, p_attachment, p_filename)), you can attach BLOBs (e.g., PDFs) to emails.
C . You can send emails: APEX_MAIL.SEND (e.g., APEX_MAIL.SEND(p_to => 'user@example.com', p_body => 'Hello'))
sends emails from APEX, leveraging the configured mail server.
B . You can receive emails: False; APEX_MAIL is send-only; receiving requires custom integration (e.g., IMAP).
D . Only to Oracle database users: False; emails can go to any valid address, not just database users.
Pitfall: Ensure the mail queue is processed (APEX_MAIL.PUSH_QUEUE) for timely delivery.

NEW QUESTION # 25
Which two actions does the Create Application Wizard allow?

- A. Reordering application pages.
- B. Uploading JavaScript or CSS files required for an application.
- C. Adding or deleting application pages.

- D. Changing the application authorization.

Answer: A,C

Explanation:
The Create Application Wizard streamlines app creation with:
Adding or deleting application pages: Allows users to define initial pages (e.g., Home, Reports) and remove unwanted ones during the wizard process.
Reordering application pages: Provides drag-and-drop or list-based reordering of pages to set the navigation sequence.
Uploading JavaScript or CSS: This occurs post-creation in Shared Components, not within the wizard.
Changing the application authorization: Authorization schemes are set after creation, not during the wizard.
This wizard is a time-saver for rapid prototyping, offering a guided yet flexible setup.

NEW QUESTION # 26
You have an Interactive Grid component and you are enabling the Save Report functionality. As what can end users save the report type?

- A. As Private and Public only
- B. As Primary
- C. As Private and Primary only

Answer: A

Explanation:
In an Interactive Grid, the "Save Report" functionality allows end users to save customizations (e.g., filters, column order). The available options are:
Private: Saved for the individual user only, visible only to them.
Public: Saved and shared with all users of the application, if permitted by the developer.
Primary: This is a developer-defined default report, not an end-user save option. End users cannot overwrite the Primary report; they can only save as Private or Public (if enabled via the "Allow Public Reports" attribute).
This flexibility empowers users to personalize grids while allowing shared configurations, enhancing collaboration and usability.

NEW QUESTION # 27
There is a validation of type Item is Numeric on the P1_SALARY item. When the page is submitted, this error message is displayed both as a notification and inline with the item. What will cause the validation error to appear only in the Notification area?

- A. Removing P1_SALARY from the validation Associated Item.
- B. Setting Value Required to Yes on P1_SALARY.
- C. Setting Display Location to Inline in Notification

Answer: C

Explanation:
Validation errors in APEX default to both inline (next to the item) and notification (top of page):
C . Setting Display Location to Inline in Notification: In the validation's properties, changing "Display Location" to "Inline in Notification" ensures the error appears only in the notification area, suppressing inline display. This centralizes feedback for a cleaner UI.
A . Removing Associated Item: Breaks the validation's link to P1_SALARY, stopping it entirely.
B . Value Required: Adds a separate check, unrelated to display location.
Pitfall: Test with non-numeric input (e.g., "abc") to confirm behavior.
