Exam CloudSec-Pro Guide, Reliable CloudSec-Pro Source

We provide candidates with comprehensive Palo Alto Networks CloudSec-Pro exam questions with up to three months of free updates. If you are doubtful, feel free to download a free demo of ActualPDF Palo Alto Networks Cloud Security Professional (CloudSec-Pro) PDF dumps, desktop practice exam software, and web-based Palo Alto Networks Cloud Security Professional (CloudSec-Pro) practice exam. Don't wait. Purchase Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam dumps at an affordable price and start preparing for the updated Palo Alto Networks CloudSec-Pro certification exam today.

Palo Alto Networks Cloud Security Professional Sample Questions (Q141-Q146):

NEW QUESTION # 141

Which set of steps is the correct process for obtaining Console images for Prisma Cloud Compute Edition?

- A. To retrieve Prisma Cloud Console images using basic authentication:1. Access registry.paloaltonetworks.com and authenticate using "docker login."2. Retrieve the Prisma Cloud Console images using "docker pull."
- B. To retrieve Prisma Cloud Console images using URL authentication: 1. Access registry-auth.twistlock.com and authenticate using the user certificate.2. Retrieve the Prisma Cloud Console images using "docker pull."
- C. To retrieve Prisma Cloud Console images using basic authentication: 1. Access registry.twistlock.com and authenticate using "docker login."2. Retrieve the Prisma Cloud Console images using "docker pull."
- D. To retrieve Prisma Cloud Console images using URL authentication:1. Access registry-url-auth.twistlock.com and authenticate using the user certificate.2. Retrieve the Prisma Cloud Console images using "docker pull."

Answer: A

Explanation:

Prisma Cloud, part of Palo Alto Networks' cloud security suite, offers Console images that can be retrieved for deployment in

various environments. The correct process for obtaining these images involves using basic authentication with Docker, a widely-used containerization platform. Users must first access the official Palo Alto Networks registry at registry.paloaltonetworks.com. Here, they are required to authenticate using the "docker login" command, which prompts for credentials. Upon successful authentication, users can then use the "docker pull" command to retrieve the Prisma Cloud Console images. This method ensures secure access to the latest Console images for deployment within an organization's infrastructure, aligning with best practices for container image management and deployment.

NEW QUESTION # 142

Which three platforms support the twistcli tool? (Choose three.)

- A. MacOS
- B. Solaris
- C. Windows
- D. Linux
- E. Android

Answer: A,C,D

Explanation:

The twistcli tool, part of Prisma Cloud's suite of security tools, supports various platforms for security scanning and configuration. The correct platforms supported by twistcli include:

- * A. Linux: twistcli is widely used on Linux platforms for scanning container images, host vulnerabilities, and more, making it a correct choice.
- * B. Windows: twistcli supports Windows, allowing users to perform security scans and checks on Windows-based systems, making it a correct choice.
- * D. MacOS: twistcli is also compatible with MacOS, enabling security operations on Apple's operating system, making it a correct choice. Option C (Android) and E (Solaris) are not supported platforms for the twistcli tool, according to the available documentation on Prisma Cloud.

NEW QUESTION # 143

What are two alarm types that are registered after alarms are enabled? (Choose two.)

- A. Resource status
- B. Onboarded Cloud Accounts status
- C. External integrations status
- D. Compute resources

Answer: B,C

Explanation:

Upon enabling alarms in Prisma Cloud, two critical alarm types that are registered are Onboarded Cloud Accounts status (A) and External integrations status (D). These alarms are pivotal for maintaining the health and security of the cloud environment. The Onboarded Cloud Accounts status alarms alert administrators about the connectivity and health of cloud accounts integrated with Prisma Cloud, ensuring continuous monitoring and security coverage. The External integrations status alarms provide notifications regarding the operational status of third-party services and tools integrated with Prisma Cloud, such as SIEMs, ticketing systems, or other security tools, ensuring that these integrations function correctly to support comprehensive security and incident response workflows.

NEW QUESTION # 144

Under which tactic is "Exploit Public-Facing Application" categorized in the ATT&CK framework?

- A. Initial Access
- B. Defense Evasion
- C. Execution
- D. Privilege Escalation

Answer: A

Explanation:

In the MITRE ATT&CK framework, the tactic "Exploit Public-Facing Application" is categorized under Initial Access. This tactic involves leveraging vulnerabilities in public-facing applications to gain unauthorized access to an organization's external services or applications. Initial Access tactics are concerned with the methods adversaries use to gain an initial foothold within a network, and exploiting public-facing applications is a common approach used by attackers to breach external defenses and establish a presence within a target network.

NEW QUESTION # 145

Which order of steps map a policy to a custom compliance standard?

(Drag the steps into the correct order of occurrence, from the first step to the last.)

Answer:

Explanation:

Explanation:

1. click on compliance standard.
2. add custom compliance standard.
3. edit policies.
4. add compliance standard from drop-down menu

[https://docs.prismacloudcompute.com/docs/enterprise_edition/compliance/custom_compliance_checks.](https://docs.prismacloudcompute.com/docs/enterprise_edition/compliance/custom_compliance_checks.html#creating-a-new-custom-check)

html#creating-a-new-custom-check

The process of mapping a policy to a custom compliance standard in a security platform like Prisma Cloud by Palo Alto Networks involves several specific steps. Firstly, one must access the compliance standards, which is typically done by clicking on the "Compliance Standards" section within the platform's interface. This is where all standards, including custom and predefined ones, are listed.

Next, if the custom compliance standard does not already exist, it must be created. This step involves defining the criteria and controls that make up the standard, tailored to the organization's specific requirements.

Once the custom compliance standard is in place, the policy in question needs to be edited. This editing process would involve configuring the policy to align with the compliance controls outlined in the custom standard, ensuring that the policy will enforce or check for the necessary requirements as defined by the standard.

Finally, the last step is to formally associate or map the edited policy with the custom compliance standard.

This is typically done by adding the policy to the standard, which may involve selecting the custom compliance standard from a drop-down menu within the policy settings, confirming that this particular policy should be enforced as part of the compliance checks for that standard.

This ordered process ensures that policies are properly aligned with the organization's compliance goals and can be enforced and reported on accurately within the security platform.

NEW QUESTION # 146

.....

As far as our CloudSec-Pro practice test is concerned, the PDF version brings you much convenience with regard to the following two aspects. On the one hand, the PDF version contains demo where a part of questions selected from the entire version of our CloudSec-Pro Test Torrent is contained. On the other hand, our CloudSec-Pro preparation materials can be printed so that you can study for the exams with papers and PDF version. With such benefits, why don't you have a try?
