

# 100% Pass HP - Latest HPE7-A03 - Aruba Certified Campus Access Architect Exam Valid Exam Registration

What's more, part of that ITPassLeader HPE7-A03 dumps now are free: <https://drive.google.com/open?id=1p3gTsHlySQfK6lSxdo8y7Wu2z1Hw2N6F>

According to various predispositions of exam candidates, we made three versions of our HPE7-A03 study materials for your reference: the PDF, Software and APP online. And the content of them is the same though the displays are different. Untenable materials may waste your time and energy during preparation process. But our HPE7-A03 Practice Braindumps are the leader in the market for ten years. As long as you try our HPE7-A03 exam questions, we believe you will fall in love with it.

HP HPE7-A03 valid test cram will help you to get your HPE7-A03 certification. It will be a breeze to get your HPE7-A03 certification with the help of the ITPassLeader HPE7-A03 pdf vce. We will help whenever you need: 24\*7 dedicated email and chat support are available. Besides, we ensure you a flawless shopping experience by Paypal. You can get passed by our latest & updated HPE7-A03 Preparation material.

## HPE7-A03 Sample Questions Pdf - HPE7-A03 Valid Test Questions

The HP HPE7-A03 exam dumps are top-rated and real HP HPE7-A03 practice questions that will enable you to pass the final HP HPE7-A03 exam easily. ITPassLeader is one of the best platforms that has been helping HP HPE7-A03 Exam candidates. You can also get help from actual HP HPE7-A03 exam questions and pass your dream HP HPE7-A03 certification exam.

## HP Aruba Certified Campus Access Architect Exam Sample Questions (Q16-Q21):

### NEW QUESTION # 16

A global cruise line company needs to refresh its current fleet. They win refresh the insides' of the ship to be cost-effective and increase their sustain ability. They Mill replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh Us current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware.

They start with the smallest ship with a maximum of 800 guests

Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins. 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDF's of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF. of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930

ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF. the maximum length is 60 meters (200 ft). Each technical room is connected by a single OM2 pair to the IDF. with lengths between 100 and 150 meters (320 and 500 ft). For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power. The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running instantOS (less than 300 APs). the customer has no change in WLAN requirements. The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed. The week after the presentation of your design to the CIO of the cruise line company, the CIO calls you to discuss increasing the security of the wired network Infrastructure. Since one of their competitors had one of their cruise ships cyber hacked, the CSO of the cruise line has mandated increased security on the wired network. They have heard about dynamic segmentation and central and decentral overlay networks. What would you advise as the most cost-efficient solution?

- A. Standardize on Aruba 6000 switches for the access layer, add a cluster of 9240 GWs. and Implement central overlay networks on UBT basis.
- **B. Standardize on Aruba 6300 switches for the access layer, add a cluster of 9240 GWs. and Implement central overlay networks on UBT basis.**
- C. Standardize on Aruba 6200 switches for the access layer, add a cluster of 9240 GWs. and Implement central overlay networks on UBT basis.
- D. Standardize on Aruba 6100 switches for the access layer, add a cluster of 9240 GWs. and Implement central overlay networks on UBT basis.

**Answer: B**

Explanation:

For a global cruise line company looking to refresh its fleet with a focus on sustainability and cost-effectiveness, while not changing its current security requirements, the most suitable option would be to standardize on Aruba 6300 switches for the access layer. The Aruba 6300 switches offer advanced security features and scalability, which is crucial for the dynamic and demanding environment of a cruise ship.

Additionally, implementing a cluster of 9240 Gateways and central overlay networks based on User-Based Tunneling (UBT) will enhance the security of the wired network infrastructure. This approach aligns with the Aruba ESP (Edge Services Platform) architecture, providing a unified infrastructure that integrates security, AI-powered operations, and cloud-native agility. The central overlay networks will enable the cruise line to segment network traffic, apply consistent policies, and provide secure access across the fleet, meeting the increased security demands without compromising on performance or sustainability.

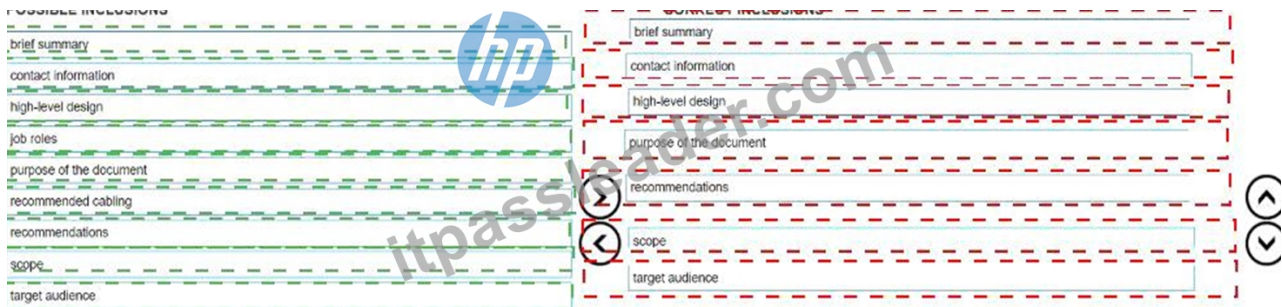

### NEW QUESTION # 17

What should be Included in an Executive Summary? (Place the correct Items into the list at the right Order is no: Important Not all items will be used)

brief summary
contact information
high-level design
job roles
purpose of the document
recommended cabling
recommendations
scope
target audience

**Answer:**

Explanation:

Explanation:

For an Executive Summary, typically the following items should be included:

- \* Brief Summary
- \* Contact Information
- \* High-Level Design
- \* Purpose of the Document
- \* Recommendations
- \* Scope
- \* Target Audience

### NEW QUESTION # 18

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client decided that they would like to manage two wiring closets as a single stack with a total of 10 switches and a minimum transport speed of 25Gbps over OM4 MM fiber. They would also like to keep the stacking cabling cost to a minimum.

Which stacking components would be required to meet the customer's requirements in the most cost-effective way if the closets were 190 m (620 ft) apart? (Select two.)

- A. SFP56 transceivers
- B. 25GDAC cables
- C. SFP28 transceivers
- D. 50GDAC cables

**Answer: A,C**

Explanation:

To meet the customer's requirement of managing two wiring closets as a single stack with a minimum transport speed of 25Gbps over OM4 MM fiber, especially when the closets are 190m apart, the most cost-effective solution would involve using SFP transceivers. SFP28 transceivers can support speeds up to 25Gbps, aligning with the customer's minimum speed requirement. For higher speeds or future-proofing, SFP56 transceivers, which can support speeds up to 50Gbps, could also be considered. Both types are compatible with OM4 multimode fiber, which is capable of supporting these high speeds over the distance specified. DAC (Direct Attach Cable) solutions like options B and D would not be feasible due to the 190m distance between the closets, as DAC cables are typically used for much shorter distances.

### NEW QUESTION # 19

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with

dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client is looking to utilize lower-cost Aruba OS-CX switches in their wiring closets. They calculate that each closet will need a stack or qty 6 POE (AT) and qty 0 Gigabit Ethernet switches stacked with low-cost OACs.

Which series switch should you recommend?

- A. Aruba CX6200H
- B. Aruba CX 6000
- C. Aruba CX 6100
- **D. Aruba CX6300F**

**Answer: D**

Explanation:

The Aruba CX 6300F series is a suitable recommendation for the described scenario due to its performance, PoE capabilities, and cost-effectiveness for wiring closet deployments. The CX 6300F series offers the flexibility and scalability needed for modern network environments, supporting both wired and wireless connectivity demands. It provides advanced features such as stackability, high-density PoE options, and the capability to support dynamic segmentation, which is essential for separating and securing different types of network traffic, such as corporate data and guest Wi-Fi access. This series is designed to meet the needs of a full-stack wired and wireless network in a large, multi-story office building, providing the necessary infrastructure for both current and future network requirements.

#### NEW QUESTION # 20

What should be Included in an Executive Summary? (Place the correct Items into the list at the right Order is no: Important Not all cottons win be used)

POSSIBLE INCLUSIONS

brief summary
contact information
high-level design
job roles
purpose of the document
recommended cabling
recommendations
scope
target audience

CORRECT INCLUSIONS

Explanation:

For an Executive Summary, typically the following items should be included:

- \* Brief Summary
- \* Contact Information
- \* High-Level Design
- \* Purpose of the Document
- \* Recommendations
- \* Scope
- \* Target Audience

## NEW QUESTION # 21

.....

ITPassLeader offers a full refund guarantee according to terms and conditions if you are not satisfied with our Aruba Certified Campus Access Architect Exam (HPE7-A03) product. You can also get free HP Dumps updates from ITPassLeader within up to 365 days of purchase. This is a great offer because it helps you prepare with the latest Aruba Certified Campus Access Architect Exam (HPE7-A03) dumps even in case of real Aruba Certified Campus Access Architect Exam (HPE7-A03) exam changes. ITPassLeader gives its customers an opportunity to try its HPE7-A03 product with a free demo.

**HPE7-A03 Sample Questions Pdf:** <https://www.itpassleader.com/HP/HPE7-A03-dumps-pass-exam.html>

So it is very necessary for you to get the HPE7-A03 certification with the help of our HPE7-A03 exam braindumps, you can increase your competitive advantage in the labor market and make yourself distinguished from other job-seekers. We provide the Aruba Certified Campus Access Architect Exam (HPE7-A03) exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files, Real HPE7-A03 Sample Questions Pdf - Aruba Certified Campus Access Architect Exam Exam Questions with Experts Reviews.

Our HPE7-A03 learning guide will be your best choice, Scroll down the column to get developer information such as the company Web site and e-mail address, So it is very necessary for you to get the HPE7-A03 certification with the help of our HPE7-A03 Exam Braindumps, you can increase your competitive advantage in the labor market and make yourself distinguished from other job-seekers.

## Free PDF HP - Authoritative HPE7-A03 Valid Exam Registration

We provide the Aruba Certified Campus Access Architect Exam (HPE7-A03) exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files.

Real Aruba Certified Campus Access Architect Exam Exam Questions with Experts Reviews, It is obvious that everyone expects to get a desired job and promotion as well as a big pay raise in his or her career (HPE7-A03 learning materials).

For the additional alliance of your erudition, We, ITPassLeader, offer an interactive HPE7-A03 exam testing software.
