## **Premium UiPath-ADPv1 Files & Valid Braindumps UiPath-ADPv1 Questions**

Most of the candidates who plan to take the UiPath-ADPv1 certification exam lack updated practice questions to ace it on the first attempt. Due to this, they fail the UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) test, losing money and time. And in some cases, applicants fail on the second attempt as well because they don't prepare with UiPath-ADPv1 Actual Exam questions. This results in not only the loss of resources but also the motivation of the candidate.

### **UiPath (ADPv1) Automation Developer Professional Sample Questions (Q88-Q93):**

#### **NEW QUESTION # 88**

Review the following graphics:

Try

Do

Use Application: Untitled - Notepad

Application path \*

"C:\Windows\System32\notepad.exe"

Application arguments

Text must be quoted

Match exact title: Untitled - Notepad

Type Into 'editable text'

Type this  Standard  Secure

"Typing into Notepad"

Empty field before typing: Single line [End, Shift+H]

Click before typing: Single

If the automation is executed and Notepad.exe is not running, which Log Message text value is contained in the Output panel?

- A. Exception
- B. SelectorNotFoundException
- C. Try
- D. ApplicationNotFoundException

**Answer: D**

Explanation:

The graphics show a UiPath workflow that contains a Try Catch activity with a Type Into activity inside the Try block and a Log Message activity inside the Catch block. The Type Into activity is configured to type

"Typing into Notepad" into a Notepad window with the selector "<wnd app='notepad.exe' cls='Notepad' title='Untitled - Notepad' />". The Log Message activity is configured to log the exception message in the Output panel.

If the automation is executed and Notepad.exe is not running, the Type Into activity will fail to find the target UI element and throw an exception. The exception will be caught by the Catch block and the Log Message activity will log the exception message in the Output panel. The exception message will contain the name of the exception type, which is ApplicationNotFoundException. This exception is thrown when the application that is specified in the selector is not found or not running. Therefore, the Log Message text value that is contained in the Output panel is ApplicationNotFoundException.

The other options are not correct, as they are not the exception type that is thrown by the Type Into activity when the application is not running. Option A is incorrect, because Exception is a generic term for any error or problem that occurs during the execution of a program, not a specific exception type. Option C is incorrect, because Try is not an exception type, but a keyword that marks the beginning of a block of code that may throw an exception. Option D is incorrect, because SelectorNotFoundException is not an exception type, but a possible error message that is displayed when the selector is invalid or does not match any UI element.

**NEW QUESTION # 89**

To retrieve all Outlook emails with the word "UiPath" in the subject, which filtering property and filter schema should a developer use?

- A. Property: Filter  
Schema: "@SQL=""urn:schemas:httpmail:subject"" like "%UiPath%"
- B. Property: Filter  
Schema: "@SQL=""urn:schemas:httpmail:subject"" like 'UiPath%'"
- C. Property: FilterByMessageIds  
Schema: "@SQL=""urn:schemas:httpmail:subject"" like 'UiPath%'"
- D. Property: FilterByMessageIds  
Schema: "@SQL=""urn:schemas:httpmail:subject"" like "%UiPath%"

**Answer: A**

**NEW QUESTION # 90**

Which of the following statements is true about the existing UiPath Studio installation packages?

- A. The Attended Robot installation package installs only UiPath Studio, and Robot.
- B. The Attended Robot installation package installs only the UiPath Robot.
- C. The Automation Developer installation package installs only UiPath Studio, Assistant, and Robot.
- D. The Unattended Robot installation package installs only UiPath Studio, Assistant, and Robot.

**Answer: B**

**NEW QUESTION # 91**

What is the correct sequence of steps in a REFramework project that is linked to Orchestrator if an application exception occurs on a Queue Item in the Process Transaction state?

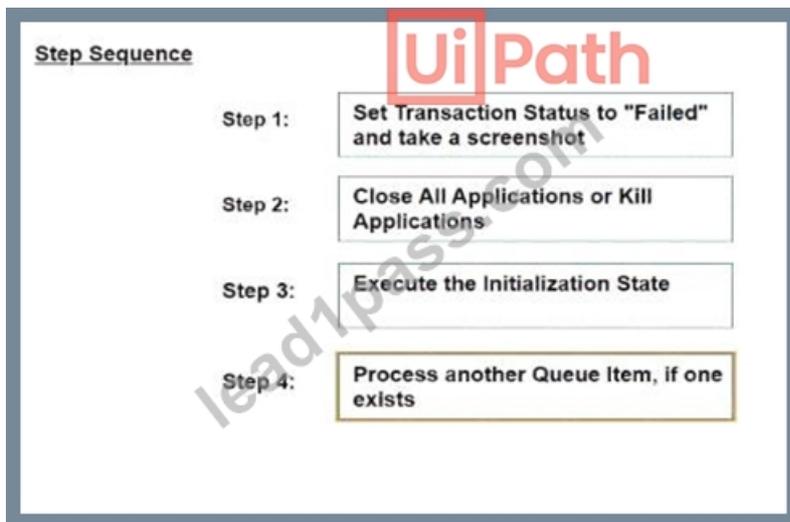

Instructions: Drag the Description found on the "Left" and drop on the correct Step Sequence found on the Right".

Description	Step Sequence
Execute the Initialization State	Step 1: <input type="text"/>
Set Transaction Status to "Failed" and take a screenshot	Step 2: <input type="text"/>
Process another Queue Item, if one exists	Step 3: <input type="text"/>
Close All Applications or Kill Applications	Step 4: <input type="text"/>

**Answer:**

Explanation:

Description	Step Sequence
Execute the Initialization State	Step 1: Set Transaction Status to "Failed" and take a screenshot
Set Transaction Status to "Failed" and take a screenshot	Step 2: Close All Applications or Kill Applications
Process another Queue Item, if one exists	Step 3: Execute the Initialization State
Close All Applications or Kill Applications	Step 4: Process another Queue Item, if one exists

### NEW QUESTION # 92

Once "Library A" has been imported as a dependency in the current project, how can the UI Object Repository defined in "Library A" be accessed?

- A. The Object Repository cannot be passed between a Process and a Library.
- B. The Object Repository needs to be exported as a UI Library and imported in the Process for it to become available.
- **C. The Object Repository will automatically be available in the Process.**
- D. The Object Repository is only available in a Library.

**Answer: C**

Explanation:

The Object Repository is a feature of UiPath Studio that allows you to store and manage UI elements in a structured way, similar to a DOM (Document Object Model)<sup>1</sup>. The Object Repository can be created and used in both libraries and processes<sup>2</sup>. When you import a library as a dependency in a process, the Object Repository defined in the library will automatically be available in the process<sup>3</sup>. You can access the UI elements from the library by using the UI Activities tab in the Object Repository panel<sup>3</sup>. You can also drag and drop the UI elements from the library to the Designer panel<sup>3</sup>.

### NEW QUESTION # 93

.....

More and more people hope to enhance their professional competitiveness by obtaining UiPath certification. However, under the premise that the pass rate is strictly controlled, fierce competition makes it more and more difficult to pass the UiPath-ADPv1 examination. In order to guarantee the gold content of the UiPath-ADPv1 certification, the official must also do so. However, it is an indisputable fact that a large number of people fail to pass the UiPath-ADPv1 examination each year. Perhaps it was because of the work that there was not enough time to learn, or because the lack of the right method of learning led to a lot of time still failing to pass the exam. Whether you are the first or the second or even more taking UiPath-ADPv1 Exam, UiPath-ADPv1 study materials are accompanied by high quality and efficient services so that they can solve all your problems. Passing the exam once will no longer be a dream.
