SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Financial Accounting Sample Questions (Q35-Q40):

NEW QUESTION # 35

From which G/L account types are values shown in the profit and loss (P&L) statement?

Note: There are 3 correct answers to this question.

- A. Non-operating Expense or Income
- B. Primary cost or Revenue
- C. Balance Sheet Account
- D. Secondary Costs
- E. Cash account

Answer: A,B,D

NEW QUESTION # 36

Which currency types are defaulted in SAP S/4HANA? Note: There are 2 correct answers to this question.

- A. 10 = Company code currency
- B. 20 = Controlling area currency
- C. 00 = Document currency
- D. 30 = Group currency

Answer: A,C

Explanation:

In SAP S/4HANA, currency types are critical as they define the currencies in which transactions and reports are recorded. The default currency types in SAP S/4HANA include:

* 00 = Document currency: This is the currency in which the original transaction is recorded. It is essential for maintaining the

accuracy and consistency of transactional data.

* 10 = Company code currency: Also known as the local currency, this is the currency used for the company's internal accounting and financial reporting. Each company code is assigned a specific local currency, ensuring that financial statements are prepared in a standardized manner.

These currency types are foundational in SAP S/4HANA and are automatically included in the system configuration to support various financial operations and reporting needs.

Organizational Assignments and Process Integration

NEW QUESTION # 37

You want to post depreciation costs of one asset to two cost centers. How do you do this?

- A. You assign a real cost center and a statistical cost center in the asset master data.
- B. You assign a statistical order in the asset master data which you settle periodically to two cost centers.
- C. You assign two real cost centers in the asset master data.
- D. You assign a real internal order in the asset master data which you settle periodically to two cost centers.

Answer: D

Explanation:

* Assigning Real Internal Order:

* To post depreciation costs of one asset to two cost centers, you assign a real internal order in the asset master data. This internal order acts as a cost collector, capturing all depreciation expenses associated with the asset.

* Periodic Settlement to Cost Centers:

* The internal order is settled periodically to the two cost centers. This process involves transferring the accumulated costs from the internal order to the designated cost centers based on predefined settlement rules. This ensures that the depreciation costs are accurately distributed across the appropriate cost centers, reflecting the actual usage or benefit derived from the asset.

NEW QUESTION # 38

On which levels do you define FI-AA account determination? Note: There are 2 correct answers to this question.

- A. Company code
- B. Client
- C. Chart of depreciation
- D. Chart of accounts

Answer: B,D
