ED-Con-101 Prüfungsmaterialien, ED-Con-101 Schulungsangebot

Wofür zögern Sie noch? Sie haben nur eine Chance. Jetzt können Sie die vollständige Version zur Salesforce ED-Con-101 Zertifizierungsprüfung bekommen. Sobald Sie die ZertPruefung klicken, wird Ihr kleiner Traum verwirklicht werden. Sie haben die

besten Schulungsunterlagen zur Salesforce ED-Con-101 Zertifizierungsprüfung gekriegen. Benutzen Sie beruhigt unsere Salesforce ED-Con-101 Prüfungsfragen und Antworten, werden Sie sicher die Salesforce ED-Con-101 Prüfung bestehen.

Salesforce Certified Education Cloud Consultant ED-Con-101 Prüfungsfragen mit Lösungen (Q158-Q163):

158. Frage

The Alumni Association is interested in using Education Cloud to support its operations. The association track alumni interested board networking activities, and manages fundraising.

Which two Education Cloud considerations should the consultant discuss with the Association?

Choose 2 answers.

- A. Install Insights Platform to understand alumni data.
- **B. Configure Relationships to track alumni connections.**
- C. Use Grants Management to track alumni scholarships.
- **D. Leverage a third-party app to support event management.**

Antwort: B,D

Begründung:

The consultant should discuss with the Association how they can configure Relationships to track alumni connections, and leverage a third-party app to support event management, as two Education Cloud considerations. Relationships is a feature that allows the Association to create and manage connections between Contacts in EDA. Relationships can be used to track various types of connections, such as family, friends, mentors, or board members. A third-party app is an application that provides additional features and solutions for Salesforce. There are many third-party apps on the AppExchange that offer event management capabilities, such as registration pages, ticketing, and agenda-building. The consultant can help the Association choose an app that meets their needs and budget. Using Grants Management to track alumni scholarships, or installing Insights Platform to understand alumni data, are not Education Cloud considerations that the consultant should discuss with the Association. 159. Frage

The Alumni Association is interested in using Education Cloud to support its operations. The Association tracks alumni interests and hosts networking activities.

Which of these Education Cloud considerations should the consultant discuss with the Association?

- A. Install Insights Platform to understand alumni data.
- B. Install NPSP into their Education Cloud environment.
- **C. Leverage a third-party app to support event management.**

Antwort: C

Begründung:

The consultant should discuss with the Alumni Association the option of leveraging a third-party app to support event management, such as Eventbrite or Fonteva Events, which are available on the AppExchange. Education Cloud does not have a native event management solution. Installing Insights Platform or NPSP into their Education Cloud environment are not relevant considerations for event management. 160. Frage

A consultant is enabling Course Connections for the first time in the Education Data Architecture.

What should the consultant do first?

- **A. Set Record Types for Course Connections.**
- B. Run Course Connections Backfill.
- C. Disable Course Enrollments.
- D. Set up Course Offering Schedule.

Antwort: A

Begründung:

The first thing that the consultant should do when enabling Course Connections for the first time in EDA is to set record types for Course Connections. Record types allow the consultant to define different types of course connections, such as instructor, student, or teaching assistant. Record types also determine the page layout and picklist values for each type of course connection. Running Course Connections Backfill, setting up Course Offering Schedule, and disabling Course Enrollments are not the first steps to enable Course Connections in EDA. Reference:

<https://powerofus.force.com/s/article/EDA-Course-Connections>

https://help.salesforce.com/s/articleView?id=sf.customize_recordtype.htm&type=5

161. Frage

A consultant is setting up Student Success Hub for a university. A Contact record has already been created for a student. Which two steps should a consultant take to set up a student in Student Success Hub?

Choose 2 answers

- A. Create a User record.
- **B. Create an Administrative Account record.**
- **C. Create a Student Case record.**
- D. Create a Household Account record.

Antwort: B,C

Begründung:

The consultant should create a Student Case record and an Administrative Account record to set up a student in Student Success Hub. Student Case is an object that represents a student's request for assistance or support from an advisor or a counselor. Student Case can be used to track various information about a student's issue, such as status, priority, category, or resolution. The consultant should create a Student Case record for each student who needs assistance or support from Student Success Hub. Administrative Account is an account model that allows users to store information about individuals who are related to an educational institution, such as students, faculty, staff, or alumni. Administrative Account can be used to track various information about an individual, such as name, email, phone, or address. The consultant should create an Administrative Account record for each student who is enrolled in the educational institution. Creating a User record or a Household Account record are not steps to set up a student in Student Success Hub. Reference:

162. Frage

A university has hired a consultant to advise on its technology and data strategy. Which tool should the consultant leverage?

- **A. Data Maturity Model**
- B. Program Management Module
- C. Insights Platform Data Integrity

Antwort: A

Begründung:

The consultant should leverage the Data Maturity Model as a tool to advise on the university's technology and data strategy. The Data Maturity Model is a tool that helps organizations assess their current state of data management and identify areas for improvement and growth. The Data Maturity Model consists of five levels: Ad Hoc, Reactive, Proactive, Managed, and Optimized. The consultant can leverage the Data Maturity Model to advise on the university's technology and data strategy by using features such as surveys, benchmarks, or best practices. Program Management Module, Insights Platform Data Integrity, or Salesforce Advisor Link are not tools that the consultant can leverage to advise on the university's technology and data strategy.
